# **Deutsche Bank to** bail out Klöckner after futures loss

By David Goodhart in Bonn and Haig Simonian in Frankfurt

DEUTSCHE Bank, Germany's largest bank, last night launched a rescue operation for Klöckner and Company, the privately owned trading and engineering group, which stunned the West German business establishment by announcing a potential loss of DM600m to DM700m (\$227m-\$381m) in oil forward contracts. In a brief statement, the bank said it had agreed with Klöckner "to secure the neces-sary financial basis to allow the business to carry on." The rescue, one of the larg-

the business to carry on." The rescue, one of the larg-est in West Germany, immedi-ately triggered memories of that for AEG, the German elec-trical and electronics group which was on the verge of bankruptcy in 1982 before a group of banks stepped in. Deutsche's move also unset-tled a recently bullish West tled a recently bullish West German stock market, and the bank's share price fell by DM10.70 to DM527.30 in Frank-

furt yesterday. Klöckner is not listed on the stock exchange, but its participation certifi-cates trade on the West German secondary market, and were suspended yesterday. Klöckner, which is more than 90 per cent owned by the Peter Klöckner Stiftung, a charitable foundation, is now effectively in the hands of

Deutsche Bank, which stressed

Deutsche Bank, which stressed yesterday it was not interested in a long-term holding. Klöckner's potential loss sur-passes the DM480m lost by Volkswagen last year in a cur-rency fraud. It appears in this case that poor risk manage-ment rather than criminality was to blame, and although Klöckner spokesman did not which a monered state. rule out fraud a prepared state-ment read: "This situation has arisen out of a disregard for operational management rules and the circumvention of existing controls."

Mr Peter Henle, the manag-ing board member with respon-sibility for oil trading activities and a brother of Mr Jörg Henle, the chief executive, has resigned. The Henle family, descendants of the founder Peter Klöckner, directly owns a little under 10 per cent of the company but also controls the

Stiftung. No further manage-ment changes are expected in the immediate future. Traders in the oil futures market said the company had become well known as a heavy trader over the past year, pos-sibly as a front for other traders. There was speculation that it had become involved with a Swiss company and had inher-ited a series of long positions on which losses had been

**Bonn trade surplus jumps** 10% in first eight months

#### By David Marsh in Bonn

WEST GERMANY looks set to wEST GERMAANY JOORS SET D chalk up another record for-cign trade surplus this year after bumper exports. In August helped boost the sur-plus to DM29.Sht (\$48.40m) in the first eight months of the year, 10 per cart up on the figure of DM72.1bn in the same neriod last year.

period last year. Figures yesterday from the Federal Statistics Office, show-

foreign exchanges this year successive upwards revision successive upwards revision from the Government's fore-rest of 1.5 to 2 per cent growth at the beginning of the year. Yesterday's statistics, abow-ing a trade surplus in August of DM9.8bn compared with DM6.5bn in August 1967, over-state the sammer boom in for-eign sales. The August figures a showing a short vice in - where it has shown a real (inflation-adjusted) devaluation on a trade-weighted basis -

has increased German export-ers' competitiveness, particu-larly in Europe. The sharply widening West German trade surplus against other EC countries this year is storing up gradual pressure for-- showing a sharp rise in exports to DM44.2bn, 28 per

mounting as the oil price fell. Klöckner reported a net Dukakis: a big win needed profit of DM8m in 1987, down from DM25m in 1986, and turn-over of DM9.6bn, of which DM2.6bn was in oil and gas. **Debate** is

DM2.6bn was in oil and gas. But it has shareholders' funds of only DM270m. It has important stakes in the two quoted Kköckner com-panies: 40 per cent in Klöck-ner-Humboldt-Deutz, the diesel and farm machinery group, and 18 per cent of Klöckner-Werke, the steel, plastics and machinery company. Klöckner and Company passed its dividend last year, for the first time in the group's history, because of the finam-

history, because of the finan-cial problems of the two other companies.

Klöckner-Werke reported a net loss of DM389m and Klöck-ner and Company provided about DM120m in a financial restructuring alongside Deutsche Bank.

There was some speculation that Dentsche Bank might press Klöckner and Company to sell one or both of its stakes but the bank, which also has considerable capital tied up in Klöckner-Werke, is more likely to want to shake up all three companies together without outside interference. Caught out by the oil fall,

### **EUROPEAN NEWS**

# France prepares for opening of its market to foreign mutual funds

By George Graham in Paria

2Φ

THE FRENCH Government yesterday put forward a bill aimed at bringing the coun-try's mntual fund legislation into line with new European Community require-ments. The bill will harmonise the law governing French unit trusts, known as Sicavs or Fonds Communs de Placement, according to their type, with the EC direc-tive due to come into effect next October. France has the largest mutual fund industry in Europe, with more than FFr1,000bn (£92bn) in funds under management. However, the funds are largely distributed by banks directly to their existing customers, and the market is

expected to be overturned when the EC directive allows foreign funds to be sold freely in France.

At the same time, the Government plans to make it possible for banks to manage their balance sheets by transfer-ring their credits into traded securities, in a new instrument known as "fonds com-muns de créances". The bill is expected to open the way for a market in mortgage-backed securities which could represent several billion francs within a year. A large market in mortgage-backed securi-ties has already developed in the US, and the UK also launched the instrument.

Finance ministry officials said the details of the mutual fund bill, which is expected to pass through Parliament in the current session, have not been finali-sed, but the ancillary rules are expected eventually to end the requirement for French Sicavs to invest 30 per cent of their portfolios in bonds, even if their primary aim is equily investment. They are also expected to allow money market funds to invest directly in instruments such as certificates of deposit or commer-cial paper, rather than through round-about techniques such as "remere" bond rchase agreements.

# Copenhagen changes mind on indirect taxes

By Hilary Barnes in Copenhagen

THE DANISH Government has set up a ministerial committee to consider how indirect tax levels can be brought more closely into line with those in other European Community countries, Mr Anders Fogh Rasmussen, the Minister for Taxation, said yesterday. Up to now the Government has insisted that the comple-

tion of the EC internal market did not require harmonisation of indirect tax rates. It also remains highly criti-

cal of the harmonisation proposals put forward by the and total public sector tax rev-European Commission, said Mr Rasmussen. But he added: enues of DKr359bn. Danish indirect tax rates are "Denmark is not an island. We mnst adapt to the world substantially higher than those in West Germany which already creates a serious fromaround us."

If Denmark were to reduce tier trade problem. Mr Rasmussen said the Gov-ernment's strategy to reduce indirect tax levels would be based on a combination of its indirect tax levels to those proposed by the Commission, the Treasury would lose reve-nue of DKr40bn-DKr50bn (£3.3bn-£4.1bn), the minister lower public sector expenditure, the introduction of charges for public sector sersaid. This figure compares with total revenues from indirect

taxes of DKr136bn last year vices, and strategic reductions in taxes on business, in the expectation that they will boost growth rates which will generate more tax revenue.

He also expressed the hope that indirect tax levels in some other European countries would be raised, which would ease the Danish problem. How-ever, Denmark would maintain high rates of taxation on spirits, tobacco, and energy, and for environmental pur-DOSES.

I G Metall is leading the 1992

inteed minimum standards in

adquarters to 2 near-by RC

By Leslie Collitt in Berlin THE GIANT West German metalworkers' union, I G THE POLITICAL message sent out by the reshuffled Czecho-slovak leadership this week is Metall, is trying to breathe new life into the idea of trans-national works councils in that old-time communism is response to the greater mobil-ity of capital expected in a bar-tier-free Europe. The union believes that the alive and well in Prague.

Less than two weeks after Mr Mikhail Gorbacher's reformist coup in Moscow, the Czechoslovak leadership perlong-standing informal links between union committees formed a game of musical chairs in which the main loser within multinational compa-nies in Europe should be given a more formal status and that was a would-be reformer, Mr Lubomir Strougal, the Prime Minister. hargaining rights on non-wage issues should be sought for these international bodies.

The Czechoslovak leader, Mr Milos Jakes, packed his ruling praesidium (politburo) with five new members who, Unions at Airbus Industrie recently announced the forma-tion of such a trans-national although younger, were not discernibly less conservative than the old guard they joined. Most notable was the meteoric works council. i G Metall is learning the heat debate among European trade unions partly because it fears that West German workers – with the highest pay and best fringe benefits in the EC – have the most to lose. Last week Mr Franz Steinkuchler, the head of I G Metall, echoing Mr Learner Delars the Furnrise into the praesidium of the 43-year-old Mr Miroslav Stepan, who only became party chief of Prague last April.

Any expectation that the vic-tory of the reformers in Moscow would leave its mark Moscow would leave its mark on the "fraternal" party in Pra-gue was wishful thinking. So thoroughly purged was the Czechoslovak party apparatus after its reformist leader, Mr Alexander Dubcek, was deposed in 1970, that even advocates of limited economic Mr Jacques Delors, the European Commission president, called for a "social charter" for Europe 1992. Mr Steinkuchler wants guar all fields not directly connected to wage bargaining. The union is not pressing to "Ruropean-ise" the West German system of co-determination, which reforms were scarce on the

Mr Strongal was counted among them. But he matched his desire for economic reforms with a political opportunism gives workers representation on company boards and rights to information. It is antions, which made him a willing instrument of the hardline however, that even West German companies may be able to escape the co-determination system by transferring their

leadership. Mr Gorbachev would have had to intervene personally in Prague and launch a search for country. "This social charter needs to be backed up hy trans-national co-ordination between unions suitable, reform-minded officials in the Czechoslovak party nomenklatura. But such a blatant intervention by Moscow in the affairs of another ruling party has been ruled out

co-oroination between initials but this can be very difficult to organise," said Mr Joerg Har-czynski, an I G Metall official. The difficulties include the language barrier and the frag-mentation of unions outside The Soviet leader is also wary of pressing his campaign for reforms on the Czechoslo-West Germany along political, religious and craft lines, I G Metall also accepts that vak leadership for another reason, Forcing economic and political changes on the ortho-doz party in Prague could unleash unpredictable political forces in Czechoslovakia whose because of the enormous differences in national bargaining population has never forgotten Moscow plans to bring the nation's pre-war democratic traditions.

The cautious Soviet leaderin major tax reforms political and economic instability in its East European back-yard, least of all at at time when it is engaged in an eco-nomic and political upheaval THE Soviet Union is planning to introduce major tax reforms, alongside its politically exploat home.

#### By Terry Dodsworth, Industrial Editor

SEVERAL OF Europe's leading computer and semiconductor manufacturers are joining forces on a research pro-gramme aimed at establishing a European presence in the fast-expanding workstation market.

The project, to be led by Olivetti of Italy, Europe's largest personal computer producer, is one of the most ambitious schemes being planned for the second stage of the European Commission's Esprit high-technology programme. It is designed to give Euro-

pean companies a basis on which to tackle a part of the computer market which is growing at well over 50 per cent a year, but which is dominated by US companies.

Workstations began to carve out a niche for themselves at

users many of the facilities associated with personal com-puters, hat with mach enhanced power and far more sophisticated display and graphics system

As personal computers have increased in power and flexibil-ity, the two markets are beginng to converge. At the same time, they have assumed an increasingly important part in computer companies' thinking because of the growing penetration of desk-top processing. European computer groups see this trend as an opportunity to mount a counter attack against the big US companies which dominate most of the data pro-

cessing market. Under the proposed Esprit programme, called Multiworks, the aim will be to develop a low-cost workstation in which the beginning of the 1960s, in the computer and screen will engineering design and scien-tific research departments. whone system. Peripheral They were designed to give equipment such as facsimile

machines will also be included. One problem Europe has faced in trying to create an indigenous industry in this sector is the absence of a well-es tablished European-owned manufacturer of microproces-sors, the semiconductors which

ago by Acorn, the UK company now majority-owned by Oli-vetti. The Acorn processor used a technique called reduced instruction computing, which increases the processing speed of the chip by eliminat-ing certain instructions.

Other European companies

in the project include Bull of France, ICL in the UK, Philips of the Netherlands, AEG of West Germany, and SGS-Thom-sont, the Italian-French semiconductor company. --

The general reaction of industry to the budget was that the outlook was bleak, if not hopeless. "With this bud-get, the rate of inflation cannot be less than 60 per cent, although the target is 45 per cent," said one business leader. Istanbul-based international The outlines of a draft aus-

bankers were more sanguine about the outlook. Although the Government had signally terity budget for 1969 were also revealed officially yesterday, although they had been clear for some time. The total budget will be around TL32.5 trillion the Government had signally failed to take the opportunity of curbing, inflation gradually next year, said one, the outlook for the balance of payments was so promising that in the first three-quarters of the year the current account might be in surplus for the first time in many years (million million), or about \$11.2bn. Growth in gross national product has been targeted at 5 per cent, with a GNP deflator of 49 per cent. Tax many years.

#### delay in Dutch pollution move By Tim Dickson in

Brussels

THE EUROPEAN Commission yesterday made a new move to try to break the political dead-lock over EC plans to halve exhaust pollution from small cars over the next five years. It has asked the Dutch Government to suspend for three months a programme of fiscal incentives for car buyers planned for this autumn.

The Dutch proposal was a major factor in France's deci-sion to withdraw its support for emission standards of 8 grammes per test cycle for a combination of nitrogen oxides and hydrocarbons which a "qualified" majority of member states had agreed of member states had agreed to implement by 1932/93. The French argued that the special incentives for "clean" cars would endanger the unity of the single European market. The Commission said yester-day that the Dutch plans come at a delicate time in the nego-tlations as well as potentially risking the fragmeniation of

risking the fragmentation of the market.

notwithstanding, the Czecho-slovak party still tinkers with the notion of economic reform first broached in 1982. Prestavba (perestroika) or, as

it is known by its fall title, "the restructuring of the eco-nomic mechanism" is to be fully launched by 1991. While providing for a measure of providing for a measure of company autonomy and fewer central plan directives to com-pany managers, the leading role of the party in the econ-omy is to be strengthened. In his speech to the central committee this week, Mr Jakes cantioned against "overly basiv" economic reforms and

hasty" economic reforms and departing from central control. Both he and the party's newly appointed ideological chief, Mr Jan Fojtik, paid tribute to many of the ideas embraced by the reformers in Moscow: democratisation and openness. But they also evoked the termi-nology so familiar to Czecho-slovaks over the past 18 years. Mr Jakes left no doubt that

even the mildest form of politi-cal opposition would not be tol-erated. Growing forces, supfrom abroad – especially by the Western media – aimed to "destabilise" Czechoslovak society, Mr Fojtik warned.

First details were spelt out in an interview yesterday by Mr Viktor Semyonov, Deputy Minister of Finance. The aim will be to overhaul

a system which is overwhelmingly based on hefty indirect taxation, mostly levied on con-sumer goods, and which includes only very small

By Quentin Peel in Moscow

Income taxes, Indirect taxes provide more than 50 per cent of all state revennes, whereas income taxes provide only 7.5 per cent, he said. He estimated that almost two-thirds of average incomes were consumed by

indirect taxes. Although most of the sales taxation is imposed on non-essential consumer products, substantial cuts could give the Soviet government a way of softening the blow of price rises in other areas - already seen as the most politically sensitive single issue in Mr Mikhail Gorbachev's economic reforms.

even more than rising prices." As for the taxation of state "We need to discuss the issue at langth with the public, and then draw up a plan," Mr enterprises and newly-estab-lished co-operative ventures the subject of heated debate Semyonov said.

earlier in the year when the Finance Ministry proposed taxes of up to 90 per cent on co-operatives - Mr Semyonov said he accepted the criticism. Mr Semyonov sind. Mr Semyonov admitted, how-ever, that raising income taxes and demanding tax returns from Soviet citizens could

Spanish viewers wait for dawning of a new television age

Peter Bruce reports that Madrid has yet to show its hand in plans to introduce private TV in the next two years

F Mr Jose Barrionuevo thought life as a Spanish Cabinet Minister was going to be any quieter following his shift sideways to Transport and Communications from the Interior Ministry in last summer's government reshuffle, he is probably having second

It has fallen to him to oversee the introduction of private television into Spain in the next two years and he has already had a abarp taste of how nasty a business televi-sion can be in Spain's frac-

tured democracy. For the past few weeks he has been at the centre of a row with the fiercely independent Catalan Government which has tried to launch a second regional channel in Catalan without bothering to get his permission, as the law requires. At one stage the Gov-ernment-controlled RTVE, the country's main national public network, was showing a test card on the disputed channel to stop the new Catalan opera-tion, Canal 33, from using it.

Much of the fury has now passed and an agreement is likely soon. But tomorrow the Minister is due to pass a decree outlining the technical frame-work under which new private-ly-owned commercial networks will operate and his troubles will really have begun. The Spanish are fanatical television watches and recent

television watchers and recent television watchers and recent research shows that some 70 per cent of Spaniards form their political opinions on the hasis of what they see on tele-vision. Such statistics give rise to fears among opposition poli-ticians that the Government will award the new channels to suit itself and virtually ensure that the introduction of private television will be attended by ferocious political battles.

many. In addition, the autono-

regional channels, But under legislation pow-ered through both houses of the Madrid Parliament in May, the Government is proposing to license three new private channels which will compete

with the existing national and regional networks for a slice of Spain's television advertising cake, worth Ptas 130bn last

That, at least, is the theory. Although the first 10-year pri-vate TV concessions should be awarded within a year of tomorrow's technical decree, established contenders are thin on the ground At present, Prime Minister Felipe Gonzalez' central Sociallat Government funds two national networks, RTVE I and 2, which function rather like BBC I and 2 in the UK and on the ground. ARD and ZDF in West Ger-

0

Telefonica, meanwhile, has already reserved two transponders on France's Eutelsat-1 F1 for Spain's new television age and the Government has asked for tenders from a number of satellite consortia for a satellite of its own. That, it is hoped, would be in place before the 1992 Olympic Games in Barcelona and the World Expo

Barcelona and the world kipo in Seville. But Madrid intends to keep tight control over transmis-sions which will have to be made through Telefonica's modernised ground stations. Foreigners will only be able to hold 25 per cent of a private network and no shareholding higher than 25 per cent, even for locals, will be allowed. The most coherent bid for a

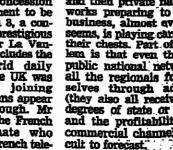

private television concession appears for the moment to be coming from Antena 8, a concoming from Antena 3, a con-sortium led by the prestigious Barcelona newspaper La Van-gnardia and which includes the conservative Madrid daily ABC. Granada of the UK was once considering joining Antena 3 but the plans appear to have fallen through. Mr Francis Bouygues, the French construction magnate who hought the leading French to have bought the leading French television channel TF-1 from the French Government last year, is also rumoured to be talking

to the consortium leaders.

Mr Maxwell is also thought by analysts to be almost cer-tain to seek a stake in a con-sortium bidding for one of the new private channels. He is new private channels. He is extremely well connected in Spain and has already shown an interest in Spanish newspa-per publishing but, says Mr Luis Angel de la Vinda, a lead-ing Madrid media consultant, "I think Maxwell will wait to see how the market is going. But be will come."

Catalan television - with pro-grammes. Mr De la Viuda estimates that it will cost around Ptas 25bn to set up a new private channel in Spain and the risk has been amplified by threats by the political opposition in Spain to test the new broadcast laws in the constitutional courts. One mitigating factor in that calculation is that the wheels of Spanish justice grind very slowly and that the laws passed by the Socialist Govern-ment will stand unless they are rejected by the courts. But be will come." With so many new regional and then private national net-works preparing to enter the business, almost everyone, it seems, is playing cards close to their chests. Part of the prob-lem is that even the existing public national networks and public national networks and all the regionals fund them-selves through advertising Inefficiency works both ways sometimes, though, and Mr Barrionuevo, conscious that in the last year RTVE andiences (they also all receive varying degrees of state or local atil) and the profitability of new commercial channels is diffi-cult to forecast have fallen some 6.5 per cent Lâm viewers – at least has time to craft a credible new television age.

Mr Silvio Berlusconi, the Italian entrepreneur, appears to have already abandoned any hopes he might have had about

state.

scandal turns

The drama of a stock market scandal which has gripped Japan for the past three months turned to farce yesterday when a team of politicians investigating the affair went to hospital to interview their chief suspect. Mr Biromasa Ezoe, the busi-

nessman at the centre of the scandal, received his distinguished visitors in his pyjamas and a dressing gown and told them virtually nothing. After an hour, the seven pol-

iticians trooped out of the hospital before the eyes of dozens of journalists and photogra-phers and boarded a waiting coach to return to the Diet (parliament).

Mr Shin Kanemaru, the investigating team's leader and the Prime Minister's closest adviser, then revealed to a packed press conference how little they had learnt from Mr Ezoe

Nevertheless, members of the ruling Liberal Democratic Party said they hoped the interview with Mr Ezoe would satisfy opposition leaders' demands for a full investiga-tion of the affair. Members of the opposition said they were anything but satisfied. In par-ticular they want Mr Ezce to name other people involved in the affair.

The scandal erupted in June when newspapers disclosed A second that Recruit, an employment agency run by Mr Ezce, had privately sold shares in Recruit Cosmos, a property subsidiary, to leading business and politi-cal figures. These people later made big profits when Becruit Cosmos was floated on the stock market. Mr Ezoe resigned as

Recruit's chairman and went-into hospital in July with "psy-chosomatic" problems, includ-ing loss of appetité and insom-nia. He refused, to attend meeting of the parliementary meetings of the parliamentary, committee investigating the affair, pleading sickness. However, many Japanese wonder how ill Mr Ezce really is, including one member of yesterday's parliamentary dele-

#### Sudan to stand by Sharia law By Julian Ozanne in Nairobi

MR ABDULLAH el-Tourabi, Sudan's Attorney-General end leader of the National Islamic Front, said yesterday the Gov-ernment was fully committed to the revival of Islamic Sharia law.

The Sharia penal code lays down punishments including stoning of adulterers and amputation of hands for theft, and has been extremely contro-versial in Sudan. Its introduc-tion in 1983 by Col Jaafar Nimieri was one reason why the mainly Christian and animist south took up arms against the Moslem Government in Khartoum.

Nigerian gas scheme The International Finance Cor-poration, a World Bank sub-sidiary, will help finance a \$900m effort to extract gas condensate from Nigeria's southern delta, AP writes from Lagos, Sir William Pyria, the corporation's executive vicepresident, did not say how much the IFC planned to invest in the project.

# UK Syrian visit

A group of British Labour and Conservative MPs which is vis-iting Syria next week will not be representing the Govern-ment, the Foreign Office in London said today, PA writes. Britain broke off diplomatic relations with Syria two years ago following claims at an Old Bailey trial of its involvement in a plot to blow up an Israeli airliner at Heathrow.

#### Singapore boost

Texas Instruments will invest about \$\$330m (£95m) in its Singapore plant over the next five years, a company spokes-man said yesterday, AP-DJ writes from Singapore.

### IMF considers three-year financing for Philippines By Stephon Fidler, Euromarkets Correspondent

A TEAM from the financing, both from govern-International Monetary Fund is scheduled to visit Manila were scheduled to be discusstowards the end of this month to resume talks on a possible three-year financing for the Philippines. The Philippines is understood to be seeking about \$900m under the facility, and negotiations are said so far to have been progressing satisfac-

torily. Most financings from the Fund have a shorter duration - of a maximum 18 months - and it is quite rare for a three-year programme, known as an Extended Fund Facility, to be established for the largest debtors. Such facilities usually accompany comprehensive economic programmes and the Fund is expected to seek action, among other things, to increase exchange rate flexibility, reduce the fiscal deficit and continue liberalisation of imports and the privatisation of state-owned corporations. It will also require other new

ments - Japanese officials were scheduled to be discuss-ing in Manila this week a loan from the Japanese Overseas Economic Development Fund - and from commercial banks. The country's main creditor banks are due to meet in New

York next week to discuss the Philippines request for new funds from the banks. Tha Government has identified a \$3.1bn financing gap for 1989-90, of which it wants banks to provide \$1.9bn. Of this, some \$300m would involve the rescheduling of principal repayments, and the rest

would be new money. Banks, however, dispute the Government's calculations, saying that it has ignored important sources of overseas financing, such as money from the US and the loans from Japan. But there is some sympathy in favour of the Philippine request for new funds, its first such request since 1985.

A BLUE Rolls-Royce with a gold version of the silver lady was parked outside the Leaden-hall Street regional office of the Bank of Credit and Com-merce in the heart of the City of London yesterday morning. It gave some hint of the opu-lence to which many of the bank's customers have become accustomed accustomed

The bank was among 80 defendants indicted by a Federal grand jury on Monday in connection with a \$32m inter-national operation to launder the cocaine sales profits made by Colombia's Medellin cartel. There was little indication of

any anxiety among investors, but the reassuring tones of bank officials on the upper floors indicated thet some depositors wanted to know

what was going on. Business appeared perfectly normal and calm within the marbled interior where the affluence almost seeps from the walls. The impression came from the antique Chinese screen encrusted with jade carvings, and the glass chandelier in one of the committee

rooms. Mr John Hillbery, general manager of BCCPe international division said: "We have had a number of calls here in London but we have both a very loyal sharebolder base and a loyal customer base." He emphasised that the bank

had not knowingly been involved in the laundering of profits from the drug traffic. He denied claims by US Custhe units that the alleged \$32m (£17m) lanndering plot involved "senior executives." The nine people named so far, he said, were all "young offi-CETS

The bank was able to tell customers that a federal judge in Tampa, Florida, had lifted a restraining order preventing tha bank from removing its funds and other assets from the US late on Tuesday when it deposited £14m into a courtsupervised escrow account to

cover possible fines. As US Customs officers intensified their search for other individuals involved in the laundering network, Mr Nazir Chinoy, 55, general man-ager for France and Frenchager for France and French-speaking Africa, was remanded in custody yesterday until Fri-day by Bow Street magistrates. He has been indicted in the US on charges of taking part in the laundering operation. The US authorities are seeking his ortendition extradition.

Mr Chinoy, in London for a business meeting, had been staying at his flat in Water Gardens, Edgware Road, Bayswater

Mr Hillbery stressed BCCI's third world connections established by Mr Agha Hasan Abedi, its president, the Indi-

an-born, London-based businessman who cut his banking teeth in the Habib Bank in India, leaving to set up the United Bank of Pakistan in 1959. Mr Abedi left the UBP in 1972 because of the impending nationalisation of the Pakistan Banks.

He set up BCCI in Luxem-bourg in the same year with capital of \$2.5m. Bank of America took a 25 per cent stake and Arab shareholders subscribed the remainder. Mr Abedi, recuperating at

present from a heart trans-plant operation in March, has no stake himself. London played a leading role in the transfer of oil money into Britain during the 1970s. One branch in London was set up solely at the request of a

large client whose business alone justified the expense. The overall reason for the bank's foundation was to facilitate Third World trade and pro-vide jobs for third world peo-ple, to educate them in banking and to help them. travel," said Mr Hillbery yesterday

The bank, he said, had never been exposed to Third World debt. Mr Hillbery said BCCFs commitment to the Third World extended to making regular donations totalling \$21m dollars in 1987 to charitable causes in countries such as Sudan and Bangladesh.

these issues. Moreover, only

HE problems which bave struck Bank of **Credit and Commerce** International with its indict-ment for alleged laundering of drug money highlight the complexities of supervising the activities of banks with wideinternational spread operations.

BCCI was founded by Pakistanis and financed by Saudi Arabians. It belongs to a Luxembourg-registered bolding company but most of its business is in the UK and elsewhere. Unlike most banks it has no obvious home, nor any

clear regulatory centre. Mr Robin Monro-Davies of IBCA, the London firm which

rates banks, said yesterday: "It is the world's largest bank closely for any sign of a flight of deposits, though BCCI has maintained a liquid balance sheet and is well placed to without a lender of last resort." A lender of last resort, usu-ally a central bank, stands meet any surge in withdrawready to supply liquidity to banks when they cannot obtain At the end of last year it had it in the markets.

\$17bn in deposits, but only \$9bn of loans, which meant that it had a large proportion of its assets in readily realisa-Altbongh there was no immediate evidence that the bad news had affected confidence in the bank, (the bank's ble money market instruments. Regulatory responsibility for BCCI is to some extent shared with other supervisors through the so-called Basle Concordat, in other countries, it would pose little threat to the Luxem Some years ago, the Mone-tary Institute obtained assur-ances from BCCI's shareholda 15-year-old agreement among banking authorities which is designed to ensure that interers that they would help it out national banks do not slip if it got into trouble. Such through the supervisory net. "letters of comfort" are fairly routine for banks with a for-

This places BCCI's branches in the UK, for example, within the aegis of the Bank of England. However the Basle Concorball out a troubled bank. That is left for each central bank to decide for itself, and though troubled banks do, on the whole, get rescued, it is usually only at considerable financial and political cost.

The allegations of drug money laundering in BCCI's case point to a further fact about international banking supervision: it is not designed to prevent breaches of the law so much as to ensure that banks are soundly managed. International banking officials are believed to be working on a code of banking conduct which will condemn bank connivance dat specifically excludes super-visors from any obligation to sion and drug trafficking.

# **BCCI** named in cocaine profits laundering case

By David Buchan in Strasbourg and Tim Dickson in Brussels

LUXEMBOURG'S financial community reacted yesterday with alarm and despondency to with alarm and despondency to the news that Bank of Credit and Commerce International is among defendants indicted by a US Federal Grand Jary for the alleged laundering of US\$32m in profits from cocaine sales

sales. "I was very depressed when I heard about it," said one prom-inent banker echoing senti-ments expressed by Mr Pierre ments expressed by Mr Plarre Jaans of the Luxembourg Mon-etary Institute, the Grand Duchy's chief regulator. "It is the first time this sort of thing has happened here but it is the sort of premiere I am not at all happy about," said Mr Jaans. Both men emphasised that the allecations were not yet

the allegations were not yet proven, but they both know that even the whill of scandal can be damaging in the highly competitive business of attract-ing funds to a low-tax imancial centre.

In this regard Luxembourg has done outstandingly well over the last 20 years turning its enormous success as a base for the Earobond market in the 1970s and early 1980s into a magnet for financial institu-tions wishing to develop inti-vate banking activities. More foreign banks - 11 have set up in Largenbourg this year than in any previous

years, bringing the total to 138. This record influx is mainly due to new propects for invest-ment funds to operate Community-wide from a single base in Luxembourg, coming on top of Luxembourg's general hanking advantag

The Luxembourg banks boast total assets of around \$220bn, compared with around \$160bn five years ago, and make an important contribution to the local economy by providing more than 14,000 bs.

Luxembourg's success as a banking centre can be attributed to a wide combination of factors, including its growing range of financial services, good communications, geo-graphical location and position in the time zone, and political chalifier. stability. Above all however the legally endpined tradition of bank secreoy, relatively light handed regulation by the

Luxembourg authorities and tax advantages are the chief reasons why foreign banks have gravitated towards the Grand Duchy in ever increas<u>کی</u> پ

711

ារ

Grand Duchy in ever increas-ing numbers. But these advatanges, parti-culary banking secrecy, are now likely to be put to the fest by the BCCI case. Bank confi-dentiality is underpinned in Luxenbourg law by which the authorities cannot force a bank to disclose details of a deput-tor unless that proof can shown to a Langenbourg comp shown to a Langebourg court that that depositor is suspected of a criminal offence. Tax evasion is a civil, not criminal offence in the duchy, and thus not sufficient to force disclo-

This law is very similar to Switzerland's bank secrecy haw. But some Laxembourg bankers have not been shy to promote their own services by pointing out that lower Swiss courts have recently been responding more readily to fur-eign, particularly US, requests for bank disclosure. requests have eventually been rebuffed by higher Swiss courts, but not before limit information has passed out of the country and damage done to the reputation of Swiss secrecy.

Luxenbourg has not come under the same foreign pre-sure as Switzschurd, claim offi-cials at the Monetary Institute, because it has not hitherto attracted the volumes of "doubtful" money from areas like Latin America or the Phi-lippines, which has tradition-ally found a home in Switzerally formit a home in Switter-land. This assertion must now come under fresh scrutiny in the light of the BCCI affair. Larrenbourg banks generally claim they scrutinise very carefully individual depositors.

and the Institute claims in turn it supervises the banks closely, requiring monthly reports and occasional external andits to supplement checks by the institute's, own 20 strong the institute's own 20-strong bank supervision team. Mr James atressed that there has never been any question of Luxembourg shielding crimi-nal activities, and says that where these have been suspi-olons in the past banks have always cooperated fully with the anthorphes.

# Bush turns racism to his own advantage

### Stewart Fleming reports on the importance of the black vote in the state of Illinois

Rect is an issue which neither presidential candidate addresses directly. But in cittes across the Midwest and the north east, where the decisive confrontations of this year's presidential election campaign are now taking place, it is on everybody's mind. "It's like the elephant in the room, it's there but nobody talks about it." says Mr Wil-

liam Schneider, a political ana-lyst at the American Enterprise Institute, a Washington think tank. So far it is an issue which Republican candidate Mr George Bush is turning to his advantage. Nowhere is this more true

than in Illinois where, legend has it, a few thousand stuffed ballots in Cook County enabled Chicago's then-Mayor to swing the state's 27 electoral votes behind Senator John F. Kennedy and ensure in 1960 that he, not Republican Vice-Presi-dent Richard Nixon, was victorious.

The days when the Mayor's patronage machine could hold together a multi-racial, multiethnic coalition by dispensing jobs and favours to precinct workers and their constituents are long since passed.

Since 1963 when the black vote elected Mr Harold Wash-ington, Chicago's first black mayor, who promptly announced "Now it's our turn," the city's politics have polarised along racial lines.

#### **US CAMPAIGN '88**

"Racial politics destroyed the Chicago machine," said Mr Schneider in an article earlier this year in Atlantic Monthly. "Machines work best in an issue-lese environment. Machine politicians are concerned with material resources, such as jobs, con-tracts and benefits. Once divisions over issnes emerge, gronps begin to see one another as opponents rather

"Race," says Mr Robert Macari, the top Chicago aide to Congressman Marty Russo, "plays a part in every political devicion bace " decision here." Neither presidential candi-

date is making an overtly racial appeal to the voters of Racial appear to the voters of likinois or, more specifically, the ethnic white working class voters around the city of Chi-cago itself who will determine whether Illinois votes Republican or Democrat in the presidential election.

lic Policy at Governor's State University in Chicago, the city and its immediate suburbs will cast about one quarter of the social issue themee and exploiting the biggest split in the Democratic party, which is race," says Mr Schneider. "He votes in the election, with the rest divided roughly equally between the outer Chicago sub-urbs and the downstate areas. The outer suburbs will vote overwhelmingly Republican. is waving the bloody flag," says Mr Green more provocatively.

Now that the focus of the campaign has shifted to the industrial Midwest and north industrial Midwest and north east Mr Bush, has continued to define his rival as a "liberal" not only by suggesting that he will raise taxes and spend them on social programmes but also by arguing that he is soft on crime. In speeches and in TV adverts he draws atten-tion to the Massachusetts pris-on-leave programme and the release of a black murderer in 1987, who raped and terrorised. Just to be competitive, there-fore, a Democratic presidential candidate needs to do well in candidate needs to do well in the Chicago area. Governor George Dukakis needs not only to generate a strong turnout among the city's black popula-tion of around three quarters of a million potential voters, but also to capture a good chunk of the working clase white vote. white vote.

white vote. These voters tend to go sol-idly Democratic in congressio-nal and local races but not in presidential elections. Not since President Lyndon John-son's electoral landslide in 1964 has Illinois voted Democratic in a presidential election. In 1984, when President Ron-ald Reagan won Illinois with 56 a young Maryland couple while out of prison on a weekend pass. Mr Schneider argues that it

ald Reagan won Illinois with 56 per cent of the vote statewide, predominantly blue collar constituencies such as Congress-

But both candidates are tak-ing the city's racial polarisa-tion into account. The arithmetic of a state-wide election in Illinois helps to explain the key role which white working class voters will play on November 8. director of the Institute of Pub-lic Policy at Governor's State distancing himself from black

Mr Dukans faces a special problem in achieving this objective in Chicago, namely Rev Jesse Jackson, his former rival for the Democratic presidential nomination.

The resentment many white Chicago voters feel towards the blacks who have taken over many of their neighbourhoods and, since 1983, control of the Mayor's office, is focused on Rev Jackson, a controversial figure in the city's politics for vears.

Mr Dukakis, a black city official points out, has made only one campaign stop before the black community. That, he says, only came after local black leaders had pressured him. The most Gov Dukakis can expect from Chicago's blacks is "indifference", he Says.

Others, however, maintain that black elected officials will work to turn out the vote because of their commitment to the Democratic Party.

The Dukakis campaign in Chicago itself is saying that it may have an ace in the hole -Mr Bush's failure to solidify his base in traditionally Republican rural sonthern Illinois where local poils show that the

This is a luxury Mr Dukakis cannot afford. He needs to cap-ture both white and black party is not as strong as might be expected.

**Reagan over** prosecution of Marcos

# By Lionel Barber in Washington

PRESIDENT Ronald Reagan faces a tricky decision on whether to approve the indict-ment of Ferdinand Marcos, the former president of the Philip-pines, before the November election. Mr Marcos faces charges that

he frandulently purchased with Philippine government money valuable New York real estate and art objects before he fied, under US pressure, into exile.

the 1990 constitution. The opposition, which last week defeated Gen Phochet in a plebiscite on granting him a further eight years in power, is The US Justice Department. wants to proceed quickly with the indictment, but senior State Department officials want to office Mr Marcos a chance to plead criticalis further eight years in power, is pressing to eccelerate this : timetable. The possibility of Gen Pin-ochet being a candidate in the presidential election has prompted criticism from the two most important political parties that supported him dur-ing the plebiscite. chance to plead guilty in exchange for a lighter sen-

tence. The State Department is con-carned, that prosecuting Mr-Marcos could damage future attempts by the US to influ-ence heads of state to leave

ing the plebiscite. The most important conser-vative party, National Renova-tion, opposes a Pinochet candi-dacy. Its secretary-general, Mr Andres Allamand, said that changes to the constitution that would be required to legal-ise a Pinochet candidacy were unacceptable and that in any case, the general had "no possi-bility of political success". The Independent Democratic. Union (UDD) also announced ence heads of state to leave power. A second consideration, according to a leaked State Department cable, is that Mr Marcos might embarrass Phil-ippine or US government offi-cials. A federal grand jury in Man-hattan has been investigating allegations that Mr Marcos and his wife, Imelda, acquired sev-eral hundred million dollars-worth of Manhattan real estate with Philippine government funds. It is also examining whether after arriving in the US, Mr Marcos violated a fed-eral court order against trans-ferring the properties. Peruvian general 'retires' amid coup rumours

# **New Boeing 747 series** faces production delay

#### By Michael Donne, Aerospace Correspondent

DELIVERIES of the latest version of the Boeing 747 Jumbo jet, the Series 400, are being delayed by np to a month because of unerpected

Boeing Commercial Air-planes of the US said in Seattle that the problems arose from an unexpectedly high number of changes in the configura-tions of the aircraft asked for by different airline customers.

Another factor was the need to complete full certification of the aircraft with three separate types of engine, from Rolls-Royce, Pratt & Whitney and General Electric, involving a high volume of test flyingover the past four months.

\_\_\_\_\_

In addition, the production rate was increased from two to five aircraft a month, creating difficulties on the final assembly line at Seattle.

The first deliveries of two aircraft to US airlines will be made on time in December, but thereafter deliveries of the next 20 aircraft through the first half of next year will be delayed by up to one month. Boeing hopes it will have caught up by next summer, with production running at the

higher level. Current Series 400 orders stand at 161 aircraft, out of the total of 877 Jumbo jets of all versions ordered to date, of which 705 have been delivered.

BY Ivo Dawnay in Brasilia BRAZIL yesteriay launched e new package of environmental measures aimed at countering growing world criticism of its conservation record, particu-larly in the tropical forests of the Amazon Basin. The package includes the merging of the national envi-ronmental agency (Sema) and the Brazilian Forest Develop-ment institute (IRDIF) and I cacy of the country's ecology. "This is not just a government problem, we have to create a national consciousness of the environment," President José Sarney told foreign journalists yesterday. While cartain to be welcomed, the initiative is also inter an abroad. It comes soon after Brazil

The package includes the merging of the national envi-ronmental agency (Sema) and the Brazilian Forest Develop-ment institute (IBDF) and co-ordinating the environ-ment-related activities of six ministries. The measures also involve an end to much criticised federal incentives for the development of cattle ranching

in the Amazon region. In addition, an educational programme, called Our Nature, is to attempt to raise national awareness of the value and del-

this week 13 Brazilian embas-sies abroad have faced small but vociferous protests over forest destruction and the treatment of Indians. In particular, Brazil's critics are expressing growing con-cern at the rate of forest destruction and the meteoro-logical impact of deliberate burning for land clearance on

# Pollution protest Provinces spurn Peking attempts to rein in economy shuts Taiwan

#### By Colina MacDougall

chemical plants

By Bob King in Taipei

ANGRY demonstrators have shut down 17 leading petro-chemical plants in Taiwan's southland because of alleged environmental pollution - in-cluding the nation's third and fourth naphtha crackers. which provide two-thirds of Taiwan'e ethylene, a key industrial raw material

The industrial disruption may well cause increased prob-lems for Taiwan's beleaguered stock market, whose index on Wednesday declined drastically for the 11th etraight day, because several of the affected companies are listed on the exchange. The closures, forced by resi-dents of the southern town of

Lin Yuan after they failed to reach agreement on compensa-tion with the companies, caused an emergency meeting yesterday afternoon of the Industrial Development Bureau which was attempting to find ways to bring the con-frontation to a speedy conclusion.

The protesters allege that the plants have seriously pol-luted fishponds and offshore fishing grounds with their waste water, and were demand-ing that the companies pay T\$2bn (£40.7m) in compensa-

CHINA'S leaders are having a tough time trying to impose a freeze on capital construction and bureaucratic wheeler-deal-ing. In the wake of soaring inflation, rampant corruption and a huge excess of building projects, the party Central Committee and State Council decided at a crisis meeting in September to clamp down with a series of controls such as checks on prices and capital The talks collapsed when the companies were unable to come up with that sum and residents prevented them from normal operations. One official estimated that checks on prices and capital

investment. But: provincial officials, siven their head under China's the closures will cost the companies several hundred million Taiwan dollars a day. The com-panies, most of which manu-facture nostream petrochemi-cal products, include two given their nead under comes s economic reform programme, may have already bolted too-far for Peking to pull them up. In the words of the old saying, Heaven is high and the government-owned naphtha Emperor is far away". Earlier this year Peking was totally unable to enforce its crackers, which provide about two-thirds of Taiwan's ethyl-ene output, the key ingredient in PVC which is a major com-ponent of many manufactured stude avanuated by Taiwan

planned restrictions on the economy. The banks' alloca-tion of credit for the whole year was completely used up in the first two months; but they carried ou issuing loans regardless. Industrial output and new construction in the first half of this year far exceeded planned targets.

Tough provincial bureaucrats may now feel sufficiently on top to nod obediently when Peking barks but then continue much as before.

The end-September edition of Liaowang, the well-informed Hong Kong communist maga-zine, pointed up this provincial sense of power and independence and reported jealous bat-. tles between provinces over natural resources and prodnatural resources and prod- ing in their own production, ucts. Shortages of cotton and which adds to the sense of eco-

silk - now bad enough to cause Chinese trade corpora-tions to renege on deals with foreigners - have, sparked small wars between the prov-

"Governments in some localities even send armed police and militiamen to guard the borders and prevent their silkworm coccons being trans-ported to other localities", said Liaowang. Units from Guang-dong province simply bought off the Sichuan silk dealers with huge commissions and crashed through the provincial check points with their forbid-den loads in army trucks.

Because of this free-for-all over commodities, provincial authorities are heavily invest-

nomic independence. Because the wool-producing province of Gansu has put up some 30 woolleu textile plants of its own, it can no longer supply the Guangdong mills. Conse-quently, Guangdong now plans to spend tens of billions of yuan over the next decade building its own chemical and synthetic fibre plants.

Many provinces and municipalities now run their own companies in Hong Kong, or even elsewhere abroad. Some are allowed to make joint venture deals with foreigners up to \$30m in value without refer-ence to Peking. All this enhances their own sense of power.

Local officials, Liaowang found, had "standardised and legalised" their separatist tive

behaviour. They claimed power throughout their jurisdictions over the economy and simply told the local Peking represen-

tatives to keep quiet and do what they were told. Premier Li Peng and his col-leagues in Peking will have a hard time trying to impose control, if only because the growing sense of independence is a natural result of the reform. So far, since the Sep-tember Central Committee meeting, the ruling State Coun-

eff has issued circulars on tax and price inspection, which are and price inspection, which are aimed at speculation and embezziement, and on check-ing all investment projects to try to cut out the excess. But there is no reason to think that these measures will be effec-

"Orders must be obeyed and prohibitions observed," Pre-mier Li Peng said in a National Day party speech at the end of September. "No department, locality or unit may pursue its own narrow interests at the expense of the overall interests of the people." Fine words, but China these days is more into making a quick buck than self-sacrifice.

-5

This is nowhere more evident than in the companies run on the side by bureaucrats, an important target of the lead-ership's current coutrols because of their huge speculative activities. Peking forbade these several years ago because of the corruption involved, but they continue to flourish.

Saharawis refugees now living in camps south of Tindouf return in the event of a refer-endum which favours Morocco.

The King has declared that what counts for him is "the

# Polisario weighs up war and compromise with Hassan

Supporters of a deal with Morocco contend with the temptation to use force, reports Francis Ghilès

ponent of many manufactured goods exported by Taiwan. Local press reports put the number of complainants at 20,000. The reports say that the residents rejected a counter-of-fer of more than T\$700m from the companies and blockaded the plants' entrances. The Taipel weighted index closed at 6,732 points yesterday on volume of only T\$540m - a far cry from its high of almost 8,800 points reached on Sep-tember 24, the day that the Government announced the N FRIDAY September 15, one of the fiercest North African battles in years took place around the Oum Draiga section of the. 1,000 mile wall which sur-rounds the Moroccan held section of the Western Sahara.

Government announced the imposition of a capital gains tax and inadvertently triggered a panic on the exchange. The mood yesterday was one of tion of the Western Sahara. The Polisario, which has been fighting for 12 years for the independence of this for-mer Spanish colony, threw. 2,500 guerrillas, two motorised light infantry battalions and one mechanised infantry bat-talion against the Moroccan defences. More than 250 Moroc-can soldiers and Polisario gue. gloom and doom as the panic

can soldiers and Polisario gne-rrillas were killed or wounded and The Forces Armées Roy-ales lost Colonel Abdesalam El Abidi, one of King Hassan's most experienced field com-

manders. That such a battle should occur less than three weeks fter a United Nations peace plan was accepted condition-

ing down. Such a pessimistic reading was reinforced by the flerce enchange between Algeria and Morocco which had taken place, earlier in September, in Nicosia, at a meeting of non-aligned foreign ministers. There was a feeling among certain diplomatic observers that

King Hassan of Morocco was not prepared to grant the kind of autonomy needed to draw Polisario into giving up its campaign for an independent Western Sahara. Othars however are less pes-simistic. They argue that as

simistic. They argue that as the two parties get down to the nitty gritty of negotiation, there are bound to be clashes. Polisario's temptation to use force in the hope of winning further concessions from King Hassan must be strong. In par-ticular, the guerrillas would like to get the monarch to agree to direct and unblicly

. The temptation to use force could also be encouraged by some in the Algerian military high command, although last ak's bloody riots in Algeria will have weakened that country's diplomatic hand. Algeria has been Polisario's most stal-wart ally since 1975 but no one doubts the sincerity of Presi-dent Chadli Bendjedid in wish-

.

King Hassan: adamant over not negotiating with Polisario

indirectly involved. Such arguments all militate in favour of mise with Morocco is worth seeking. However Mr Brahim Ghali. a Polisario compromise with A ronsand compromise with Morocco. Another issue concerns King Hassan's willingness to grant a measure of autonomy to the "Saharan provinces" if and when the tens of thousands of

the man who for 13 years has been in charge of military operations, remains - a clear indication that Polisario is not

giving np the possibility of using military pressure The ascendancy of those who hope to find a compromise is uonetheless demonstrated by Polisario's acceptance that the Spanish census of 1974 should be accepted as the proper basis from which to prepare a referendum.

This meant Polisario discarding the argument about the tens of thousands of Sabarawis who had taken refuge in Morocco to avoid Spanish repression in the 1950s and 1960s. For that matter it would be impossible to register those Saharawis who for decades have lived in Algeria, Maure-tania, Mali and Niger, let alone enable them to vote.

**Considerations** of regional equilibrium also matter. Were the RASD to become independent, its first act would no doubt be to forge a federation with Mauritania, where the balance between the dominant northern Moors and the black population in the south, many of whom were, until recently, virtual slaves, is very fragile. Neighbouring Sénégai is sym-pathetic to its black brethren across the border and is thus

agree to direct and publicly acknowledged talks. Despite private meetings between both sides, the last of which took place in July, in the Saudi summer resort of Taef under the aegis of Mr Ali Ben Moussalem, the Saudi monarch's adviser on North African affairs, King Hassan has remained adamant his advisers will no negotiate directly with people the Moroccans have always branded as "mercenaries."

ing to find an bonourable solution to the conflict. Algeria would not have renewed diplo-matic links with Morocco last May had its leadership not reached a consensus on this noint point. This battle may also be the result of the divisions within the Polisarlo leadership about whether an accommodation

with the kingdom is desirable. In recent weeks, there have been two reshuffles of ministe-rial portfolios in the Government of the République Arabe Saharaouie Democratique

(RASD), which is recognised by 71, mostly third world, coun-

tries. The position of people such as Mr Bachir Mustapha Sayed, Polisario's foreign affairs spe-cialist and key negotiator with the UN and Mr Mohamed Sidati, the new minister of for-eign affairs has been reinforced. They argue that Polisario has fought long and

hard to gain recognition for the notion of Saharawi, but accept that the likelihood of creating a new state is remote. There-fore an honourable compro-

# communications network for all your fleet.

The mobile

fleet at a much lower cost than cellular telephones.

There are no call charges with National One, just a fixed monthly subscription charge, no matter how many calls are made.

It is the breakthrough in cost effective mobile communications which businesses have been waiting for. As the country's first nationwide two-way net-

work, National One offers complete privacy, superb sound quality and immediate channel availability.

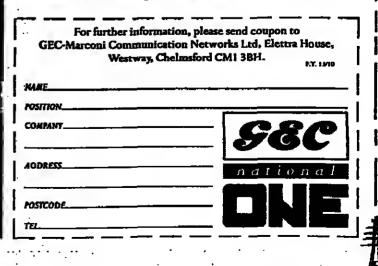

It is ideal for both large and small companies, as well as for individuals who need to keep in contact with their base.

Because if you operate any of those vehicles which are out of contact as soon as they're out of sight, it could transform the way you do business. For example, when an important customer wants urgent attention, or when your drivers need to say they're running late or are delayed for appointments.

In fact, every time that a quick word with a driver would save time, trouble and money, National One has the answer at the touch of a button.

Just send us the coupon, or call the operator day or night and ask for Freefone GEC-National for more information about National One, and for a list of the Service Providers who can tell you about the equipment which uses it.

It's the first free call that National One will give you. But not, we suspect, the last.

# negotiations with EC

COMECON, the Soviet-led state trading bloc, has egreed on eight major areas of co-opera-tion it wants to negotiate with the European Community, ranging from the environment to technical standards. However the 10-nation group

. . ..

. . .

However the 10-nation group appears to be in increasing dis-array over how to push for-ward the process of its own internal integration, with countries like Romania and East Germany resisting attempts to promote closer eco-nomic relations. was the subject of e wide-rang-ing debate without conclusion.

A meeting of Comecon's executive committee, involving the deputy prime ministers of the member states, agreed on the negotiating mandate with the EC in Moscow this week, but on little else. The East and West European

blocs have recognised each other only since last June, after the Soviet Union in particular dropped its long-stand-ing refusal to do so.

Comecon countries are increasingly concerned about EC plans for a barrier-free internal market by 1992, which could leave Comecon even more strictly excluded. Attempts to match the EC

Attempts to match the SC integration process have run into severe political differ-ences. This week, only seven of the 10 members agreed on a plan to set up a commercial bank to finance joint ventures,

but it will go ahead regarilless, Mr Stefan Zawodzinski, e dep-uty secretary of Comecon, said in an interview. fields we shall find some com mon language. At every step we shall stress the need for mutual advantage. We do not There was also a difference of opinion over how to intro-duce e convertible rouble within the organisation, which want to take anything free of charge.'

charge." He said that in each area, Connecon would prefer to deal with e limited range of specific subjects - such as preventing acid rain in the servironmental field - rather than broad gener-alities, in the hope of reaching mactical agreements Another controversial move is an instruction to Comecon's

two existing banks - the Inter-national Investment Bank and Economic Co-operation Bank -to review their finances, and anties, in the nope of reaching practical agreements. Possibly the most important area of all would be technical standards, and the desire of Comecon to be included in setpropose moves to cut losses, such as increased interest rates ting standards likely to deter-mine any future entry into a single European market. on loans to member states. Mr Zawodzinski, the deputy secretary responsible for exter-nal relations, said Comecon

He admitted that the meetwill be proposing eight areas for co-operation in its negotiaing had seen a wide range of opinions. Three member states, which he would not identify, refused to go along with the plan for e joint venture bank, tions with the EC, with a first round of talks expected in Brussels next month. They are environmental pro-

On the question of the con-vertible rouble, he added that all 10 members agreed on the long-term aim, but did not surge on how to get there tection, transport, technical standards, science and technol-ogy, energy, N-power, statistics agree on how to get there.

and economic forecasting. The Communist bloc has avoided proposing any overtly trade question for the talks, in the knowledge that the EC As for the requirement for the existing Comecon banks to pay their way "to act like banks", Mr Zawodzinski admitinsists such issues can only be negotiated bilaterally with ted that any proposal to raise their very nominal interest rates would cause problems for individual Comecon members. "Ws are being pragmetic," Mr Zawodzinski said. "It seems the poorest borrowers, like Vietnam, and Cuba. to me that in all these different

# Peking in \$400m mill venture

CHINA and the Soviet Union are preparing their first major joint venture, a pulp mill, involving an investment of \$400m to be shared equally, the official China Economic News Service said, Renter reports from Peking. The mill, in Heilongjiang in

north-east China, will have an annual output of 250,000 tonnes of bleached sulphate soft pulp, mostly for sale within China and the rest for export to bal-ance its foreign exchange accounts.

The Soviet Union will supply 1.5m cubic metres of timber a year, mostly hard pine, and year, mostly hard pine, and China will provide coal, salt, electricity, oll and other mate-rials. The Soviet side will sup-ply pulp-making equipment and technology. Advanced equipment that neither coun-try can provide will be imported. Construction of the mill is due to begin to 1990 and mill is due to begin in 1990 and

The New China News Agency has also reported that a five-member delegation from

the Bank of China is visiting the Soviet Union to sign two agreements covering co-opera-tion in banking and settling of In the early part of the decade, the world was produc-ing too much ethylene, but accounts in barter trade. #### **WORLD TRADE NEWS**

# Shortfall sparks US about-face on ethylene

Peter Marsh explains why US industry is turning to imports

IKE shipping coals to Newcastle, was one chemicals industry con-sultant's description of the US decision to start importing the commodity chemical ethylene.

Imports of the material, one of the basic feedstocks of the chemicals business with world sales of about \$35hn a year, are which in normal year, are which in normal years pro-duces all the ethylene it needs from its own oil and natural <u>835</u>.

cals in many countries and the fact that, since the world reces-

sion at the beginning of the 1980s, many big chemicals con-cerns have been slow to rein-

vest in new plants that could

a terminal on the Houston Ship Canal in Texas which will take

loads of ethylene from ships

and transport them into a pipe-line linking many big US chemicals plants on the Gulf

nies aim to ship into the US no

more than about 100,000 tonnes

of ethylene a year - a small amount given that one ethyl-

ene plant can produce five times this quantity and that annual US consumption of eth-

ylene is running at about '16m

The psychological effect of shipments is likely to be sub-stantial, however, according to

Mr Darryl Anbrey, an industry analyst at Chem Systems, a chemicals consultancy in Tar-

rytown, New York. "Encon and

Coast

tonnes

Chevron are telling their cus-tomers (for ethylene) that they are doing something about improving the supply prob-lems," he says.

One important question, however, is where the ethylene imports are going to come While the US has been exper-

iencing shortages of the mate-rial, much the same is true of rial, much the same is true of other parts of the world. "There is no surplus of ethyl-ene at the moment," says Mr Robert Muller, a chemicals expert at SRI International, a California-based consultancy. 1988 is, however, by no means normal for producers

material for thousands of chemicals products including many basic plastics such as polystyrene and polyethylene. Many observers expect the new terminal will largely ship in ethylene from Exxon's European chemicals complexes. But Exton's two biggest ethylene plants in Europe - at Moss-morran in Scotland and in Nor-mandy, France - are already running flat out to meet local

#### Logistics

Other producers of ethylene which might have some material to spare over the next few years include Brazil, Saudi Arabia, Mexico and Japan. Libya is e big exporter of etbyl-ene – which it sells mainly to Europe – but shipments to the US are unlikely on political ground

The sheer logistics of trans-porting the substance around the world also presents a prob-. lem. At normal temperatures, ethyleve is a highly inflamma-

When it is shipped, if has to be cooled to below its boiling point of -104, deg C. This requires the use of special vessels fitted with low-tempera-

ture cooling systems. In Europe, ethylene is rou-tinely transported by ship for relatively short journeys. But observers think it would be a different matter to transport hazardous cargo thousand

defence hinder

By Peter Riddell, Political Editor, in Brighton

THE DEFENCE budget and the

future level of child benefit

have emerged as the most diffi-

cult obstacles to reaching

agreement of next year's public

This follows progress in intensive talks held at Brigh-ton this week between Mr John Major, Chief Secretary to the

Treasury, and other ministers

attending the Conservative Party conference. Overall, the difficulties have

been narrowed down to

defence, health, transport, and the child benefit aspects of

social security. Mr George Younger, Defence Secretary, is pressing for a sub-

stantial increase in defence

spending above existing plans to maintain the policy of order-ing at least three new frigates

a year, and to purchase new equipment for the army, espe-

cially a new range of tanks. On child benefit, Social Secu-rity ministers are furious with the Treasury's insistence that child benefits should be frozen

at £7.25 a week per child for

the second year running. This

would save nearly £130m a

The Department of Social Security is seeking to increase child benefit only in line with

expenditure plans.

The conference gave

"Shame" when he said narliament had voted against the death penalty. He agreed the issue would continue to arouse strong opinions, but insisted that capital punishment could never be the answer to all crimes of violence in general.

Explaining the need for "active citizenship", he said that increasing police man-power and penalties would not be enough if the steady flow of new criminals from schools and homes continued.

"The challenge of the 1990s is to rekindle our nation's strong tradition of citizenship. What we have to do is grub up the roots of crime and that is

the way to do it. "The game of dodging responsibility, the game of passing the parcel from one

ence on the young.

ply does not stick."

# The Banker in Berlin

The Banker, the monthly Financial Times magazine for all bankers, financiers and corporate treasurers. reports on the World Bank and IMF Meeting in this month's issue.

With the Group of Seven industrialised nations meeting in West Berlin for the IMF and World Bank annual meeting, no western country is likely to rock the boat with the exception of, perhaps, France.

The US presidential elections are too close at hand. Foreign exchange management is likely to be top of the agenda rather than vital issues such as debt crisis and bank regulation - the US will be calling the shots.

Whatever is decided, it certainly will not be in the communique.

BUT THERE IS ALSO A CHANCE OF BERLIN FANTASY.

-What is it and might it happen? Find out in the October issue of The Banker

Jaguar is also making increasing inroads into over-seas markets, led by Japan, where sales have more then doubled to 778 mits in the first doubled to 778 units in the first nine months in line with reach-

### House purchase loans reach £43.4bn peak By Simon Holberton, Economics Staff

THE STRENGTH of demand for housing finance during the -: :x :==== summer was yesterday under-lined by official figures which showed that UK and foreign banks lent a record £43.4bn for banks lent a record £43.40m for house purchases in the three months to the end of August. The Bank of England figures-showed that lending for hous-

showed that lending for hous-ing was 37 per cent higher dur-ing that quarter than for the same period a year ago and 85 per cent higher than for the - August there have been signs March to May period. ..... of a slower borrowing pace.

Economics Staff JAGUAR, the UK havery car ing the company target for maker, increased its worldwide sales of more than 1,000 cars in

Sales in the US, which account for 40 per cent of the total, have dropped by 8.7 per

THE FIVE pound note in your pocket is on the decline - and that's official. From 1990 the £5 note will look just 53 per cent of what it used to be, the Bank of England said yesterday. The £10, £20 and 250 notes will also shrink. cent in the first nine months to 14,913 cars from 16,340 a year ago, but Jaguar said yesterday that there were now positive signs that the trend of felling sales in the US had been also shrink. Collectors of bank notes - for their historic, rather

than monstary, value - with an affection for the current Series D range have limited The introduction of new models for the 1989 US model year had "produced a boost in order intake at dealer level time to amess prize specimens. The Bank says the growing use of high denomination order intake at dealer level which provides some evidence of an increase to demand", said the company. It forecast that November US sales would be higher than a year ago. Jaguar claimed that it had outperformed most of its imported rivals without resort-ing to discounting and sales use of high denomination notes means smaller dimen-sions are more convenient. Britain has hig notes by inter-national standards and alim-line dimensions will cut pro-duction costs. "The bigger the note the

"The bigger the note the more trees you have to knock down," said an environmental-ly-conscious Bank official. The diminutive set, design-nated Series E, will be intro-duced in phases to replace the existing 20-year-old design. The 25 note will change first ing to discounting and sales incentives and that its US

stocks were lower than its competitors. BMW and Marcad-es-Benz had been "discounting savagely", said Jaguar. Production rose by 15 per cent in the first nine months to 40 982 units units and is another to

existing 20-year-old design. The 25 note will change first. Currently, the number of 25 notes in circulation totals 362m. The 210 note is more popular with about 610m. The official explanation for the early announcement is that it gives manufacturers and mean of note-handling. cent in the first nine months to 40,353 units and is expected to total 52,000-58,000 units for the year and at least 55,000 units in 1969 compared with 48,020 in 1967. Some 12 months ago Jag-uar had forecast production this year of 56,000 units and 60,000 in 1969, but these ambi-tions have been hit by the fall in US sales.

and users of note-handling equipment time to adjust.

Perhaps more importantly, it will ease the shock for a British public which is notari-ously conservative about cur-rency changes and has seen its bank notes contract roughly in line with the dominant in line with the demise of the

line with the demise of the Empire. Like car manufacturers, the Bank has a policy of con-stantly upgrading its notes. However Series E represents a complete new model. It is the fifth collection since Series A which ran from 1928-1962.

As with existing notes, the modified denominations will vary in size to help the blind. They will have an updated

portrait of the Queen on the front and the back of each denomination will show a por-trait of "an historical figure." So far no selection has been made from among Britain's grant by the selection of the selection made from a selection of the s great and worthy.

here were no cries of wild relief from Britain's police chiefs yesterday when they heard Mr Doughas Hurd, Home Secretary, announce a 1,100 increa in police manpower. They were looking for increases on a much bigger scale - and believe public opinion is behind them.

The three organisations which together represent all ranks of the police – the Asso-ciation of Chief Police Officers, the Police Superintendents Association and the Police Federation - have all given a warning to Mr Hurd that they face a manpower crisis. Calls from the police for

increased resources are far from new. Police strength has grown by more than 18,009 since 1979 and the calls have not abated. But a plea last week was

phrased in the language of cri-sis. Mr Roger Birch, chief con-stable of Sussex, speaking for the three organisations, said that the police part logities can that the police were losing con-trol of the streets and were beginning to lose lose public

The public is crying out for something we can no longer in trath deliver," he told the Home Secretary.

Police seek even further manpower additions, says Alan Pike

increases" later. Mr Birch's call to the Home Secretary was significant for its clarity in spelling out what the police believe is at stake if they do not get the resources - Britain's antire traditional concept of policing.

The image of the police which senior officers like best is of the traditional "bobby on the best" - the local officer the beat" - the local afficer who, simply by being there, raises public confidence and acts as a deterrant to crime and hooliganism. The image of themselves which the police like least is as a paramilitary force, dashing around by the vanload and wading in with rist area.

riot geer. Yet police chiefs believe it is the very absence of enough officers on the streets which is turning an increasing number of trivial incidents into violent confrontations.

One of the problems which the police face is the absence of any proveable link between

19.3

589

Fraud and

forgery

133

years. Yet the public percep tion is probably quite different because crimes of violence - on of the main areas of public concern - rose by 16.9 ver cent.

Pressure groups on the radi-cal Right, having made some progress in persuading the Home Office to move towards cautious experiments with pri-vate prisons, have turned their attention to the police. They are questioning why the ser-vice should be excluded from the drive for greater efficency which has swept through most of the public sector during the Thatcher years.

ciency. Civilianisation - a sort of police privatisation in which. non-operational tasks are taken over by cheaper civilian workers - in far advanced although sometimes with only qualified support.

A cartoon in the latest issue of Police, the Police Federation journal, shows an injured Home Office official being carried out of a courtroom in which a brawl is in progress. "Yes, it was our idea to get police officers off court duties, to deal with all this violence on the streets," the official comments.

Police officers fear that calls for greater efficiency might lead to an attempt to move to some form of policing-by-resuits, based on crime clear-up rates and similar measures. This, they say, could produce a much more selective and

aggressive form of policing In reality police forces already operate a type of policof the need to get to grips with the problem of the lazy police officer - once through their And the argument about

improving police efficiency quickly becomes circular. Much successful police work depends on making contacts and gathering information. This relies upon having suffi-cient personnel to do the job. Britain's police forces will, therefore, pause briefly to thesit by Hund for the incomes thank Mr Hurd for the increa in their numbers announced yesterday, before renewing calls for more of the same.

eauty is only skin deep, so the Saying goes. But as cosmetics companies increasingly pro-mote their prodocts on the

indeed, behind the latest develop-meets he layer upoo layer of definition and legal interpretation that go to the heart of one of the fastest growing parts of the cosmetics industry of the cosmetics industry. In the US, the Food and Drug Admin

istration (FDA), which is responsible for licensing drugs, is locked in battle with the blue chip cosmetics companies over the claims those companies make for some of their products. The FDA believes that many of the claims are unjustifiable and has told 23 companies that they have to change their labelling

and advertising. One cosmetics company, Estée Lau-der, has decided to retaliate by filing a suit in the Federal District Court in Washington DC. The company has asked the court to make an independent judgment about whether or not its labelling and advertising claims are fair, calling the FDA's decision "arbi-

trary and capricious". The clash of opinions centres on the expensive creams which cosmetic companies claim have anti-ageing proper-ties. Assertions made about the products include that they:

• increase oxygen consumption by skin cells;

make cancer cells proliferate as well. One of the most outspoken lobbyists for the licensing of certain anti-ageing cosmetics is Malcolm Greaves, profes-sor of dermatology at St Thomas's Hos-pital, London. "I suspect a small per-centage of these performance cosmetics, probably around 10 per cent, may give rise for concern, whereas in 90 per cent skin cells; • speed up the repair of DNA, the genetic building block molecule; • stimulate the growth of skin cells; and the connective tissue in the cells; • replenish matrix proteins, such as collagen, which form the skeleton and the framework of the skin.

The FDA says that these can amount to medical claims, which may mean that some of the products should be problem is we just don't know." Like the FDA, Greaves believes that take the rDA, Greaves believes that if the products affect the structure of the skin, they are drugs. If not, their advertising should be changed. Two controversial ingredients of many anti-ageing creams are liposomes

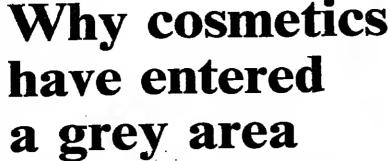

licensed as drugs. At the centre of the argument is a small but lucrative part of the cosmet-ics business. Estée Lauder estimates, for example, that \$100m worth of its annual business in the US alone is under threat because of the FDA ruling.

and niceomes. They wrap themselves around the active substances in the creams to make it easier for those con-The market for anti-ageing products is one of the fastest growing areas of the cosmetics business. This is fed by the increasing number of older consumstituents to penetrate the skin. Liposomes and niosomes are also ers with greater disposable income than hitherto, and by the trend for men as well as women to be drawn on to the being investigated by pharmaceutical companies as a way of transporting drugs into the body. In the US in partic-ular, millions of dollars have been anti-ageing bandwagon. invested in research by drug companies on the use of the two substances for

It was the introduction of an anti-age-ing product, called Glycel, that sparked off the dispute between the FDA and the American companies, in April of last year. Glycel was endorsed by Dr Christiaan Barnard, the former heart transplant surgeon

When the FDA began to look into the medical claims made by the manufac-turers of Glycel, it discovered that many established cosmetics companies were making similar statements. It wrote to 23 companies telling them to

review their advertising. Most have made minor changes, but the FDA says that it is still not satisfied with the progress. Hanging over the heads of the cosmetics companies is the threat that if they do not toe the line, the FDA will seize their products.

healthy cells proliferate, they may make cancer cells proliferate as well.

rise for concern, whereas in 90 per cent of the cases companies are just making wild claims in their advertising. The

transdermal drug application. The Advertising Standards Anthority (ASA) in the UK asked its team of der-

matologists to look at the liposome pro-cess to determine its effect. It concluded

that cosmetics incorporating liposomes

and nicesomes do allow substances to penetrate the skin and therefore have an ameliorating effect on superficial lines. As a result, the ASA has given a

number of companies the go-ahead to claim in advertisements that the creams do help to eliminate wrinkles.

Ian Kelloway, Professor of Pharma-

centics at the University of Wales, says that the liposomes in themselves are not harmful; it is the substances that

**Della Bradshaw** examines the implications of a debate about sophisticated creams

In Europe, although the debate has beec more low key, the argumeot fall between a cosmetic and a drug? The UK Department of Trade and Industry (DTD) has begun to investigate certain products which are said to regenerate cell growth through the inclusion of extracts of spleen. Accord-ing the argumeot the products themselves use to regenerate cell growth through the inclusion of extracts of spleen. Accord-ing the argumeot the products which are said to the argumeot the products which are said to the spleen. Accord-the the argumeot the products fall between a cosmetic and a drug? The UK Department of Trade and Industry (DTI) has begun to investigate certain products which are said to regenerate cell growth through the inclusion of extracts of spleen. Accord-ing to a spokesman, the DTI is con-cerned that if the products make healthy cells proliferate they may turiser.

. . . . . . .

Companies refute this argument by

Companies refute this argument by saying that the proof of the creams is in the using. "The product speaks for itself," says a spokeswoman for Christian Dior of the company's anti-ageing cream, Capture, which has been on the market for two years, "It was intensively researched by the Pasteur Institute, and people who have used Capture continue to buy it." The product accounts for nine per cent The product accounts for nine per cent of Dior's beanty business, which includes perfumes and make-up. A new preparatioo, called Retin-A, has served to blur further the distinc-

has served to blur further the distinc-tion between a prescription drug and cosmetic creams. It was developed in the US by Johnson & Johnson as a treatment for acne, but is now being heralded as an anti-ageing cream. In both the US and the European Commu-nity, Retin-A has been categorised as a prescription only drug

nity, Retin-A has been categorised as a prescription only drug. Cilag, a UK subsidiary of Johnson & Johnson, is planning to ask the UK Government to extend the use of the preparation to cover two skin com-plaints caused by high exposure to ultra-violet radiation. Kenneth Watters, medical director of Cilag, believes that Retin-A needs to be prescribed follow-ing medical diagnosis to ensure that the skin damage does not represent an early form of cancer. Retin-A is a synthetic analogue of

Retin A is a synthetic analogue of vitamin A, specially developed so that it can be absorbed through the skin. With that in mind, Greaves believes that questions should be asked about cosmetic creams that contain vitamin A.

Marion Kelly, director general of the Cosmetic, Toiletry and Perfumery Asso-ciation in the UK, says that the issue has been exaggerated. "If you rub coll liver oil cream on your face that will contain vitamin A, in itself vitamin A is not used as a treatment, but cosmetic not harmful; it is the substances that companies are free to put it in their they transport into the skin which products, as they are with vitamin E."

The young look that anti-ageing ms try to recapture cred

She believes that the advertising argument has arisen because there is a far tighter regulatory framework for drug licensing in the US. "In the US, some dandruff shampoos, sunscreens and toothpastes have to be licensed as over-the-counter drugs," she says. Nevertheless, cosmetics companies

are rightly nervous about their prod-acts being classified as drugs. Dior says that it took seven years of research and collaborative studies between its laboratories and tha Pasteur Institute to

develop Capture. But it can take up to 13 years to get a new drug on to the market in the UK. The longest stretch is the six to eight year clinical development phase, when a controlled number of patients are treated with the drug.

In the US, the timescales are even more protracted and there is no mutual recognition of drug approvals between countries - every new drug has to be tested in each one.

Even in the EC, where a procedure has been set up for mutual recognition, member states remain reluctant to accept the results of tests in other countries. There is now an effort to set up a central authority for drug approval in

Europe And if the anti-ageing creams were licensed as drugs, the main outlets for them would be chemist's shops, rather than the up-market department stores where most of the creams are sold today.

# A venturesome way to keep a product rolling

Terry Dodsworth explains why ICL hived off a division

next cluster. Other applica-tions where the machine is reckoned to do well are in screen simulation and sorting

Second, advances in semi-

So how could ICL both pull out of direct involvement and maintain a financial interest in a technology which had been absorbing funds for the best part of 10 years? The answer, hit upon by David Dace, head of collaborative activities, was to hive it off into a venture capital start-up in which ICL maintained an interest. maintained an interest.

Second, anymices in semi-conductor technology had opened up the prospect of large savings in production costs. Chip prices had tumbled, which meant that specialised machines could be sold at a here that would command a level that would command a As more power was packed on to smaller semiconductors, it became possible to shrink-the machine to the size of a small filing cabinet. This could be attached to an off-the-shelf minicomputer or workstation. DAP has been designed for connection to either Sun workconnection to entries Sain work-stations or Digital Equipment Vax machines. "This was a case where the technology had caught up with the design. The economics had come right," says Pearce.

and AMT's management. This group then put, up fresh devel-opment capital for the reincar-nated company - an initial sum of 54.2m followed this year by a further 54.8m. What persuaded the invest-ment group that the gamble was worth taking? The risks had been well drummed in by the difficulties or failures of several British computer start-ups from Auricot to Sinclair Within a year of its launch in October 1986, the group was ready to deliver its first com-puters. It has sold 19, priced at about £100,000 each, on both sides of the Atlantic, breaking into several of its target marups, from Apricot to Sinclair and Acorn. Indeed, Nell Pearce, investment manager at Advent, says that his initial reaction was "no way" would kets such as universities, the US defence sector, Government laboratories and high technology industry. It has just he support the company. But unched a second, more powerful £250,000 machine. after several months of looking at the figures he changed his mind.

erful £250,000 machine. "We are running on target," says Geoff Manning, the chair-man. "We should be making money by next year or in the final quarter of this year." The rapidity of AMT's expan-sion owes a great deal to a decision to develop the com-nany from the start as an First, he became convinced that there was a substantial and potentially profitable mar-ket for the machine, if it could be produced at the right cost. By the early 1980s, a number of the original versions of the pany from the start as an Angle-American organisation, computer had been sold. A variety of software had already been designed and customers

Terry Dodsworth explains why ICL hived off a division W hen the ICL com-puter group was shifting its business focus to concentrate on the office systems sector, it hit on the problem of what to do with its parallel processing division. This part of the UK company-had developed a computer, known as DAP (distributed array processor), which was capable of working very rap-idly on specific problems. But the technology needed further development; and ICL had development; and ICL had development; and ICL had decided that the scientific and the profiles. DAP was aimed were not among its priorities. Down entities the profiles working were not among its priorities. DAP was aimed were not

opment centres, one at Acading in Berkshire and the other at Irvine, California. Manning, a former director of the UK Government's Ruth-erford Appleton Laboratory, concedes that there are prob-lems in running such a com-pany, but says these are easily outweighed by the advantages. AMT's US roots increase its acceptability to indigenous customers, who are more attuned to dealing with Ameri-can start-ups than British ones. Another advantage is that US component suppliers deal more readily with new venture capi-tal outfits than their British counterparts do; and AMT has easier access to semiconductor technology in the US, where it technology in the US, where it designed its custom-made chips and manufactures its

On the other hand, the group has been able to draw on the UK's strength in software

AMT's next challenge is to show that it can achieve enough orders to generate the returns expected by the ven-ture capital group. It has some way to go on this score, given the targets typically set by investment gronps - some-thing like a three to five times sain on their capital over a gain on their capital over a

gain on their capital over a five-year period. Nevertheless, Dace is con-vinced that he made the right decision in seeking a radical approach to the development of ICL's parallel processing technology. ICL has saved itself development cash - the com that has been such in 19m that has been sunk in AMT - maintained an interest that could yield a healthy return and brought the DAP machine to market in a way that would not have been possible within the larger group.

"I have been extremely impressed by the commitment of the management and the speed with which a small organisation can move," he says, "There is no doubt that you can do things like this in a start-up environment better

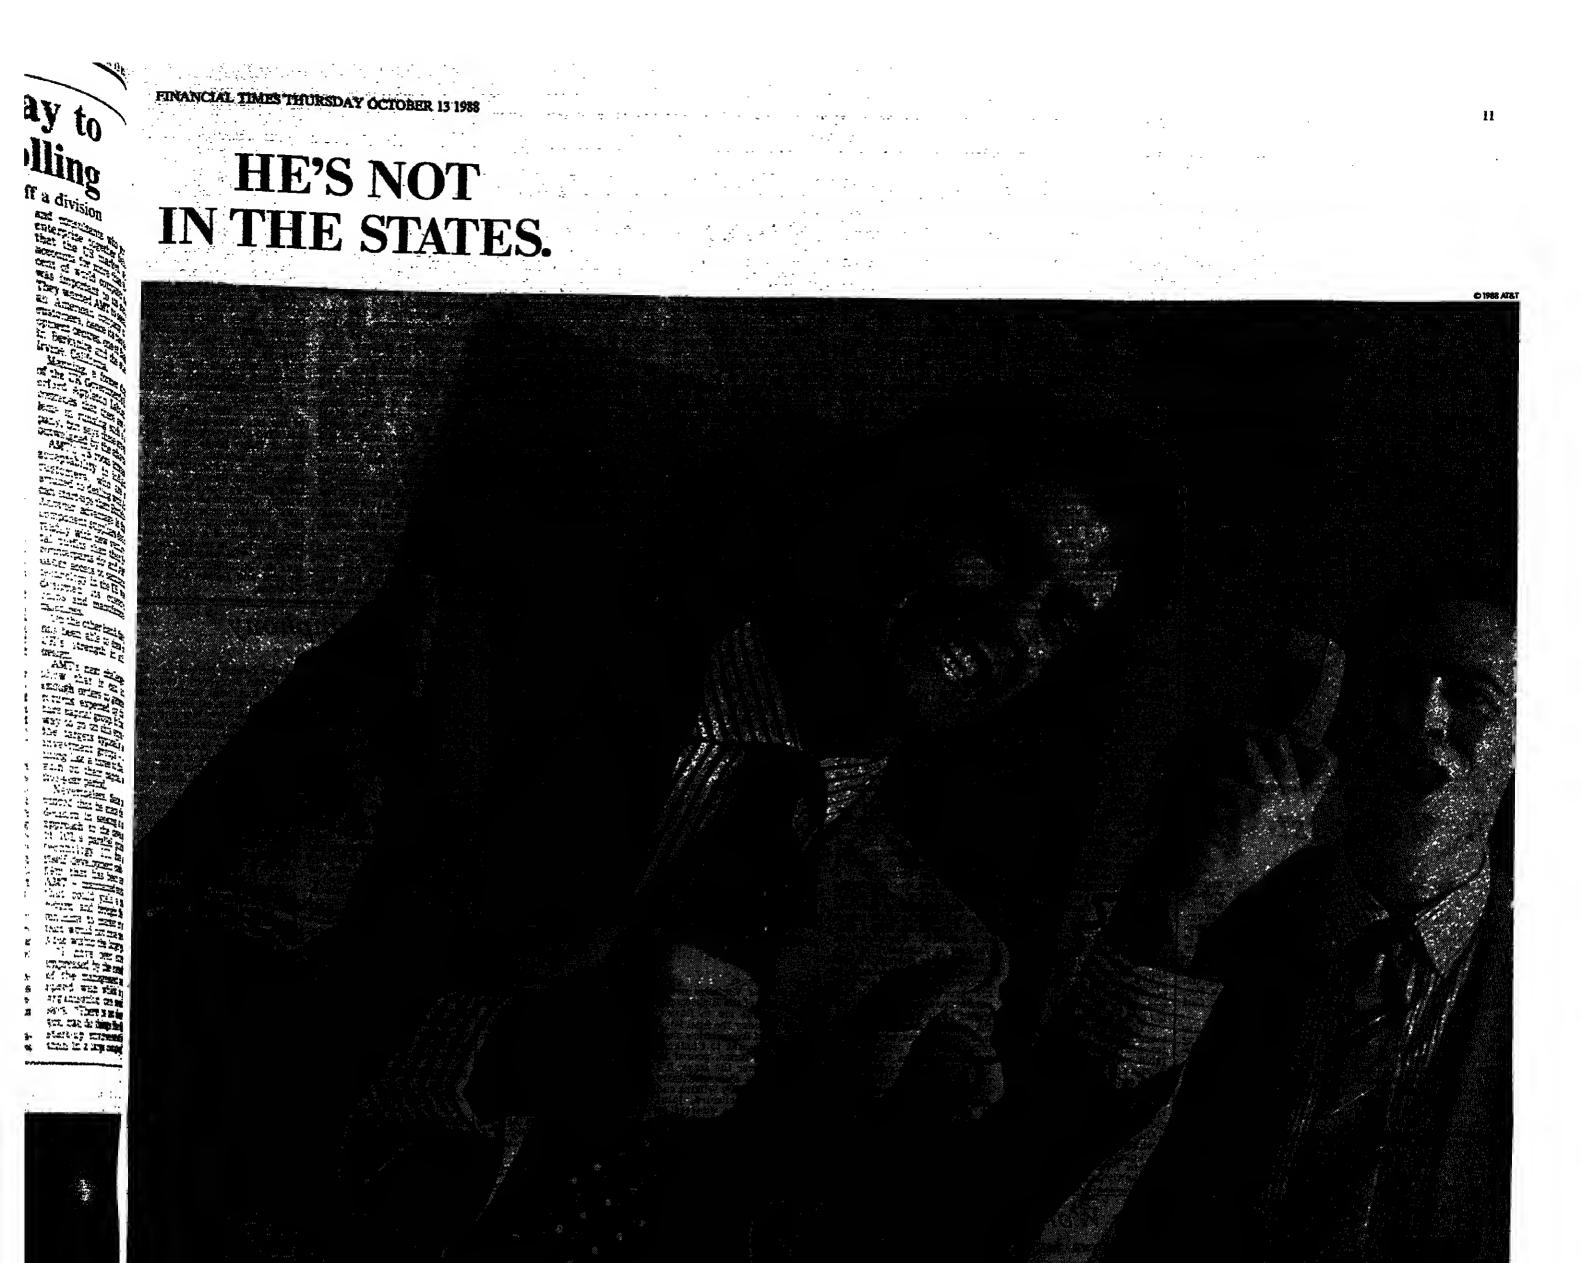

The close-knit group of ven-ture capitalists, ICL executives than in a large company." ... د داکله استان در باینه سرویی داشت. در این میبارد از در این میبارد در این در این در این میبارد در این در

lax von Sydow and Rudi Davies in The Tempest

# The Tempest

#### OLD VIC

We have had a storm of Tempests this year, Michael Bryant and Peter Hall bidding adieu with a bitter re-run of Renaissance spectacle at the National, Ninagawa's Japanese Prospero conjuring a Noh floor show in the South Pacific, and John Wood throwing a post-Modernist party like some age-less Michael Tippett at Stratford-upon-Avon.

It is a tribute to this play's inexhanstible power and beauty thet Jonathan Miller's chaste colonial version at the Old Vic comes across as the freshest interpretation of the lot, though it yields in excite-

ment quota to the RSC's. Miller's Prospero, Max von Sydow, seems a hit tongue-tied early on, relating history with halting indecision to the quiv-eringly neurasthenic Miranda of Rudi Davies. But he gathers strength to propose a magus suspended between the acquired magical practices of Caliban's mother, Sycorax, and the late Renaissance breakthroughs in science and astron-omy. Each third thought will

**Rudoloh** Walker is a marvel busiy resentful rapist, whereas the Ariel of Cyril Nri (a superbly tactful and accomplished performance) is a powdered invention who belongs to the populace of Papua New Guinean goddesses. These ladies, in grass skirt hustles and painted faces, turn the visionary masque into a Pur-cellian recital (music by Carl

Davis). The pursuant hounds are also masked islanders biding their time for the next variation of the imperial theme. After Prospero is released by our applause, Ariel assumes his broken staff and turns threateningly on Caliban. His freedom is another's oppres-

This articulates a deep meaning of *The Tempest* else-where expressed in the usurpa-tion, the bungled assassination and the lowlife antics of Trinculo and Stephano. As the first, Alexei Sayle is a bulletheaded stooge whose bemuse-ment hardens into Sconse iment (and a love

ing which explores the tradi-tional attitudes of the old bal-let, here renewed by Balanchine as homage to, and extension of, the academic manner at its purest. The theme is stated; ballerina and premier danseur become the centre of evolutions that

expose every shift of the music's formal patterns, with marvellous insight into the composer's ingenuities of scaring and structure. It is a noble work, originally made in 1947 for Ballet Theatre, where it was given memorable performance by Alicia Alonso and Igor Yonskevich; it later entered the New York

City repertory, where most recently Kyra Nichols and Merrill Ashley have been prodigious in it. On Tuesday night Miyako

Time Comparison 1988. Thirteen

painters, spanning three genera-tions, present the East German art scene in the 1980's. This exhi-

bition concentrates on figurative painting and portraits. Among the artists are Hampel, Heisig, Ebersbach, Tubke and Libuda.

Yoshida and Petter Jacobsson lived np to the finest traditions of their roles, with clean and excellently schooled support

with Marinetti in 1914, railed against "the old grotesque idea of genius" and "the mania for immortality." With this back-ground, Nevinson never man-aged to break through into a really personal painting style. "HURRAH for motors! HUR "HURRAH for motors' HUR-RAH for speed' HURRAH for lightning!" proclaimed the manifesto of 1914, in a rather school-boyish version of Mari-netti'a celebration of mechanis-tic dynamism (immediately repudiated by Wyndham Lewis and his fellow Vorticists). "The Arrival" 191214 is a listic experiments are clear, but curiously, not his colourful personality. Obsessed with self-promotion (probably imbibed from Marinetti, the arch-publicist), Nevinson lived the life of a celehrity, con-stantly writing and being writ-ten about in the popular press. Behind the scandal and noto-riety was a burgeoning perse-cution complex, which found malicious justification in his autobiography of 1937, "Paint

and his fellow Vorticists). "The Arrival" 1913-14, is a very accomplished futurist work, with multiple view points, and dashing use of diagonals and intersecting circ les. It was with the onset of war that Nevinson, ambulance driver to the Red Cross and later the RAMC, could put futurism to horrific use "Our Futurist technique is the only possible medium to express the crudeness, violence and brutal. autobiography of 1937, "Paint and Prejudice." Both cubism and futurism (in which he had dabbled) are intrinsically sup-pressive of personality. Indeed, Nevinson's Futurist Manifesto, "Vital English Art," published crudeness, violence and brutal-ity of . . .[the] battlefields of Europe." This was already very

with Marinetti in 1914, railed far away from Marinetti's glori-fication of war as "the world's Works such as "Returning to the Trenches" (in both painted and graphic versions) and "Column on the March" were

truly futurist in their expres-sion of movement and mechanistic soldiery, and received popular acclaim in an exhibi-tion in the autumn of 1916. But

#### Nevinson lived the life of a celebrity, constantly

tressed by the horrors of war, and after returning to the front as an official war artist to the Department of Information, his style changed. Nevinson's method was to make very minimal sketches, and to work mainly from mem-ory in the studio en returning from the front. He often pro-duced a worked-un drawing

dnced a worked-up drawing and a print as well as the

painted version, and they are hung together in this exhibi-tion for comparison. Unfortu-nately the labels do not supply information about the medium. It is the graphic expression, especially the bitter drypoint line and intense chiaroscuro, which most tellingly communi-cate the painful subject-matter. The paintings, with their care-ful build-up of smooth colour

in eartier work, or tentative, dull brush strokes in the later

war period, do not have the same impact.

-----

#### writing and being written about in the press

Nevinson had been deeply dis-tressed by the horrors of war,

same impact. In the two versions of "La Mitraileuse," the famous painting in the Tate which he later repudiated, it is the small chalk drawing which is more expressive; and the pastel "Boesinghe Farm" 1914-15 is as powerful as any of the larger paintings. In a curiously dis-

Miyako Yoshida and Peller Jacobsson

pessionate mood, he was able to see the beauty of "Flooded Trench on the Yser" in a dry-Trench on the Yser" in a dry-point which is reminiscent of a Japanese print. The intensity of the war graphics continues into the post-war mezzotints of city-scapes and the curlous paint-ing of "War Profiteers" which prefigures Edward Burra. The much reproduced lithograph "View from an Aeroplane,"

much reproduced lithograph "View from an Aeroplane," with its view of distant land-acape from under the wing, harks back to the stylistic devices of Futurism, as did some of the "Making Aircraft" series which he had done as official war artist. Futurism celebrated the "emperiority" of calebrated the "superiority" of aeroplanes, and Marinetti had proposed that a view from above broke "the old logical shackles and the plumb-lines of the old understanding." In New York, Nevinson applied this amalgam of cub-ism and "benevolent" futurism

to vibrant prints of the city, but his exhibition there was

not a success. This seems a misfortune of bad timing, as the city was very soon to be celebrated as the modern technological utopia by American artists such as Charles Sheeler artists such as Charles Sneeler (moving from abstraction to frozen realism). Nevinson's wonderful drypoint, "Looking through Brooklyn Bridge," 1920-22, builds up hazy depth and sharp foreground, within the sustaining abstraction of the suspension wires. Nevinson's views of London

in the late 1920s and 30s are in the late 1920s and 308 are contrived and overworked, nor do his many landscapes rise above the English mud. In a late, rather desperate series before World War II, he relo-cates guns, hayonets and flags within allegorical composi-tions, but the rhetoric is shrill and unconvincing. Neverthe and unconvincing. Neverthe-less, Nevinson is a significant British artist, in need of re-as-sessment. The exhibition will tour to Birmingham, South-ampton and Bolton City Art Galleries.

# Theme and Variations

#### HIPPODROME, BIRMINGHAM

The most honourable of amends has been made to George Balanchine by Sadler's Weils Royal Ballet. After years in which the Royal Ballet's pre-sentations of the Balanchine repartory have been either cursory or inept, SWRB's acquisi-tion of Theme and Variations is tion of Theme and Variations is handsome, alert, dazzling in style. Here is proof, at last, that British dancers can give Balanchinian jewels the right clarity and brilliancy. Theme and Variations is set to the last movement of Chai-kovsky's third orchestral suite. It is a cascade of classic danc-ing which explores the tradi-

staging has been well produced for Sadler's Wells Boyal Ballet by that NYCB alumna, Patricia Neary). Peter Farmer has devised an opulent setting of columns, draperies, chande-liers, to set off his frosted, silvery costnmes, but the real opulence hes in the dancing of Miss Yoshida, Mr Jacobsson

from the corps de ballet. (The

and their companions. Since she joined SWRB four years ago, Miyako Yoshida has been a quietly enchanting treasure, her every role full and since, her every role full and instrous in performance. With Theme she declares herself a ballering. She brings to it a dignity no less touching for its modesty, and a sweet assur-ance that isbours no technical point hut takes us to the bright core of the dance with a delicate authority. She shows us the fire at the heart of this choreographic diamond. Equal praise for Petter Jacobsson, a dancer of rare gifts - not least his grace of style, which results from a period of training in Leningrad. Youskevich, the greatest incumbent of the male role, displayed its fierce difficulties with princely case. So does Jacobsson, rejoicing, it seems, in the celebrated diagonal of ronds de jambe, and showing off the tremendous sequence of double aerial turns as if the orchestral sforzandi were the motor of the dance which, in a choreographic sense, they are. The ballet demands a distinguished bear-

by Mr Jacobsson. *Theme and Variation* needs the expanse of the Hippodrome if its patterns are to flower and on Tuesday the final Polonaise, one of Balanchine's most loving responses to Chaikovsky's dance forms, poured in splendour over the stage. It's progress was also excellently sheped by Ormsby Wilkins and the SWRB orchestra, joint heroes with the dancers in. making this staging so happily true to Balanchine. The evening also brought another welcome event, in lain

ing, elegant technical resource; these are effortlessly provide Webb's debut as Petrushka John Auld's fine version of

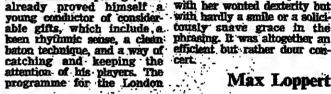

Fokin's masterpiece encourages serious and imaginative playing from its ensemble, and these were the distinguishing features in Mr Webh's vivid first sketch of the puppet. Here was a vulnerable Petrushka, was a vulnerable Petrushka, limbs fialling, powerless feel-ing suddenly bursting out in an hysterical response to events, angulah colouring every movement. The agonies of the death scare because a last heartrending cry against fate and told us that the role is Mr Webb's he is a fine dancer Mr Webh's; he is a fine dancer,

### Berlin Symphony

#### FESTIVAL HALL

The orchestra from East Berlin played in London on Tuesday, five days after the London concert by the orchestra from the other side of the Berlin Wall. Comparisons are always unhelpful, but in this case the piquancy of the juxtaposition, and of the political situation behind it, makes them (briefly) unavoidable. The Berlin Phil-hormonic holds define the harmonic helps define the world's highest standards of orchestral playing; the Berlin Symphony, under its current Principal Conductor Claus. Peter Flor, is a thoroughly workmanlike, firmly grounded band of middle rank, with no special features to commend in the corporate tone or ensem-ble, but also nothing to lament in the way of ontstanding weakt

native Czech orchestras, and some of the woodwind lines (notably those of the first clarinet) developed a distinct, and not always pleasing, edge. The Classical Symphony attained neatness but lacked wit. The Saint-Saëns soloist was Cécile Ousset, who delivered the vir-One had expected slightly more, since Mr Flor (who first came to notice in London as a Rafael Kubelik protegé) has already proved himself a tuoso thunder and sparklers young conductor of consider-able gifts, which include, a.

# Have you got what it takes to do a management buy-out?

Are you prepared to put them on the line?

FINANCIAL TIMES THURSDAY OCTOBER 13 1988

When you put everything on the line, you need someone to keep you on the straight and narrow.

How much is the company worth? How much does the vendor think it's worth?

Are you sure he wants to sell? How are you going to raise the money – and on what terms? Exactly the type of question we can help you answer:

Once we've advised on the fundamentals, we can help you with the details of your approach. Such as who you should have in your management team. How many people you really need.

Are they going to be able to cope with the pressures? Do they know what those pressures are? The middle of a buy-out is no time to find out who your friends really are.

And how are you going to broach the matter to the vendor?

If your car was taken away on the spot, would you know how to get home? 13

If the company's owner says 'no', what will you do? a) Crumble. b) Say you were just joking. c) Carry on.

If he proves unenthusiastic about your proposals you might find

yourself fired on the spot and minus your company car. Take heart. We can help ensure that you have a plan B, even if we can't help you get home.

When the negotiations begin, we'll be there at your side. While you keep your nerve, we'll be keeping an eye on the small print.

> We don't promise you the experience will be easy. But we can offer you the reassurance of some of the most expert advice around.

Who exactly are we? One of the top ten firms of chartered accountants, with a number of partners who specialise in management buy-outs.

Our expertise is considerable and our experience wide: in recent months we've masterminded successful buy-outs in fields as diverse as ship building, hotels, engineering, distribution and advertising.

If it is your ambition to run your own business, you have only this question to ask yourself.

Have you got what it takes to talk to us? The number to call is 01-353 3020. The person to ask for is James Broomfield.

8 St Bride Street, London EC4A 4DA. Telephone: 01-353 3020

One of your colleagues can't be relied on. Can you spot which one?

# The future of universities

MR KENNETH Baker, the UK Education secretary, muffed his first attempt at reforming universities. The 1988 Educa tion Reform Act is widely regarded as relying excessively on bureaucratic funding mech nisms. It will do little, if anything, to increase choice or efficiency in the sector. Mr Baker aware of the flaws in his legis lation, is now striving to for-mulate a strategy for higher education that does not directly contradict the philoso-phy of the Thatcher Govern-

Thns instead of seeking ways to impose further financial controls from the centre, ministers are now arguing that universities should be given direct incentives to respond to the needs of students. One touted mechanism would be to reduce block grants and oblige institutions to charge higher tuition fees. Universities would then be forced to compete for the "custom" of home students just as they now compete for fee-paying foreign students. Ministers are also assessing various schemes for replacing student maintenance grants by loans. In some formulations, the loans would be required to cover a portion of fees as well as maintenance.

#### Means to an end

The Government's belated willingness to consider radical changes in the funding and organisation of universities is to be welcomed. But a Mark 2 reform of higher education is unlikely to be more successful than the policies already enacted unless ministers first clarify their objectives. The wrong structure of fees and loans could wreak enormous damage. Such innovations are not to be regarded as desirable in themselves. They are a means to an end, which is the widening of access to higher education.

By the standards of most developed countries, Britain has an elitist and expensive system of higher education. The proportion of young people wbo enter universities and polytechnics is much lower than elsewhere. This partly reflects the severity of the secondary school examination system: Britain could not expand higher education to US levels 9 03 dents entering colleges could not pass British A levels. But the elitism also reflects the fact year-olds can pass is required.

tancy. One nurse, Herbert Hough, later described the scene as a policeman tried to break into a barricaded ward\*. "(He) just got his head nicely in a good position and Louie Burley, the charge nurse . . . . gave him an uppercut and hy remarkable timing, she knocked him out." As the nurses pay dispute with the British Government comes to a head this autumn, their long tradition of unrest is that those who do qualify for a university education are very heavily subsidised: no other country meets the costs of both tuition and maintenance. The cost structure of higher

Pay round year (August 1 to Joly 31)

month. Nurses' expectations were high after the initial publicity, and there has been anger among those who have found their own pay rises may be far below 15 per cent.

The issue has come to a head over the twin issues of responsibility for wards among sisters, and the supervision of nursing auxiliaries. Sisters who have shared control of wards have been angered by the Government's insistence that only one ward sister can be placed in a higher grading, "Band G". The others - some 7,000 sisters, according to the Government - will be placed in the lower Band F.

Lower down the scale, some nursing auxiliaries will be placed on the lowest Band A rather than Band B, depending on the extent to which they are considered to be under supervisión.

These issues remain unresolved. Mr Clarke has now said

implementing the award locally have found that the cost is higher than the estimated 15.3 per cent funding already allocated.

An example is the South Western Regional Health Authority, which was allocated a total of £37m this year to pay increases to its 23,000 nursing staff. Re-gradings by its 11 districts have in practice produced a total pay award of

151m, or 19.8 per cent. The dispute over ward sis-ters' gradings has enormous symbolism for the wider changes in the number, status and role of trained norses in the next decade. In some ways, the Government is trying to use the regrading as the first step towards changing the way

On six joint visits to hospitals both union and management negotiators found a numher of wards where the responsibility was shared

ogy of a ship's captain, and insists there can be only one. On the face of it, it seems curious that the Government is willing to risk the success of the pay award over 7,000 morses. But against the back-ground of what it is trying to do to cope with changes in the labour market over the next decade it becomes more under-

The essential problem is that it faces acute - and possibly critical - staff shortages in the NHS in the 1990s unless it can change the recruitment pat-terns and work of nurses. The sharp fall in the number of school leavers means it has litmerses by traditional means. so. Some of his predecessors had also recognised that there was a "hole in the centre". In The Government's emerging approach is to "widen the entry gate" into nursing take on more academically 1971, he set up the Central Pol-icy Review Staff - the Think nake on more academically unqualified people – and change the role of senior nurses. Under this vision, the highly qualified "nurse practi-tioner" would act as supervisor overseeing a growing pool of "nurse helpers." fill the hole.

# Accountability in Yugoslavia

IT IS NOT hard to see why the Yugoslav state, originally built on a fragile compromise, is now being shaken to its foundations by a surging wave of protest.

Three sources of discontent have merged to create a climate of violence and fear. One is the fall in living standards that followed the imposition in May, under International Mon-etary Fund (IMF) guidance, of a draconian austerity plan, and the progressive liberalisation of prices, imports and hard

currency supply. Another is the resurgence of nationalism in Serbia. Serbian leaders want greater control over the autonomous provinces of Kosovo and Vojvodina, on the grounds that Kosovo's eth-nic Albanian majority is perse-cuting local Serbs. Third, there is a sense of bitterness against old-guard politicians through-out the country, perceived as corrupt and incompetent. Mr. Slobodan Milosevic, the

Serbian Communist party leader, has exploited all three grievances. Over the past three monthe. perhaps 2m people have attended railies to back his bid for a more centralised Serbia. Last week, protests by his admirers toppied the lead-ership of Vojvodina. Though his strength will be tested at a key meeting of the Communist party's central committee on Monday, he has emerged as the

Monday, he has emerged as the first serious contender for the effective leadership of Yugo-slavia since the death eight years ago of Josip Broz Tito. Understandably, non-Serbs find this acutely alarming. They fear a decisive shift in the country's internal balance of nour in furour of the most of power in favour of the most populous republic. The lifelong efforts of Marshal Tito to avoid Serbian domination of Yugo-slavia would at least partially be reversed. Yet many who resent the Serbian leader's strident nationalism would agree with his assertion that the Yugoslav system is in desperate need of a fundamental overhaul.

The debt problems which forced the Belgrade Govern-ment to call in the IMF did not simply arise through bad luck. They reflected flaws in the

political structure. On paper this structure might seem an ingenious way of accommodat-ing within one state a patchwork of diverse peoples. Indeed the combination of political devolution (with wide-ranging powers vested in towns as well as republics) and economic

to write what could be the most interesting book so far about the Thatcher period.

as republics) and economic decentralisation (under which every enterprise is an indepen-dent, worker-managed co-oper-ative) looks ideal. Practice has proved other-wise. More and more Yugo-slavs have recognised the absence of one essential ingre-dient: accountability. Because Yugoslavia is a one-party state. Although it does not yet have a title or even a thesis, Hannah says that it will be about "How Yugoslavia is a one-party state, there is no satisfactory proce-dure for calling incompetent politicians, and failed recipes, has Mrs Thatcher done it?" Basically, he expects that it will be quite pro-the Prime Minister, though there will be negative factors: such as to order. Because there is no bankruptcy, there are no auto-matic penalties for financial education. Hannah, 42, was one of the first of the British corporate incompetence. Those problems exist historians and produced The Rise of the Corporate Economy

throughont the Communist world. What makes Yugoslavia unique is that because of its in 1976. He also wrote Electric-ity before Nationalisation, decentralised structure, the ill-effects of irresponsibly exer-cised power are endlessly reproduced, at local as well as national level. If there is one thing worre there are endlessly which is presumably now being studied by Cecil Parkin-son, the Energy Secretary. In the Thatcher book he says that he will not be simply mak-ing statistical comparisons handman level if there is one thing worse than a central bureaucracy, churning out unwieldy plans and imposing them on a reluctant economy, ing statistical comparisons either with other countries or with Britain's past perfor-mance. "No-one believes," he claims, perhaps with some exaggeration, "that a few years' growth makes all that much difference. The fact is that Britain had half or less than half the growth of the now OECD countries for 100 now OECD countries for 100

them on a reluctant economy, it is a myriad of provincial and municipal power-brokers with deeply vested interests in keep-ing alive their local enter-prises, however unsuccessful. Divided as they are over eth-nic questions, there is agree-ment between Mr Milosevic, many of the leaders of Croatia, and all the leaders of Slovenia, on the need for root-and-branch economic reform. All concur on the need to move towards a market economy, and to make enterprises genuand to make enterprises genu-inely independent by letting them raise equity capital

them raise equity capital The hope must be that Yugo-slavia's leaders will not lose sight of these goals in the maelstrom of ethnic conflict. Much will depend on whether the charisma of Mr Milosevic is channelled in the right direcand cannot be attributed directly to Thatcher. Hannah will spend 12 months writing the book at the London Business School. He will be succeeded at the LSE by Dr Terry Gourvish, tion: guiding his supporters through the path of economic npheaval, reining in their extremism, and avoiding bloodcurrently Dean of Economic and Social Studies at the University of East Anglia. Business history, it seems, has become something of a growth shed in Kosovo.

may seem sizeable enough in themselves. Since last April, when the Government accepted the nursing staff pay review body's recommended new clinical grading structure - at an estimated cost of £803m - a series of staff dis-contents and funding difficulties have emerged. The first set of problems has been over individual re-gradings, which are supposed to be in place by the end of this

The second set of problems facing him has been over the actual cost of the re-grading exercise. Many of the regional health authorities in charge of

that the award will be imple-mented despite the protests of between two sisters. The unions, and has refused their final appeals to meet him in Brighton this week, or to submit the issue to binding arbi-tration. "The time for talking is over," he said on Tuesday.

Professor Leslie Hannah is giving up the directorship of Business History Unit at the London School of Economics industry. Several other units are being set up elsewhere.

Poot retires

Anton Poot will depart as chairman and managing direc-tor of Philips UK at the end of next month, having reached the statutory retirement age of 60. Poot has been with Phil-ips in various parts of the world for his entire working life, and will now settle in Sur-

rey. He is, in fact, almost an hon-orary Englishman. In the 1950s he worked in South Africa and the old British colonies of Rho-desia and Nyasaland. In Britain he is a member of the CBI Council, Fellow of the CBI Council, Fellow of the Royal Society of Arts and Vice President of the Royal Televi-sion Society. A few weeks ago he became a director of the London Symphony Orchestra, and that is the sort of post that could now be showered upon him. He could also be of use, in a non-presidive canacity. in a non-executive capacity, to companies interested in Europe and 1992.

He will be succeeded as managing director at Phillips UK by C A M Busch, currently the finance director and vice chairman.

#### G for what?

ates going into industry or business the answer is "yes". But it started in the days of Harold Wilson and Tony Benn The game of musical chairs at the Central Electricity Generating Board appears to have left only one senior man with-out a secure seat. Derek Davies, the board member in charge of technical planning and research, is notably absent from the list of senior executives of the three private companies which will succeed the CEGB.

Davies has been given a job,

"It's the prospect of being able to vote the Coal Board out of office that excites me."

though one which ministers are anxious not to talk about just now. He will be in charge Just now he will be in charge of new Common Services Com-pany, which will group all the parts of the CEGB left over after the carve-up, including the CEGB's excellent but embarrassingly large R&D operation at Barnwood, Glou-certexplain in computier and

cestershire. Its computer and other central services cannot be sliced in two. It remains hard to see how two competing generating companies (Big G and Little G) can share com-mon services with the national grid company, which will be owned by their main custom-ers. However, Davies will have a year or two to sort that out. Otherwise, there are few sur-mises Senior commisses bet.

prises. Senior executives, bet-ter known for competence than colour, have been chosen in a Dutch auction between John a butth anthon between 300 Baker, chief executive of Big G, and Ed Wallis, head of Little G. Wallis picked a younger team, all, including himself

in their 40s. One reason the carve up has been accom-plished without screams is that everybody expects a healthy jump in salaries. Meanwhile, the Civil Service's best brains are working on what Big and Little G will be called.

#### Still squeezed

First the good news: the Central Line on the London Underground is to undergo a £720m. modernisation plan, as announced by Paul Channon, the Transport Secretary, at the Tory Party Conference on Tnesday. There will be a mod-ern automatic signalling sys-tem, together with 85 new trains and a general wash and brush up. The present trains are 30 years old and the signal-ling system was last updated in 1940.

Now the less good news: it will be eight years before the modernisation is completed and three years before the first and three years before the new of the new trains enters even limited passenger trials. The scheme will do nothing to reduce overcrowding. While the Transport Department says that capacity will be increased by 16 per cent, London Under-ground's own Plan for Action, published three weeks ago, estimates that peak damand will grow by 20 per cent by 1997.

London Underground is seeking permission to build several new lines to take the strain off the existing network, and presented its proposals to the Transport Secretary In the summer. Channon, how-ever, has postponed a decision; the cost would make the Central Line improvements look like petty cash.

Musique concrète Arts sponsorship is spread-ing to the third world and the communist bloc. According to the Times of India, the vielt of the Kirov Ballet of Leningrad to Bombay is sponsored by the Shree Vigvijay Cemient Company.

see them remposed at a burner by level..." Amen to that. But she spoiled the argument by finishing the sentence "... with a European super state exercising a new dominance from Brussels." She makes the same mistake as that of her such argument, the Commission her arch opponent, the Commission President Jacques Delors, in assuming that a European union must be

corporatist. These are different issues. Both cor-poratism and competitive market poli-cies can be pursued in a insular setcles can be pursued in a insular set-ting or under some degree of European mion. (Let us not inciden-tally get bogged down in a battle over what that union should be called. A federal United States of Europe has scant prospect of existing in the fore-seeable future, however much Mr Delors may wish it otherwise.) The Prime Minister's mistake is at

We have not rolled back the frontiers of the state in Britain only to see them reimposed at a European level'

two different levels - the tactical-po-litical and the fundamental. At the first level, Mrs Thatcher would be in a much better position to oppose har-monisation for harmonisation's sake, or provisions for union seats on comor provisions for under sees on com-pany boards, if she ware seen to accept without reservation and even with some cheerfulness the idea of a Europe without frontiers. She would stand a much better chance of leading the movement towards. European unity in a free market direction if she were in its front line - where her best friends would hardly place her now.

Since Harold Macmillan, successive British governments have been misssurprised that they have so little influence on its destination.

General De Gaulle, on the other

1 . . i .

station that the second

friend and foe alike by accepting the full obligations of the KEC long before the Rome Treaty required him to do. The bigger mistaka is to write off

neither the slating it received from the Euro-lobby nor the rapture from the wavers of the Union flag. Her written text at least was not anti-European. The Prime Minister dwalt foundly on Britain's historical mally presses for a lower degree of protection and subsidy than its mem-ber governments desire. The trouble is that when it is defeated, it still - prefers a Euro solution, however bad, to returning policy to member govern-ments - as would be desirable, for instance in agriculture. Where the Commission has actual

powers, as in the case of competition powers, as in the case of competition and industrial policy, they are exer-cised to promote market forces and cut back the sums that governments can put into supporting domestic industries. Lord Young has explained how it has limited the size of the parting handshake he can provide for Rover and has wowed to use EEC law

parting handshake he can provide for Rover and has vowed to use EEC law to impose similar limits on aid to the French motor industry. But the issue goes deeper. Ona aspect of Friedrich Hayek's Constitu-tion of Liberty, so admired by Mrs. Thatcher, is the need for constitu-tional constraints aven on elected governments. That need has been restated in an Institute of Economic restated in an Institute of Economic Affairs Paper, The Invisible Hand in Politics and Economics, by Norman Barry (IEA; £6.50).

The European Community is one of the few "rule of law" constraints on the actions of a government elected with a temporary phurality. Not even Mrs Thatcher will last for ever; and a time will come when her present fol-lowers will welcome such constraints, whether internal or external.

Meanwhile in her Bruges speech, Mrs Thatcher suggested four guiding principles for the Community: · Willing and active co-operation

between sovereign states; Tackle problems practically; Promote policies which remove

barriers and encourage enterprise; Europe should not be protectionist. One could spill a lot of ink debating the first principle: Europe des Patries versus supranationalism. But it would be pointless. Mrs. Thatcher's own sec-

ond point about a practical approach suggests that we do not become bog-ged down in arguments about the essence of the Community but try to improve it.

The internal market for 1992 was itself partly the result of a British initiative designed to shift attention away from proposals for political union. The Single European Act of 1985 provides for the establishment of this market by qualified majority vot-

ing within the Council of Ministers. There is much argument about which national laws are relevant for the purpose; and the Council would not be so foolish as to ride roughshod over any major member'a national interest.

The Prime Minister's warning. against protection is more important, despite her own mixed record on the issue. Its timeliness is highlighted by the Community's abuse of anti-dump-ing procedures to exclude a growing range of Japanese, US and Third World products

World products. The least surprising omission from Mrs Thatcher's speech, despite her emphasis on the already practical, was any mention whatever of the European Monetary System. Maybe she is being misled into hoging that the EMS will collapse when capital controls are ramoved - ahead of the full internal market - in 1990.

She would then be making just as great an error as those who supposed that the EMS itself would never start or the EEC before it. One extremely highly placed French authority, recently reminded me that France had already gone nearly all the way

to freeing currency movements across the frontier and that if there were any insurmountable strains, they would be showing already.

There are two aspects of a uni-fied market in 1982 capable of appealing to popular imagination. There is much argument about whether either is required by existing obligations. But if they were both accepted they would give a new wind

to the Community. One is the removal of customs posts, so that the physical barriers which have traditionally divided one European state from another can be seen to have been removed.

The second is dispensing with the on a journey from London to Munich as from London to Manchester. This cannot happen by 1992, but can at east be an aim.

On neither issue has the British Government shown imagination. The Chancellor is right to oppose the Commission's proposals to harmonise value added tax within stated hands. He argues that (as in the case of US really were a Thatcherite,

sales taxes) whatever harmonisation is required can be left to market forces and cross-border shopping.

British Vat rates are, however, comparatively low. On drink and tobacco where British rates are high, we are told that either frontier controls have to remain or that rates have to be

harmonised upwards. Perhaps realising that its fiscal case is not watertight, the British Govern-ment also advances anti-terrorist arguments for keeping border con-trols. But no one has explained why movements within the EEC at large need to be more strictly controlled than movements between the Repub-lic of Ireland and the UK at present. Nor why collaboration betwaen

Actively forces needs to be operated at the frontier. As for an eventual European cur-rency: there is no necessary connec-tion with full political federalism. The existing EMS is largely run by central banks and finance ministries; and a Gaullist Europe des Patries could still benefit from a single currency, just as sovereign states before World War I gained from the de facto international currency provided by the gold standard.

It is true that automatic fiscal transfers cushion some economic fluc-tuations within existing federations. and natiooalism. Virtually nobody disputes that Prime Minister Brian Mulroney'a trade deal will make Canada more prosperous. The quid pro quo, the opposition contends, is that the country's sover-eignty will be impugned to an unacceptable degree and - as argued by Mr Ed Broadbent'a New Democratic Party - that the rich will benefit at the expense of the poor. But such transfers are not a precondition of a common currency. Even if they cannot be obtained, it is difficult to see what an individual government gains from retaining the right to devalue. If it is really true that we cannot spend ourselves into prosper-ity, as Lord Callaghan has already told us, and the long-term effects of monetary policy are on the price level, then there would be no gain from retaining a national currency, so long as the European version is run

on a sound money basis. The present goal of the EMS is to make parity changes rarer and rarer. Once they have become a thing of the past, currencies will become increas-ingly accepted across frontiers as they already are in barden sources. slready are in border areas. Eventu-ally the difference between one European curreocy and another could approximate to the difference between English and Scottish pound notes. The national names can be changed when public opinion is ready.

More important will be the need for a European central banking institution to regulate the issue of the linked or unified currencies. The Bundes-bank has proposals designed to ensure that any new European unit is as strictly controlled as the German mark and by an euthority as indepenmark and by an authority as indepen-dent as the Bundeshank. This would be the British policy if Mrs Thatcher

By David Owen

leader.

"What is resented in Canada Mrs Thatcher must, after all, about annexation to the US is not annexation itself, but the be aware that the economic feeling that Canada nould dis-appear into a larger entity with-out having anything of real dis-tinctiveness to contribute to that integration of Europe will fea-ture far more prominently than at present for the average voter when her party seeks a entity." (Northrop Frye)

route to prosperity, she took several leaves out of fellow

Conservative Mr Mulroney's

free trade book. But in the weight which she accorded to

sovereign nationhood and the

importance of preserving national customs, traditions

and identities, she was dis-

fourth consecutive term in the early 1990s. By that time nationalism may have emerged The recent "Vision of Europe" speech by Mrs Margaret Thatcher, the British Prime as a fruitful vein for the opposition to tap - particularly if a Minister, was received with interest in Canada, another country grappling with the consequences of closer ecofew more corner-stones of corporate Britain succumb Rowntree-style to foreign takeover. Ultimately, however, nation-alism is unlikely to prove as nomic ties with its neighbours.

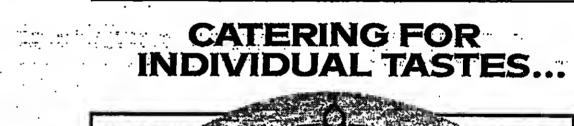

The theme is a mature one, having exercised the minds and passions of Canadians for powerful an argument against integration in Europe as it is in Canada. Language barriers and other cultural differences are deeply entrenched in Britain, France and West Germany. over 100 years. It is also topi-cal. The still unratified US-Canada free trade agreement is expected to make the question of increased North American economic integration the para-

France and West Germany. With the exception of Que-bec and the continent's surviv-ing native groups, distinctions are far less clear-cut in North America. To paraphrase Mr Jacques Delors, what divides those in Europe is more impor-tant than what divides those in North America. Moreover the differences economic integration the para-mount issue in the forthcom-ing general election campaign. The positions already staked out by the respective party leaders suggest that Canadians will be asked to make a choice between material well-being and nationalism. Virtually nobody disputes that Prime

Moreover, the differences which Canadians typically point to between their country and the US - no capital pun-ishment, better social services and the parliamentary system itself – are legislative rather than cultural. True pan-Cana-dian cultural distinctions – apart from ice hockey and the Mounties - are much harder to pinpoint.

This chronic Canadian identity crisis (allied to an under-standable warmess of a comexpense of the poor. It is hard to predict which of pact with an economy larger these two perennially sednotive appeals to the electorate – material well-being and nation-alism – will hold sway. Viewed from this perspec-tive, Mrs Thatcher's Bruges gracet avpears to be a yraby a factor of twelve) could paradoxically make a genuine free market between the two ostensibly similar cohabitants of the North American subspeech appears to be a pre-emptive attempt to hitch both potent forces to the Conserva-tive bandwagon. In her empha-sis on deregulation and the demolition of barriers as the continent more difficult to achieve than one between the dozen disparate nation states

of the EC. Individual European countries, less unequal in size and comparatively secure in their own national psyche, are likely eventually to conclude that the benefits of forging closer eco-nomic links with their neighbours on the whole outweigh the drawbacks. Canadians, by contrast, may cleave obdurately to every last inch of "sovereignty", equating its ero-sion with the gradual loss of tinctly reminiscent of Mr "sovereignty", equat Broadbent and Mr John sion with the gradu Turner, the Capadian Liberal their very identity.

Perils of inflation-proofing Messy misunderstanding

**LETTERS** 

From Mr R.B. Colbran. Sir, Mr Tomkins (Letters, October 5) asks for my views on the suggestion that all funded pensions should be matched by index-linked stock. There is an immediate prac-

tical difficulty. The amount of index-linked stock in issue is, very approximately, only enough to cover about 20 per cent of the required liability. Of course that would not stop any one pension fund from buying such stock at the present time. However, that fund still could not guarantee index-ing for all pensions because it would have no knowledge of either the terms or the availability of such stock at any time in the future.

could take on inflation-proof-ing for all funded pensions. Unfortunately it seems that an inevitable consequence of infla-tion is that some sectors of the Staple inn Hall, WCI

population gain and some lose. If more are protected the loss has to be concentrated on a smaller group. In practice, automatic inflation-proofing across the board just escalates the rate of inflation, as has been seen in those countries which have tried this route.

For these and other reasons, I believe pensioners must continue to rely on discretion to some extent for their increases. Nevertheless we are still hoping that, as a result of the cur-rent Occupational Pension Board inquiry, a way will be found to increase inflation pro-tection for pensioners. As to whether present

arrangements particularly suit the actuaries, I can only say A wider issue Mr Tomkins that, like all professionals, we raises is whether Government are employed by our clients and our clear duty is to operate in their best interests. R.B. Colbran,

From Mr Dennis R. Yeager. Sir, Lionel Barber ("Parched politics in Bubbaland," October cial state signs along the roads carrying the same message and announcing the fine for failure 1) shares a common misconcep-tion about the "Don't mass to comply. You may wonder why a New with Texas" bumper stickers.

Yorker knows so much about The "Don't mess with Texas" campaign has nothing to do with Texas chauvinism. It is a this. As everyone knows, New Yorkers think we know every thing. statewide campaign against lit-ter. Mr Barber probably would

### 'This particular doctrine should be attributed to others'

From Mr T. Congdon. Sir, Samuel Brittan's Eco-nomic Viewpoint ("The Burns doctrins: a closer look," Octo-ber 6) on the balance of pay-ments was, as usual, a very worthwhile contribution to the debets on according palicy. But debate on economic policy. But the attribution to Sir Terence Burns of the view that a pri-vate-sector payments deficit does not matter is surprising.

As far as I am aware, the first suggestion that a private-sector payments deficit was

not a policy problem was made by Professor Max Corden in a But Prof Corden's remarks were very brief. I decided to write them up properly and contributed an article, A new approach to the balance of pay-ments, to tha October 1982 issue of Lloyds Bank Review. lecture series in Chicago in 1976. It was published in the book based on the lectures, book based on the latter and inflation, Exchange Rates and the World Economy, in 1977. The key idea was clearly stated: "One should just assume for the purpose of dis-cussing balance-of-payments into that the minute sector

The article provoked much criticism. The Review received letters of protest from Profes-sor James Mende, Professor issues that the private sector knows what it is doing, and Anthony Thirlwall and Mr what is good for it, as far as its spending and savings decisions are concerned." Roger Bootle, and these were published, with my reply, in the April 1983 issue.

I am open to correction, but I believe that Sir Terence has not written anything specifically on the "new approach". He wrote widely about the balance of payments before his appointment as Chief Economic Adviser in 1979 and has undoubtedly been responsible for some excellent economic idees since, but this particular doctrine should be attributed to others.

Tim Congdon, 68 Alderney Street, SWI

### An awfully one-dimensional view of economic freedom

#### From Mr Doug Henwood,

Sir, It is surprising that a writer as thoughtful as Joe Rogaly ("As the conservative tide ebbs," September 10) should accept so uncritically should accept so uncritically the Hayek-Friedman line that "political freedom and eco-nomic freedom are indivisible. Control over the economic activities of individuals leads inexorably to control over all aspects of their lives."

Recent history proves no such thing. In fact, one could make the opposite argument: as markets are given freer rein, inequalities increase, requiring an amplification in the state's an amplification in the state's • Finally, Chinese reformers societies produce, for whose power, not its withering away. have shown little interest in benefit and under whose direc-

Four examples immediately suggest themselves. • In Chile, Friedmanism has reigned for a decade, but formal democratisation has pro-

nomic role.

promoting political liberalisa-tion along with the economic variety; they like markets because they crack a disciplin-ary whip, not because they lib-erate individuals. ceeded much further in Latin While most libertarians American countries where the worry about the dangers of state retains a more active role concentrated governmental in the economy, like Brazil and power, they are indifferent to Argentina, • In the UK, the Government has enlarged its role in national life even as Mrs concentrations of private power. But for most workers, their daily experience of work is not unlike living in an authoritarian state: they must follow instructions or face eco-Thatcher was reducing its eco-In the US, civil liberties nomic catestrophe. Nor do they have suffered innumerable sethave any say in what their backs under Ronald Reagan.

tion. Such decisions are left to boards of directors elected by a small shareholding elite on a one-share-one-vote principle. Conservatives East and West are happy to offer only two possible forms of economic organisation, Stalinist central planning and the market. Any idea of a democratised planning mechanism is thus evicted from the realm of acceptable discourse. Defining economic freedom as the mere absence of restrictions on the entraprenential class is awfully one-dimensional. Doug Henwood, ... 250 West 85 Street, New York, NY 10024

# British Coal to be privatised 'after next election'

By Peter Riddell, Political Editor, in Brighton

BRITAIN'S Conservative government yesterday reaf-firmed its intention to privat-ise the state-owned coal min-ing industry if it wins a fourth successive term in office.

Mrs Margaret Thatcher, the Prime Minister, who will end the conference with a keynote

DECADE ago, Peking was a city of bicycles in which the traffic jam

was virtually unknown. Apart

was virtually unknown. Apart from the odd truck, bus or jeep, virtually the only passen-ger vehicles on the road were Chinese-made limousines, car-rying government officials and formign discritence behind

foreign dignitaries behind drawn curtains, and the old-fashioned Shanghai sedan.

But the dramatic changes

wrought by China's economic modernisation drive have brought an explosion in the

use of passenger cars, leading the Chinese to step up their

production of vehicles. Analysts believe, however,

that Peking will have serious

problems satisfying consumer needs over the next few years,

let alone fulfilling the hope of

some Chinese manufacturers

to export cars on a massive

"It is impossible to snap

your fingers and start a car industry," said one industry source. "Production is unlikely

to meet demand in the near

The challenges and problems

facing China's domestic motor industry have been shaped in

large part by the country's stiff import regulations.

To encourage the develop-ment of its domestic industry

and curb the expenditure of

of foreign-made vehicles, the Government has imposed pro-

hibitive duties on imported

passenger cars which,

scale

future.

address on Friday, does not need to call a general election before 1992. The scheme, which is likely to be hitterly opposed by Britain's traditionally militant

miners, follows proposals made on Tuesday by Mrs Thatcher's government to

increase private sector involvement in roads and pos-sibly to privatise the country's state-owned rail network. The sole remaining large state-owned business in the state-owned business in the state-owned business in the UK is the Post Office, whose future is under review.

The announcement was

in the 1940s was one of the central policies of the reform-ing post-World War Two government in 1974.

Labour government of Prime Minister Clement Atllee. In the 1970s and 1980s, the indus-ity became a hotbed of trade union militancy. Action by the National Union of Mineworkers helped bring down Mr Edward Heath's Conservative

# This week's crack in sentiment towards the dollar is almost as surprising as its burst of strength three weeks ago, and while there is some concern about today's US trade figures, the real worry is that Japanese investors may be signalling the end of the sharp US boad mar-het rally. Allied Lyons Shere price relative to the FT-A All-Share index

#### Allied/Suntory

With the long shadow of Mr Alan Bond on Allied-Lyons' share register, it is perhaps natural to assume that any move Allied makes at the moment is designed to put him off. But when the deal makes as much commercial and finan-cial sense as yesterday's link-up with Suntory, one can mix-up with Suntory, one can be forgiven for wondering whether defensiveness is just a side-effect - and not a very powerful one at that. True, every 2% per cent helps, but it is hard to believe it would halt a determined antipodean in full stride. And to judge from the Allied shore wice at the the Allied share price at the moment, the market thinks Mr Bond's bankers will trip him up far sooner than Suntory could hope to: Allied ought to be able to manage an average market multiple without need-ing Mr Bond to increase its

Clearly, Allied wants to get into the Japanese market as badly as Suntory wants to diversify out of it - or out of that part of it which will be hit by the removal of the tax shelby the removal of the tax shel-ter for the cheaper domestic brews. However with Suntory paying what Alfied coyly calls an "entry fee" of 544m for the privilege of joining the Allied-Lyons club - contribut-ing to Allied's £100m-odd net gain on the deal - it is difficult to resist the suggestion that cooperation means a lot to the Jaconese. And as Mr Keizo Suii Telecom is a financial gold mine at present but this does not mean that it deserves to be priced at over 30 times earn-Japanese. And as Mr Keizo Saji pointed out yesterday when regretting the loss of his finan-cial virginity, the same one per cent shareholding which looks insignificant from London must look like quite a bit in Tokyo. But Allied, too, would be lost without a Far Eastern footbold; and Mr Bond must know that as well as anybody

Klöckner & Co

shares are to get anywhere near close to an average stock market rating. If the shares are to outperform the market, then the performance will have to be even hetter. There are good reasons for believing that Racal Telecom can meet its ambitious growth projections over the next two to three years; but after that, worries 

about new competitors and a more hostile regulatory envi-ronment could threaten its continued premium rating. Admitbedly, this will be partly offset if Racal Telecom can tap into the huge growth potential in continental Europe. But this is still a dream; and for the moment, the real reason that Racal Tele com shares are being priced so highly is that the company's US advisers are confident that investors in the more expen-sively rated US cellular radio stocks will think Recal Telecom an outright steal at 170n If correct, then Goldman Sachs will have earned its generons

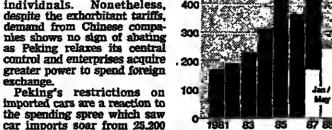

#### British Gas-

One of the beauties of hav-ing an operating cash flow of \$1.5hn is that \$200m is pocket money. British Gas can easily afford to spend that on Ten-neco's international assets, and still have plenty left to pay fibn plus for Lesmo, if that is what it wants to do. According to yesterday's meagre helping of information from the company, the Tenneco assets are just a start in building a big international oil exploration group, which means further acquisitions are more or less guaranteed. If clarification was eded about British Gas's

intentions in its unsuccessful dawn ratii last month, yester-day's deal must prove it was interested in Lasmo for itself as much as for its holding in Enterprise.

ings. Investors in the flotations Enterprise. of other growth companies like As far as the assets them-Renters and Wellcome have selves go, British Gas is done very well out of them, but unlikely to have outbid the them the initial prospective competition at the auction and multiple was far less demand. still have ended up with a bar-ing. the spending spree which saw car imports soar from 25,200 vehicles in 1983 to 354,000 in 1985. Observers estimate \$230m in hard currency was spent on imported cars in 1985 slone - more than the country had of being able to export cars and compete on the world market. The Number One factory has invested in its entire motor industry since the communist revolution in 1949.

In an effort to consolidate recently concluded a technolrecently concluded a technol-ogy licensing agreement with Audi of West Germany to pro-duce 30,000 Audi cars with Chrysler engines by 1992, ini-tially assembling imported parts and gradually increasing the number of locally produced components. The first cars, which are already sold, will be passay for distribution at the funds, technology and produc-tion costs, the State Council, the Government's top deci-sion-making body, last year designated three factories to be China's car production centres: the Number One antomobile works in Changchun, Jilin province, the Number Two automobile works in Shiyan, ready for distribution at the Hubel province, and the Chi-nese joint venture with Volksend of October. The goal is to make 150,000 cars per year by the mid-1990s.

Their joint target is to turn Meanwhile, the Shanghai out 750,000 cars annually by Volkswagen Automotive Company, a joint venture estab-lished in 1985, turned out more than 10,000 Santana models last year and plans to produce the year 2000. In each of these factories, the Chinese have formed or are in the process of forming joint ventures with foreign partners, with the aim 15,000 this year.

The Number Two factory, known primarily for its large-scale truck production, is still believed to be negotiating with General Motors and Citrõen before selecting a foreign part-

Pengeot of France and Chrysler of the US are the other foreign companies involved in joint venture automobile projects. Pengeot's fac-tory in Guangzhou last year manufactured about 8,000 pickup trucks and station wag-ons. It plans to export about one third of its eventual target output of 30.000 vehicles.

Argunary of 30,000 vehicles. Paking is pushing Chrysler to expand its investment and technology in the Peking Jeep Corporation, and recently sent a delegation to Detroit to dis-cuss the issue. Under its pres-ent arrangement, the joint ven-ture produces about 4,500 Cherphese models and 26,000 Cherokee models and 26,000 conventional Jeeps a year. The company hopes to boost pro-duction to 100,000 vehicles a year by the mid-1990s.

Apart from a Tianjin-based oint venture involving Daihatsu, the Japanese are not generally involved in automobile production in China.

ble production in China. Although Toyotas are ubiqui-tons, all have been imported. "The Japanese are reluctant to invest here," one industry source said. "They are reluc-tant to give away technology." The lack of high quality herally-made components is the

locally-made components is the chief obstacle to expended pro-duction. The problem is compounded by the fact that most

# joint venture agreements require manufacturers to increase the amount of domestically made components used every year. This has often forced some operations to mount nation wide searches for the appropriate parts.

The nature of the problem was graphically illustrated when the Peking Jeep Corpora-tion found itself without the neccessary foreign exchange certificates to buy imported components for its Cherokee model. The parts were not available locally, but the company could not convert its cash pany could not convert its cash into hard currency to buy them abroad Only government intervention, reportedly at vice-premier level, enabled Peking Jeep to transfer funds and acquire additional loans in order to purchase the much-needed parts.

another serious problem. An inadequate road system and insufficent petrol stations compound the problems manufacturers often face from short-ages of raw materials, particularly steel. Plants are sometimes forced to halt pro-

turers continue to struggle, some smaller, more flexible market-oriented car makers have emerged on the Chinese scene, inspired by the South Korean example. Observers say these companies have a much better chance of becoming successful exporters.

i policy farm tr reform has been disowned by Mr Michael Dukakis, the Democratic candidate in the US presidential election.

In a hitherto unpublicised in a hitter to the Iowa Farm Unity Coalition dated August 3, Mr Dukakis said he welcomed the statement of concern voiced by the Coalition about the Reagan Administration's proposal that all countries should end gov-ernment intervention in agriculture over the next 10 years.

Mr Dukakis's letter, copies of which are now circulating among trade negotiators in Geneva, said: "In my view the Administration's initiative is neither realistic nor in the best interest of agriculture." Farm programmes were needed to safeguard world food needs and protect producers, he

wrote The letter appears to rein-force the view held in some European capitals that Washington's insistence on a com-plete end to agricultural subsi-

against the European Commu-nity, could soften if Mr Dukato it in a briefing for journal. ists in Washington yesterday. Mr Yeuther said that Austra-lia and New Zealand had conkis wins the election. The US has warned that the

General Agreement on Tariffs and Trade's trade-liberalising Uruguay Round could fall verted non-tariff restrictions into tariffs and the principle had also been used in the agreement the US had recently apart, if trade ministers do not make long-term commitment of this kind when they meet in negotiated over beel exports to Montreal in December.

At an informal meeting of trade ministers at Islamabed 10 In the second US attempt in two weeks to break the dead-lock Mr Daniel Amstutz, the days ago, Mr Yeutter appeared to put the Community on the wrong foot by offering to dischief US negotiator in the farm talks, yesterday proposed that all current import quotas and other quantitative restrictions cuss the short-term reform measures preferred by the EC, provided the commitment to on agricultural imports should the long-term elimination of all be converted into tariffs, which farm supports was made at would be progressively reduced Montreal

over time. The proposal, meant to improve market access for food Mr Yeutter said that the US would agree to freeze export and domestic subsidy proexporters, was contained in a paper read by Mr Amstutz at an informal meeting of senior negotiators. It has not been for-mally tabled in the Gatt talks, but Mr Clayton Yeuther, the US grammes at existing levels and might be prepared to go fur-ther in Montreal". However, he reiterated the Community's position on long-term change was "indefensible".

# US trade figures undermine dollar

#### **Continued from Page 1**

figures would be an important factor in determining the future course of the dollar.

The dollar broke through the key Y130 level in Tokyo and weakened during the European and North American sessions as concerns over today's trade figures intensified financial markets' nervousness.

The consensus expectation for US trade in August is for a deficit of around \$11.5bn, up from July's \$9.5bn. However, rumours in London and New York of a higher deficit under-mined an already fragile confi-

dence in financial markets. At midsession in New York, the Dow Jones Industrial Aver-

### ACCOUNTANCY COLUMN

# White knuckles in the rust belt over benefit changes

By Richard Lambert OPEBs. As an acronym, it does not sound like much of a threat. But don't be fooled. The letters stand for an accounting concept which is beginning to cause white knuckles in the American manufacturing sector and which, if fully adopted, might wipe out the earnings of companies such as General Motors or USX, which used to be known more familiarly as

Big Steel, All will be revealed within the next couple of months, when the US Financial Accounting Standards Board (FASB) is due to publish a keenly awaited exposure draft on the treatment of other post-employment benefits (OPEBs). Those include accident and health insurance, life assur-ance, legal aid: in fact everything that a company promises to pay its workers after they have retired, apart from their long-term consequences. Many of the plans were started pensions.

Big money is involved. Gen-eral Motors, which like most other companies finances such payments on a pay-as-you go \$20m (£480m) to its profits last year under that heading, compared with after-tax income of some \$3.5bn. Today, around two thirds of US companies offer these bene-fits in one form or another, and

the bigger they are, the more generous their terms: just about all the very large compa-nies offer retiree health care benefits in one form or another

The initials OPEB stand for a group of payments for retired workers that were agreed by many US employers in the 1960s. Yet only now are the consequences becoming clear. The payments could wipe out the earnings of companies such as General Motors and USX.

are throwing an increasing

slice of the costs back at the

deal of thought about the

around the mid-1960s, at about

the same time as Medicare, when medical costs in real

terms were much lower than they are today, and when the number of active workers far outstripped retired employees for most companies. Even five

years ago, a typical steel com-pany might have three active workers for every two retired:

today in some cases there are

two retired for every worker

still on the payroll. As a result, the potential lia-bilities for benefits of this kind are enormous. Estimates for

Most managers installed

se schemes without a great

companies

Typically, the plans will cover hospital costs, plus some doctors' fees and medicine. the total unfunded liability for the US corporate sector range from around \$100bn all the way After the age of 65, some of the burden is shared with the govnp to \$2 trillion and even higher. The impact will vary from ernment Medicare health scheme - hut spending curbs

company to company, and will be felt hardest by old-line, unionised manufacturers in the rust belt which have been offering these benefits for a long time, and have laid off large numbers of youngish people in the last few years. The least affected will be young, high-tech businesses with high value added and small work-forces.

In most cases, these are not ex gratia payments, and it is not as though companies are free to cut back if they start to feel a financial strain. Attempts to do so have already resulted in litigation, and any attempts to cut benefits on any accention of the sentence of any large scale are likely to result in legislation from an unsym-pathetic Congress. The obligation is confined to

US operations. For example, General Electric recorded a

charge of \$278m last year in respect of retiree health and life insurance benefits (it uses a more conservative treatment than most companies); it added that "most retirees outside the US are covered by government programmes and GE's cost . . . is not significant." Some companies do not even bother to record the annual

expense as a footnote in their accounts, and many apparently have no idea about the scale of their aggregate liabilities. The FASB wants to change

all that. It believes that the benefits represent a form of deferred compensation, just like pensions, and that an obli-gation should be recognized in accounting terms based on services rendered. In essence, it is saying that companies will have to accrue benefit costs as employees earn them.

The company will first have to measure what is termed its expected benefit obligation, by measuring its current costs intersection of the control of the costs and making projections about future outlays on the basis of trends in medical expenses, life expectancy and other factors. The obligation will be dis-counted on a present value basis, and the charge to profits will be spread over the period that the benefits are earned. Then there is the question of

accounting for benefits that have been offered in the past, and have not been funded. Under the FASB plan, this so-called transition obligation would normally be written off

**RETIREE COSTS FOR US COMPANIES** IN 1987

Expense ne for OPEBS Net \$m 219 127 Ford 4.825 341 Gen Motors 3,551 820 Caterpillar 54 32 350 200 Alcoa

against profits on a straight-line basis over a period of approximately 15 years.

In layman's terms, what this adds up to is a very substantial increase in the amount charged to profits each year to cover these benefits. Mr John Deming, of KPMG Peat Mar-wick in New York, suggests that the figure could be three or four times the amount set aside on tha pay-as-you-go-ba-sis. For a number of companies in the rust belt, an increase on that scale would wipe out the profit figure.

So the FASB's proposals will be highly controversial. Mr Art Siegel, of Price Waterhouse, suggests that opposition will come on several different lev-els. Some will argue that this whole basis of accounting is inappropriate since the bene-fits do not come into effect until the employee is eligible for retirement. Others will say that future costs are impossi-

ble to estimate, and that it is therefore absurd to pretend that the benefits can be calculated on the same actuarial hasis as a pension scheme.

Finally, there is the big business lobby, which is begin-ning to make its voice heard. It will argue that by insisting on will argue that by insisting on what are no more than book-keeping items, the FASB will place US companies at a disad-vantage vis-a-vis their interna-tional competitors by imposing a standard theat will take

a standard that will take a great slice out of their profits and tangible net assets. Protests from the business com-munity have delayed publica-tion of the exposure draft by several months, and have already brought some minor modifications to the FASB's proposals. The likelihood is that a stan-

dard will be imposed for deal-ing with these benefits: the big question is about how far the FASB may be inclined to compromise in order to shed some light on these enormous liabilities. The coming exposure draft will probably be on the table for about six months, longer than normal because of the controversy it is already creat-ing. That will be followed by public hearings next summer, with a final statement ready by the middle of 1990. On that timetable, the new standard would probably start to bite from 1992.

Even if the lobbyists are successful in crimping FASB's new rule, OPEBs will still come home to roost as a heavy drain on profits. Ignoring the issue would mean higher prof-its today - but would store up trouble for the future.

**Financial Controller** 

## c.£30,000 + car + excellent benefits

The Company is a leading manufacturer and supplier of home fashion products. The products are high quality and backed by an excellent service to the upper end of the retail and contract markets. This growing business has achieved a tumover of around £15 million and as an autonomous part of a large U.S. textile corporation, the Company has ambitious expansion plans for European markets.

Reporting to the Chief Executive, the Financial Controller will play a key strategic role in developing and running the business throughout the UK and Europe. This will include long term planning, forecasting and budgeting along with ensuring business targets are achieved and controls are maintained. Through a strong support team, there will be

responsibility for controlling local, European and U.S. reporting, as well as managing cash, inventory and operations planning. An initial task will involve overseeing the

implementation of a new integrated computer system.

Sheens Gibson, Personnel Manager, PosTel investment Management Limited, Standon House, 21 Manual Street, London E1 SAA.

# Accountant

**Central London** 

£25K + Car + Share Options

An acquisitive and highly profitable public group in the manufacturing sector offers a challenging opportunity to a qualified accountant aged 25 - 30 with approximately two years post-qualification experience.

The Group Accountant forms part of a small central team and reports directly to the Senior Financial Executive. The position demands a good understanding of reporting requirements within a PLC and carries responsibility for a wide range of tasks including consolidations, acquisitions and capital project appraisal and assistance with the centralised treasury management function.

The successful candidate will be technically strong with a confident and energetic approach and the ability to work without supervision.

The post carries an attractive benefits package and progression to the Financial Controllership or Directorship of an operating subsidiary is envisaged within two or three years.

Please send a comprehensive CV, noting present salary, to:

Box A1009, Financial Times 10, Cannon Street, London EC4P 4BY

> Started just six and a half years ago, the F.K.B. Group have grown rapidly to become the leading sales promotion and marketing consultancy on both sides of the Atlantic. This prominence has been achieved through a combination of an aggressive acquisition strategy and a well conceived organic growth policy. The success of the Group can be directly attributed to a young, high calibre and forward looking management team.

As a direct consequence of this continued expansion, the Group wishes to appoint a Corporate Treasurer who will be expected to play an active role in its future development. Reporting to the Group Finance Director, this position will have primary responsibility for the management of the Group's cash resources. This will include the development of an optimal cash management structure, the use of corporate banking facilities and negotiation of credit lines. As a direct consequence of the continued overse expansion, with a particular focus on Europe, the Treasurer will be expected to Introduce efficient management of the Group's rising foreign currency exposure.

The successful candidate is likely to be aged between 28 and 36 and have had at least 5 years commercial experience, a substantial part of which will have been in Treasury. Additionally, you will have had direct experience of working in a Group, where a great importance is attached to the efficient cash management of subsidiary companies. Finally, it is likely that you will be looking for a unique opportunity to join a fast moving company which will provide both a professional and personal challenge and where you will be expected to make an important contribution to the future of that Comm that Group,

Our client is one of the most exciting top UK companies; a world leader in the branded consumer products and services market. They have consistently produced above average profit growth in a diversity of competitive market sectors and are set for further dramatic development both through acquisition and organic growth.

In keeping with the Company's forward thinking strategy, they wish to appoint financial executives who have the potential for rapid promotion to senior line management positions within the Group. All require strong commercial ability, personal drive, sound judgement and the high level of communication and interpersonal skills expected of a top executive in a fast moving, competitive environment.

Candidates aged 27-35 must be qualified accountants or business graduates who have already demonstrated an outstanding level of achievement in Line Financial Management. They must possess a high level of intellect, good technical accounting skills and strong commercial acumen and have the strength of personality to make an immediate impact at a senior level in the organisation.

Please apply in confidence indicating your present salary and enclosing a copy of your C.V. to Peter Makin, quoting reference 1870.

# SECTION III **FINANCIAL TIMES** URVEY Despite last year's stock market crash,

management buy-out deals are still increasing rapidly in

number, fuelled by stiff competition among investment institutions. The worry now is, reports Charles Batchelor, that pressure of money may lead to buy-outs at any price.

# A flood of finance

TIMES HAVE never been

returns available to the finan-

ciers are starting to drop; and

the risks are increasing as more and more loan finance is

balanced on relatively smaller.

"Investors are being squeezed by managements to the point where deals are not

amounts of equity.

COUNTAN •<sup>10</sup> - BON(S-g)

worth doing," complains Mr Hugh de Quervain, managing director of Midland Montagu Ventures. "Some deals are ere said eg being structured with ratchets (arrangements which reward the management with more equity if performance targets are met) which mean that even if the company doubles its profits the investor gets no benefit. It's absolutely incredi-ble that these deals are being

1. . . . . . . . . 1.2.19 1112

Control for the station and APL & TATE MEY de letimente topi better for the frustrated British manager keen to stage a buy-out of the business he is runnot know what ratchets mean." "The buy-out market has become as competitive as merning. Competition among the banks and venture capitalists to lend him the finance is chant banking in the 1960s, syndicated loans in the 1970s and equities in 1980s," notes Mr Michael Bentley, chief exec-utive of Electra Investment intense and if the boss will not sell to him he can drop the idea of a buy-out and look for a Trust. company to buy into. Buy-in

The measure of that competifinance too has never been more readily available. For the investors which tion has been the rapidly increasing number of deals which have been completed in recent years. From just 13 deals worth a few million pounds in 1977 the numbers rose to 300 deals worth £2.82bn in 1997 a strong position to negotiate deals in their own favour; the

The stock market crash of October 1987 has dampened interest in the very large deals and the £715m buy out of MFI, the furniture retailer, just before the crash remains the largest UK buy-out to date. But large numbers of smaller deals have been completed this year and in the the first nine months of 1988 210 deals worth £2.83bn were recorded by accountants Peat Marwick

struck. I suspect investors do

McLintock. Buy-outs are also becoming increasingly attractive to the directors of UK public compa-nies disillusioned with their poor market rating in the wake of the stock market crash. Mr Richard Branson last week announced the details of a

**Management Buy-Outs** 2248m buy-out of Virgin Group which obtained a public listing less than two years ago. In the US leveraged buy-out activity is also increasing

\$39bn have been completed so far this year compared with \$380n in the whole of 1987. In the UK, the flood of buy-out finance comes from two sources. Venture capital organisations, which in the US do not get involved in buy-outs, have increasingly switched their attention away from start-up and early stage financ-

ing towards buy-outs. Buy-outs may offer lower returns (though some buy-out specialists dispute this) but the rewards are surer and will come through more quickly,

At the same time a range of British institutions as well as the London-based branches of American banks have shown an increasing interest in buy-outs. Development capital groups such as Phildrew Ventures and Foreign & Colonial Ventures recently raised more buy-out finance while new American players such as Drexel Burnham Lambert, the US junk bond specialist, and **GE** Capital, General Electric's finance arm, continue to flock to London.

Profitable deals may have become harder to find but there is no sign of an end to the influx of keen investors to the buy-out scene. There are still very good returns to be made by the providers of both equity and loan finance. And the buy-out teams do not have

things entirely their own way. The managers of Parker Pen, like the other investors, made a good profit when their company was sold to Pentland industries in September but they did have to accept an earlier-than-expected end to their company's independence. The worry in the industry is that the pressure of money

looking for a home may lead to buy-outs being put together at any price. In the longer term, if the economy deteriorates, the bought-out companies which sre not properly financed might get into difficulties. Buy-outs in Britain have tra-

ditionally been financed much more conservatively than their counterparts in the US, which depend far more on the rapid disposal of unwanted assets to survive. Typical debt-to-equity

ratios in the UK have been 3 or 4:1 compared with 9:1 in the US

But UK gearing levels are now starting to climb to meet managements' desire for greater leverage on their equity and the debt investors' desire for income rather than capital gains in current depressed stock market condi-Hons.

Buy-outs still represent a very safe investment, particu-larly for venture and develop-ment capital organisations like 3t which expects one in three of its start-up and early stage deals to fail compared with just one in ten of its buy-outs. Nevertheless, UK investors have taken note of the prob-lems in the US of Revco, a large drug store chain, which in July became the first US

buy-out to file for protection from its creditors. Less than 19 months after being taken private in a \$1.3bn leveraged buy-out Revco sought protection because of the unduly ambitious growth and profit projections built into its financing.

The British buy-out commu-nity has avoided such embarrassments but rising UK interest rates could cause problems. Some deals which have been contemplated will not go ahead while completed buy-outs will take longer to achieve the targets set in their business plans.

Some protection against interest rate increases are pro-vided by arrangements known as "caps" which set a ceiling on interest payments. These caps usually last for one to two years so buy-outs of that vintage will be affected shortly. More recent deals will be pro-

More recent deals will be pro-tected unless interest rates remain high for a long time. As the buy-out has increased in popularity and profits to investors have come under pressure, the deal-makers have diversified into buy-ins. These involve an outside manage-ment team taking control of a company with the help of financial backers. Since the huy-in management team is not familiar with the company the risks of failure - and therefore the rewards of success - are much higher.

When Si announced recently that it was looking for 200 that it was looking for 200 managers prepared to stage a buy in it was swamped with 700 replies. The buy-in concept has clearly caught on. What the buy in trend has done is to shift the onus for putting the deal together away from the management towards the financier. The investors were anyway starting to play a

were anyway starting to play a more active role in putting together buy-outs but the growth of the buy-in confirms this trend. This represents a move towards the US practice in which buy-out specialists arrange deals for their finan-cial rather than their industrial logic and managers are trial logic and managers are only involved at a later stage. A second US financing tech-nique which is gaining ground in the UK is the use of mezza-nine finance in buy-outs. This form of high-yielding, unse-cured loan funding is increas-nel to be buy out to britten ingly being employed to bridge the gap between equity and secured debt in deals. About £110m of the £1bn

worth of buy-out finance that has been provided by Si is in the form of mezzanine, says Mr Ewen Macpherson, head of Si's City office.

But despite the increasing willingness of UK institutions to provide mezzanine, Drexel Burnham Lambert and GE Capital believe there is a gap to be filled. Mr Rodney Hall, head of GE Capital's London operations says he is prepared to provide sums of up to £200m of mezzanine to finance individual deals.

"We hope the mezzanine market will develop," says Mr John Burgess of Baring Capital investors. "It would make deals easier." He attributes the slow development of mezzanine funds in the UK to the lack of e domestic corporate debt market which means institutions have no experience of evaluating that form of debt.

of evaluating that form of debt. If a public market for mezza-nine debt develops in Britain the prospects for far larger buy-outs being done will increase, some deal-makers say. If institutions knew that investing in a buy-out did not mean they were locking them-selves in for three to five years they would be more prepared to invest, this argument goes. In setting up in London, GB

In setting up in London, GE Capital, like many other US groups before it, hopes to establish a base for operations not just in the UK but throughout Europe. It plans to carry out cross-border deals --involving companies with operations in more than one country - from London and

also plans a Paris offices within the next two years. The attraction of continental Europe lies the fact that in many counties the buy-out technique is not highly devel-oped and the opportunities for profitable deals are greater.

France and the Netherlands do have sophisticated buy-out markets though there is scope for further growth while Spain and Italy have even greater potential. Germany has proved a difficult market with the German banks resisting what they see as an attempt to upset traditional client relationships. But a number of British buyout groups with offices in Germany are hopeful that their persistence will pay off.

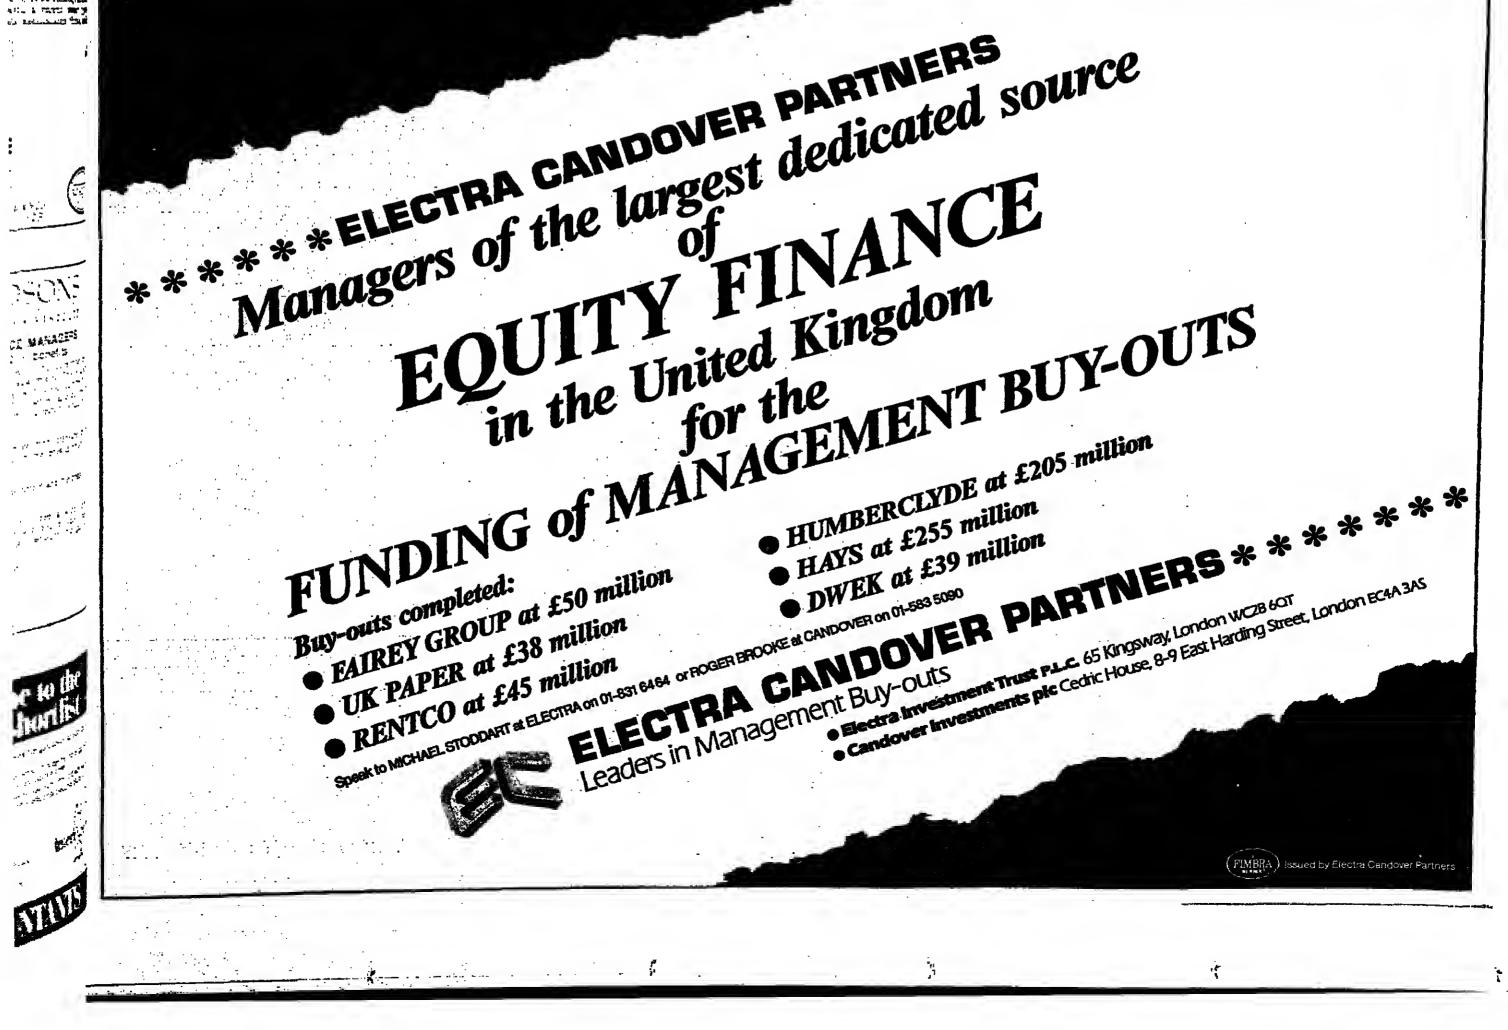

If the profitability of British buy-outs comes under further pressure the incentive to move overseas can only increase.

# **MANAGEMENT BUY-OUTS 2**

MANAGEMENT buy-out financing has become a sepa-rate part of the financial ser-vices industry largely independent of the venture capital industry from which it has sprung. The following is a glos-sary of the technical terms used in structuring buy-out deals and some of the related venture capital terminology. Bridge financing - short-term funding for a company which is on the point of raising a new round of equity or about to go ouhlic Captive fund - a venture capi-

П

tal fund which is part of, or owned by, a larger financial services group and which does not raise funds on its own account

Corporate Venturing - practiced on a small, but growing, scale in the UK, this is when a large corporation buys shares in a small company, either directly or through a venture capital fund. The idea is to allow the big company to get involved in new areas while at the same time sharing the costs with another partner.

Cylinders - clauses in buyals which limit the extent to which the interest rate charged on borrowed funds can rise or fall. A safeguard against borrowing costs rising to the point where they endanger the company. The upper limit of a cylinder is known as a "cap", the lower limit as a "collar".

ly-stage finance.

and his business plan.

Deal flow - the rate at which investment propositions come to venture capitalists. Many claim to select only one in 50, though deal-flow numbers are sometimes inflated as a virility symbol venture capitalist sells his Development capital - later holding in the buy-out com-

TEXAS

# Ratchets, leverage, lemons and plums

of Return. Different people work this out in differen but it usually means the aver-age annual rate of return to the investor over a given period, including dividend dis-tributions and realisation profits or the profits shown on a fair valuation of the buy-out company. Lead investor - venture capitalist with the largest share in a syndicated investment. He

usually initiates the deal and takes a hands on role on behalf of the other partners. Lemons and plums - bad investments usually go wrong

myestments usually go wrong before the good ones produce a profit. In the jargon, hemons tipen before the plums. Living dead - this refers to companies which are just about trading profitably but which are milkely to do really well a slichtly deted term

well. A slightly dated term from the industry's early buccancering days. Leveraged buy-out - similar

to a management buy-out though usually applied to US deals where the transaction will have been initiated by a financial group rather than management. The name refers to the high levels of borrowings these companies take on, using the assets being pur-

chased as leverage. Management buy-in - an offshoot of the management buyout industry. The purchase of a business by one or more out-

side managers with the help of a group of financial backers. Riskier and hence more incrait ways tive for the backers.

Management buy out - the purchase of a business by its existing management with the help of a group of financial backers. The managers put up a relatively small sum to finance the deal but gain a dis-proportionately large share of the equity if all goes well. Mezzanine finance - unse cured loans which rank after enior debt but before equity in the event of the company fail-ing. To compensate for the

greater risk to the sender, it usually earns interest one to

three necentage points above secured loans and often carries

secured kiens and often carries an equity "kicker" to give the lender a stake in the equity. Fortfolio approach - usually taken by hands off investors, this entails creating a halanced portfolio of companies in vary-ing sectors and at different stages of investment in the hope the overall performance will be special will be good.

Batchet – an incentive arrangement whereby the managers get a bigger above of the equity if the venture per-forms well. Sometimes manag-ers forms well. Sometimes managticularly hadly. Replacement capital -

euphenism for cashing in one's chips. When an entrepreneur sells some of his shares to raise money or because he

TAL ST. I.

executives a buy-out is a oncein-a-lifetime experience which is at the same time exhibit which ing and frightening. Venture capitalists who fund many of the deals report anxious telephone calls from managers keen to buy out their company who admit to complete ignorance as to how they should go about 11.

The number of successful buy outs may have increased sharply over the past year or so but conditions have, if anything, become tougher for would be buy-out teams.

Vendors, usually the parent company or the controlling family in the case of a private company, have become more: aware that they can strike a hard bargain. The days when companies were happy to sell poorly performing subsidiaries at below net asset value just to be rid of them are long gone. Competition has also become more intense because there are growing numbers of rival teams of outside managers willing to stage a buy-in and of trade rivals prepared to make a

WHEN 3i, Britain'a largest vanture capital group, announced in June that it was looking for adventurous executives prepared to stage a man-agement buy-in it was hoping to find 200 candidates. Four months later 3i has 700 names on its buy-in list and Mr Rich-ard Summers, director in charge of the operation, is attempting to whittle the number down to a more manageable size.

The typical manager who has approached 81 is aged between 40 and 50 years and has had senior management experience with several compa-nies. One university-educated executive in his mid-40s had spells in production and mar-keting with Procter & Gamble 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 - 100 t and full and the and Mars before going into a privately owned company with the promise of a stake in the equity. When the equity failed to materialise he offered to take part in a buy-in.

Management buy-outs have attracted a great deal of atten-New 41 515723 tion in recent years as the the states 21.9 number and the size of deals has increased. The role played by the makers in selecting b managers and finding companies suggests a mo Britain towards instituti ly-led deals. Up to now main difference between **UK-style** management bu and the US leveraged bu has been that in Britain initiators of most deals been the managers not

Institutions, Mr Charles Gonszor of drew Ventures foresees trend developing. Phile Ventures would be prepar buy a company for its ount and then find ma ers to run it, he says.

**Charles Batchelor** 

and the resources required to attain these goals. Financial projections should be made covering profits, cash flow and balance sheets for at least three years ahead. Finally, the managers should estimate the finance they will need, including the purchase price and cap-ital needs of the independent business,

Above all, the specialists urge, be realistic. One investor reports turning down a buy-out proposal "because it relied on the whole industry 'coming to its senses' and refraining from price cutting for several years." Since the business was in a notoriously cyclical indus-try prone to bouts of fierce price-cutting this condition seemed less than realistic. Many multi-million pound

buy-outs appear to balance, like inverted pyramids, on min-ute quantities of the managers' own money. Despite their small investment (in relation to the other funds being pro-vided) the managers often gain a substantial stake in the equity of the business.

Realistically, though, the

amount the team invests must be large enough to demonstrate commitment and yet still allow the institutional investors a good return. A typi-cal investment would be £200.000 with the amounts contributed by each individual rangings from £25,000 to

550,000. Depending on the structure of the deal, the managers could expect to acquire anything between 10 and 60 per cent of the company although higher percentages have been known. Many deals involve 'ratchets' which allow the managers to increase their stake later if performance targets are met. One of the most difficult tasks for the managers is dealing with their bosses. It is not unknown for managers who

propose a buy-out deal to get the sack. They certainly face psychological pressures and the fear that, if the deal does not go through, their career prospects with the parent group may be harmed. It is here, in negotiating with the vendor, that the indepen-

dent adviser earns his money.

He will not be concerned about upsetting anybody. One venture capitalist did such a good job of pointing out to the ven-dor the weaknesses of the business he was selling that the managers asked why he was helping them if the company was in such a had way.

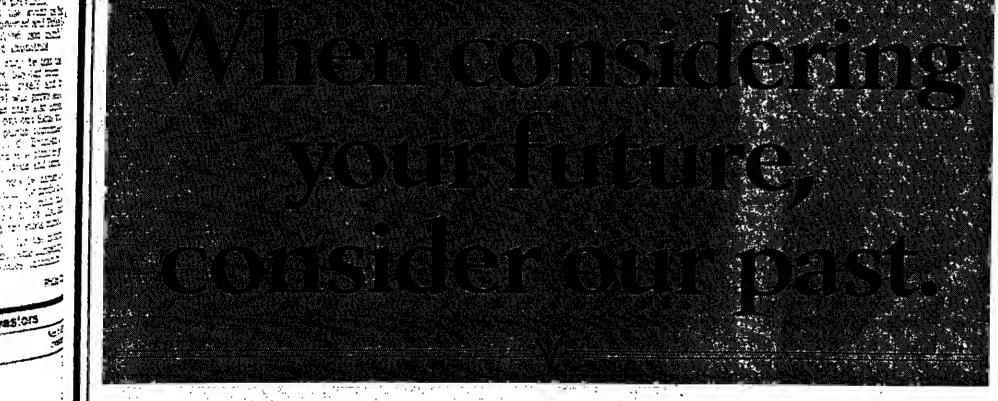

A cool, constructive approach to negotiations is best. Bluff and bluster are not recommended and threatening to resign and walk away from the business should be a desperate last throw. Do not make such threats unless you are prepared to carry them out, the professionals say.

The managers must be prepared for a long haul. Negotia-tions will almost certainly be spread over several months. At one moment they will be going smoothly. At the next they will appear near break-down.

Finally, when the months of negotiation are over, the real work starts. The managers must show that they can run their own operation outside the protective embrace of a large organisation. Many buy-outs have made their owner-manag-ers rich men within a very short space of time. But the deals which go wrong, where managers are sacked or the finances restructured, bear witness to the risks involved

The stock market crash did not stop our progress.

Although 1974 was the year of the three day week, at County NatWest Ventures we were working flat out on a brand new project.

1974

In August, we reaped the fruits of our labours when we supported our first management buy-out team.

As the new decade arrived, our management buy-out activity was rapidly gathering pace.

By the end of the year we had tucked the 25th under our belt.

It was a reflection of the expertise built up over the previous six years.

and the second second

1985 1985 saw us steaming towards new horizons when we led the £19 million privatisation of buy-out Vosper Thornycroft, the warship builder.

Such was the success of this buy-out that less than three years later the company was launched on the Stock Exchange.

Among the 23 management buy-outs we backed during 1986 were two from Cadbury Schweppes - Swallowfield and Jeyes Group.

In October, we completed our 100th management buy-out with Venture Plant, a leading plant hire company.

On Christmas Eve, completion of the £17.5 million buy-out of Aynsley China from the Waterford Group brought our tally of buy-outs and buy-ins that year to 25.

In May, Southnews became our first management buy-in to obtain a USM quotation, 18 months after the original transaction.

It is a measure of success that, since Black Monday, no fewer than six of the management buy-outs we have financed have obtained a flotation, with a further five expected in the next six months.

These highlights merely outline County NatWest Ventures' management buy-out expertise. Our new brochure paints the full picture. In describing the way we have supported management teams in the past, it demonstrates why our experience should guide your future.

County NatWest Ventures Limited, Drapers Gardens, 12 Throgmorton Avenue, London EC2P 2ES. Tel: 01-382 1000.

**MANAGEMENT BUY-OUTS 4** 

Unhappy about share prices, some companies are feeling ...

# The urge to go private

COULD THE management buy-out be about to take off as a means of taking public com-panies private? The continuing stock market malaise following the crash of October 1987 ha prompted the managers of many public companies to think seriously about buying themselves out of their public

Mr Richard Branson, chairman of Virgin, the entertainments group, last week announced the terms of a £248m buy-out of his company after less than two years as a public company which left him very disatisfied with the share price. In August, Mr Tony Berry, chairman of Blue Berry, chairman of Blue Arrow, the employment ser-vices group, had said he could get the funds needed to take his company private.

Vanture capitalists and the funders of buy-outs report they regularly receive approaches from public company chairman interested in the idea. 3i says it currently studying three proposals.

At first sight there is little to stop deals such as these going through. The venture capital/ buy-out community is flush with cash; many companies are This fear, that managers are disappointed with their stock not revealing all, coupled with market rating; and the US, the the feeling that if the manager source for many financing ers think they can do better techniques which later take then they should be prepared root in Britain, has been experiencing a leveraged buy-out holders, has dogged subseboom.

The recent arrival of two new US players on the British institutions rather more con-buy-out scene - Drezel Burn- vincing arguments to win ham Lambert, which dominates the US junk bond mar-ket, and GE Capital, the finance arm of General Electric of the US - may signal a out of his International Leisure change. But so far British insti-tutional investors have seen a tutional investors have proved resistant to the charms of the public company buy-out.

Public company buy-outs appeared to get off to an auspicious start in early 1985 when institutions backed a £56m offer from the manage ment of Haden, an engineering group, to buy out their company. in the face of a hostile takeover hid from Trafalgar House,

But later that sume year an unsuccessful attempt by the management of Molins, a manufacturer of cigarette-making equipment, to take the company private, showed the lim-its of the institutions' willinghess to go along with these deals. The Molins' offer was judged ungenerous and the

Happier times: Richard Branson amid the rush for Virgin Group shares two years ago

institutions' fears were numbers of disappointed recent arrivals on the Unlisted Securities Market would bow aroused that the management knew more than it was prepared to tell its outside shareout, have not been fulfilled. Institutions still question

why they should agree to sell out when the venture capitalists, sometimes within their own organisation, are ready to then they should be prepared back the deal. The venture cap to do it for the existing shareitalist has to demonstrate that the type of finance the comquent buy-out propos

holders

pany now needs, and the higher risks attached, justify Managers have had to offer the high rates of return he expects. shareholder support.

Persuading the institutions Nevertheless, Mr Harry is such an uphill struggle that Goodman persuaded institusome venture capitalists do not believe that public company buy-outs will ever be done in large numbers. Charles Gongrounds that the cyclical tour szor of Phildrew Ventures says operations business faced a buy-ins by outside manage period of uncertainty. Sharement teams are more likely holders also felt his investment than buy-outs. plans for the airline side of the business would strain their

But opinion on this is divided. In the UK business patience and their pockets. A year later, in April 1968, framework, where disclosure Glass Glover, a grower and dis-tributor of fresh fruit, was able requirements are less strict than in the US, hostile buy-in to persuade its shareholders teams would not have enough information to mount a sensi that prospects were gloomy ble offer, says Mr Otto van der Wyck of Baring Capital Invesenough for it to be taken private by its management. Even so, one large investor, Scottish tors. Amicable, held out for three Just why hostile leveraged buy-outs should have become so popular with US investors while having so little appeal for their British counterparts months before finally accepting, last July that it could not force better terms on the deal. Desoite the handful of trans-

actions that have been com-

pleted, forecasts that large

remains something of a mys-

tery to many people.

One suggestion is that Brit-ish institutions are reluctant to sell because the subsequent flotation of the buy-out group would show what a poor deal the original investors had got. In the US, by contrast, many buy-outs are dismembered and sold to trade purchasers so the discrepancy in the price is not so obviou

Restrictions on partial ten-der offers in the UK, which prevent offerors from bidding for, say, 51 per cent of a com-pany's stock, also militate against public company buyouts, say some.

But the most commonly advanced reason is the lack of subordinated debt finance mezzanine finance in UK pari-ance, junk bonds in US terms to make the financing of large public company buy-outs possible. As the price of deals has risen a layer of high-yielding mezzanine funds has become necessary to bridge the gap between equity and cured loan finance.

Mezzanine funds, which offer a higher yield than secured or senior debt to match the ater risk, have appeared in UK buy-outs over the past two years but the amounts avail-

able have so far been modest. This may now be about to change. Drezel is raising a £200m First Britannia fund to provide mezzanine finance for UK deals while GE Capital plans to tap its US parent's resources for large amounts of zzanine finance.

Mr Rodney Hall, head of GE Capital's newly-established London operation, says he is willing to provide up to £200m of merzanine finance for individual deals - five or six times more than the sums which have previously been available.

"This should lead to more deals in which public companies are taken private," he forecasts.

Mr Stephen Curran, deputy chairman of Candover Invest ments, also believes more of such deals are "inevitable" One reason advanced by the financiers is the "envy factor". Public company directors have seen their junior managers grow rich by staging buy-outs of their divisions and subsidiacies. Now they too want a share of the action. Whether Britain's institutions will let them still remains to be seen.

**Charles Batchelor** 

NO MATTER what their relative histories generally, there can be little argume that on the financial front it is the UK which tends to ape the US. That broad generalisation certainly has some application in the corporate finance field - and, arguably, in the buy-out arena specifically. For a start, the management

buy-out movement is som what younger in the UK. The idea was basically borrowed from across the Atlantic in the early 1970s, and has burgeoned here since then. That said, it was not until the current le that the MBO concep really took off in Britain, with the first deal to pass the 55m - National Freight Consorthim - negotiated in 1982. Just two years later, the more advance climate on Wall Street was seeing its first \$1bn buy out - that of Wometre in 1984. True, the growth of the MBO industry in the UK has been rapid of late. In the entire period up to 1962, the value of nt buy-out deels in the UK barely approached \$200m, but by 1967, the annual figure topped £3bn. Neverthess, the US remains well ahead in the size stakes; annual leveraged buy-out activity is now reckoned at around \$40bn. The US, more-over, still claims the largest deal ever done - the \$6.2bn

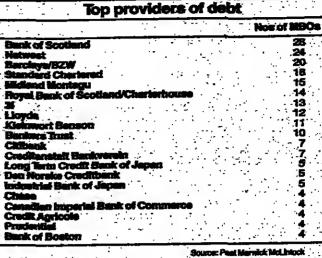

offer for Beatrice Foods. Deal structures are another area where the US tends to. lead the UK - though many might argue that innovation and financial prudence do not necessarily go hand in hand, and that the more conservative UK approach has a good deal to recommend it. Wall Street is now famed for the breadth of its capital markets, and leveraged buy-out deals there have

employed any variety of com-plex mezzanine finance, junk bonds and the like. These American structures noreover, tend to transiste into much higher gearing lev-els immediately after the buy-out is completed. It is generally

reckoned that average equity to debt ratio on US deals is around nine or ten to one. The comparable UK figure is put at

perhaps five to one. Such differences, however, are largely symptomatic of a more fundamental inderlying force. In general, most UK buy-outs have been initiated by either the incumbent manag ment or, indirectly, by the management of a parent company which decides - for group strategic reasons - to dispose of one particular ann or subsidiary.

Very broadly, it is estimated that as much as three-quarter of recorded deals in the UK

result from divestments by domestically or foreign-owned parent companies. In the States, by contrast, the role of the deal-makers is

far more pronounced. The Leverage Buy-Out (LBO) indus-try is fairly substantial with over two dozen well-known specialists in the area, plus the various investment banks. Moreover, the tradition of drumming up business via spe-cific deals, rather than letting in surface through via well-es-tablished client relationships, is very much part of the Amer-

ican corporate finance scene. With this in mind, it is not perhaps surprising that huyouts should become a fairly familiar response to a takeover situation on Wall Street. One good current example would be

the situation at publishing group Macmillan, where the UK publisher Mr. Robert Maxwell has been engaged in an auction with leveraged buy-out specialist, Kohlberg Kravis

Source: Paul Marnick McLiniock Roberts. Equally, it is worth noting that the recent speculation - and no more than that

that Blue Arrow, the employment agency business headed by Mr Tony Berry, might be taken private involved talks between US investment house Dillon Read the US investment bank, and possible investors.

Everything you always wanted to know about management buy-outs but were afraid to ask.

A management buy-out isn't a subject you can easily talk about or find information on.

It's full of uncertainty. Full of complex and delicate negotiations and long term implications, for you personally and your company.

Fortunately, it's a subject that we at Deloitte Haskins. & Sells are very familiar with. We've been there many times. Our past experience covers some of the biggest and most complicated boy-outs to date.

What's more, as a firm of accountants we are independent from all sources of finance and can therefore give objective advice.

So, to help you understand more, we've produced a guide in which we've addressed a number of the more common questions raised by managers.

Send the coupon or telephone Geoff Westmare of 01-248 3913 and well send you a copy at no cost, with obligation and, of course, in complete confidence,

Geoff Westmore, Partner, Corporate Finance Division, PO Box 198, Hilligate House, 26 Old Balley, London BC4M7PL Tel. 01-248 3913. NAME ADDRESS POSTCODE

But then not all venture capital companies are run like Phildrew Ventures.

At Phildrew, we believe providing backing for management buy-outs is about personal relationships as much as money.

So from start to finish, transactions are personally managed by at least one of six partners, not a department.

They work in small teams to keep our lines of decision-making short.

So when quick decisions are needed, we're prepared to make them.

When it comes to finance, we create innovative structures to suit your needs, rather than apply rigid formulas for our convenience. And we have the money to put where our mouth is.

NOT EVERY VENTURE CAPITAL COMPANY IS GOING TO

# SEE THINGS YOUR WAY

With our new fund of £105 million, we can underwrite £37 million of equity in any single management buy-out, and can arrange, lead and underwrite buy-outs of up to £1 billion. So if you're planning a management buyout or buy-in, may we make a suggestion?

### **MANAGEMENT BUY-OUTS 6**

### **PROFILE:KTM**

KTM finalizes its ESOP: I to r, Bob Bretherton, Malcolm Sheppard, Mike Bright, Graham Feistead, Joe Wickham, Pater Cooper

# A big stake for the workers

WHEN Mike Bright was presented with the opportunity to buy KTM - one of the UK's leading machine tool manufacturers - from Vickers, he decided that the Brightonbased company's 265-strong workforce should be able to get in on the act as well. The result was a management buyout coupled with one of the UK's first Employee Share **Ownership Plans** - ESOPs for sbort.

Full details of the scheme have yet to be finalised, but in essence it will be similar to those established at companies such as City Vehicle Engineering (144 employees), Llanelli Radiators (850) and MFI Furnishing Group (6,500). Amid mnch legal complexity, the purpose of which is to appease the taxman, a so-called employee benefit trust is set up as a vehicle to hold the employees' shares.

In the case of KTM, which is being advised by Granville & Co, the merchant bank specialising in small companies, the workforce will acquire an ini-tial 19 per cent of the company's equity capital. It costs them nothing, and later on that percentage could increase.

Bright denies that he is being particularly generous, although the percentage of shares being given away seems high when compared to the 11 per cent that went to the 200 employees of Lydney Products, a former subsidiary of Mallinson Denny, or the 5 per cent which went to workers at MFL The total financing for the acquisition of KTM came to 27m, a figure which includes liabilities assumed by the new owners and an investment of £1.5m retained by the former parent. The great bulk of the until the beginning of the fol-lowing financial year. "The ESOP has borrowed finance took the form of the 25m term loan facility provided by the First National Bank of Chicago. money from Unity Trust to pay

For the purposes of the acquisition, a new holding company was set up, called Flexible Manufacturing Tech-nology Limited (FMT). The total equity investment in this vehicle amounts to £2.2m, of which £1.5m is represented by rowings are repaid, the ESOP preference shares owned by Vickers. These are not convertshares to all eligible employ-ees. For tax reasons to begin with the shares are held in ible into ordinary shares, and are redeemable at FMT's initiative according to a timetable

agreeable to both parties. There are no outside equity investors. Bright is reluctant to five years, you get them com-pletely free of income tax." disclose the precise breakdown between the equity put up by management and that which is to be allocated to the employees, which came to a total of £700,000. The purchase of the employees' shares by the trust beneficial owner, entitled to vote and to receive dividends. was funded by Unity Trust, the trade union and co-operative finance house. Advice on this aspect of the deal was fur-nished by New Bridge St. con-sultants, based in the City of increase. This value will of course not be realisable by sell-

Exchange, but the trust has undertaken to buy the shares if London Bright is adamant that the it has sufficient funds. The function of an **ESOP** is basiprice it will pay will be detercally simple. He concedes, howmined by the company's audiever, that the thing is sometors, and priority will be given what more difficult to explain to those employees who need to employees than would seem to sell the shares for reasons of to be strictly necessary. The essential principal is that hardship. every employee should be given shares in the company

following the achievement of planned trading profits in two her salary and length of continuous service. To get the free consecutive financial years. shares, you have to have been a full-time employee for a mini-New employees will not be allowed to join the scheme a mum of two years on the so-called KSOP qualifying day - the last day of the financial year applicable to the planned

profit which is to be achieved before the shares are to be allofor the shares", the employee's explanatory booklet reads. "FMT will give back some of cated. The company will invite you to take them up. If you don't reply within a certain period, it will be deemed that its profits to repay this borrowing. You are not responsible for paying it back in any way. "As part of the ESOP boryou're not interested.

Certain restrictions apply. You must leave the shares in will give away some of its the hands of the trustees for a two-year "period of retention" as required by law. If you instruct the trustees to sell the trust for you and you will not normally be able to sell these shares for at least two years. If shares or to transfer them to you between two and five years after the allocation date, you leave them in the trust for you will normally be liable to pay income tax on a proportion of the original value of the The booklet explains that shares. although the shares are held in

If you leave your job, and the shares have already been transferred out of the trust, you may no longer keep them. If the trust is not a position to buy them at the market rate, then it will offered for sale to other shareholders. If your shares are still in trust when you leave, you are not under any obligation to sell the shares until they have been

transferred to you. The booklet has not yet been circulated to employees, but Mr Bright reports that - for all the complexities of an ESOP -they are enthusiastic about the idea.

The number of free shares to be allocated to each employee depends on the level of his or

# Involving the employees

ESOPS

TO EMPLOYKES, it must look like a fairly simple proposition. A small management team arranges to buy-out a company, and in the process stands to make a large amount of money. It would surely be simple enough to extend that opportunity to the remainder of the workforce.

Many employees would argue that they would be more committed to the success of the business if they had a direct stake in the profits which might be made. Indeed the erclusion of employees from a buy-out can heighten concern over the sudden transformstion of the company with the creation of manager-owners, z rapid movement towards flota-tion, and then an entirely new set of owners being introduced. But as yet, despite these rea-sons for including employees

in a buy-out, most manage ment teams have been put off by the complexity, and uncertainty of turning a management buy-out into a management-led, employee buy out. In the last couple of years

several consultants, banks and other financial institutions have begin to market a mechanism which meets the employ-

an Employee Share-Ownership Plan (ESOP) at the time of arr-anging a management buy-out. The technique was used ing fast.

recently in the Unipert buy-out, which was twice over sub-scribed by first-time, employee investors The basic mechanism is to

establish a trust, which can huy shares set aside for employees, and then offer them to employees once the buy-out is completed. The risk that employees may not take up all the shares on offer, can be overcome by arranging for institutional investors to underwriting the shares held in the trust

Mr Laurie Brennan, chief executive of New Bridge Street Consultants, which specialised in employee share-ownership plans, explains: "In an effect an extra, but silent institution is introduced to the negotiating table - the trustees acting on the employees behalf." The interest in employee share-ownership plans is likely to be encouraged by a series of developments - the introduc-SOURCe."

However there are still several extremely thorny problems which stand in the way of a successful employee/management buy-out.

Management buy-outs normally involve the manage team taking a relatively small amount of ordinary shares, with institutions investors taking a large amount of prefer-ence shares. If employees are only affered ordinary shares they will be able to invest only a few pounds. Mr Brennan, advises companies go for a mix

low their managers into a dra-matic change of ownership like so many foot soldiers, it is fadof the two. What then is the relationship between the managers, the employees, and the institu-tions. Mr Odgers, who was closely involved in the recent MFI, management employee The banks and other financial institutions have also clai institutions have also changed their approach. Mr James Odgers, furnariy a vice president at Chemical Bank, who recently set up a special company to advise on lever-aged buy-outs, says. "The fris-son which the word "collecbuy-out cautions against man-agements seeing in ESOP as a financial tool. He says. "You cannot just shuff your employees full of shares, use them to raise investment funds, and tive" sends down a bankers spine, these days, is no more than an old-fashioned reaction then leave it at that. The trust has to become a way for corendered by memories of the rent and fatime employees to become involved in the basi-1970s and the ill-starred attempts at worker owner. s. It has to work in tandem with other changes in manage-ment style to get to real gains Those days are being replaced by a growing accepin productivity, motivation and tance that the more an entercommitment. prise's employees are involved at all levels of decision making and reward, the more profit-Most employee buy-outs do

not give employees the same measure of involvement as able that enterprise is likely to managers. Mr Brennan recombe in the long term. Banks are mends that the employees beginning to realise that should get a better deal than employees collectively organinstitutional investors, but not ised could be a substantial and as good as the managers. He argues the important message for employees that

acceptable new customer

ment is getting a better deal because it is on their judgment that the long term success and failure of the business can thmn. Thus employee buy outs should very much be structured as management led. How can amployees be give

FINANCIAL TIMES THURSDAY OCTOBER 13 1988

an exit, so that they can realise the rise in value of the chares? This is where the trust comes in value, not merely as a means to raise initial finance, but to create a limited internal market for shares. If employees leave, they can sell the shares back to the trust.

Mr Odgers believes that an ESOP could also provide an exit route for institutions, which could sell their shares to which could sell diet sums to the employees. In the event of a flotation, the ESOP could be reconstituted to maintain the employee's involvement.

Mr Odgers says: "If the employees hold the shares for a while, then sell them goldkly once the value goes up, you lose all the benefits. The current employees have taken their gains and might lose motivation; the future employeen have no capital incentive for greater effort, because the shares have been disposed.

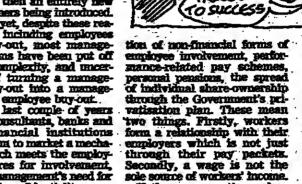

Both Mr Brennan and Mr Odgers, argue that to be successful the ESOP has to be seen not just as part of the initial buy-out but a longer term change in the position of employees. - --

The final difficulty facher an buy-out involving an ESOP is the tax position. Will the scheme win inland Revenue soproval to offer employees tax benefits. According to Mr Odg-ers, this is the main uncer-tenty hanging over the use of ESOPs in buy-outs.

If a company attempts to set up a scheme approved by the inland Revenue this could involve lengthy and restrictive negotiations with tax inspecinrs. If not, employees could be links if not, employees could be linkle to pay income fax on the growth in value of their shares. Rven without the clouity of a project in: position. Mr Bren-

nan is convinced that manager only buy outs are a dying species. He argues: 'The tradi-tional management buy-out is on the way out. It will be replaced with the employee buy-out and pose a new round of challenges for managers and corporate financiers."

# HOW TO BE YOUR OWN BOSS WITHOUT GIVING UP YOUR JOB.

You are an able, ambitious company director with many ideas on how your company can do better.

But you've also got a group board who continually turn down your ideas ('no resources available') and submerge you with paperwork ('in accordance with group policy').

Don't despair. There is a solution that can prove satisfactory to all concerned. It's. called a management buy-out.

What's required?

KPMG

First, a management team with drive and commitment who want it to happen.

Second, a group board willing to divest a company at the right price.

And third, the right advice at the right time to bring it all together.

That's where we, Peat Marwick McLintock, can help. We'll provide objective guidance on every aspect of a buy-out. From evaluating your initial proposals to advising on the negotiations and the tax implications; from introducing you to the right financing institutions (you may be surprised how little money you have to find yourself) to setting up the new systems you'll need to get your newly independent company off to a flying start.

Let us show you how we can work with you to turn dream into reality. Start drawing on our considerable experience by writing in confidence for a free copy of our booklet 'Management Buy-outs' and information on our Seminar on 19th Dec., or ring David Coles on 01-236 8000 for further information.

To: Pest Marwick McLintock, 1 Puddle Dock, Blackfriars, London EC4V 3PD. Piease send me Management Buy-outs and keep me informed.

### MANAGEMENT BUY-OUTS 7

Max Findlay looks at the lawyers' role

Fielding in the slips

MBO LAWYERS agree on one thing: that buy outs are generally erhansting, highly emo-tional transactions (particu-larly in the closing stages when all night negotiations are common) which use up a lot of 

۲<sup>۱</sup>۱

1668

A Care and

- 1717

721,726 

lawyers and support staff. It is after that they divide. For example, ask the question What is an MBO? and Anthony Lewis of Cameron Markby replies: "It's really a corporate acquisition with a few tweaks", adding that "there are not fiendishly difficult areas of law". It is simple answer with a shaft of truth.

But there are other prob-lems. Both Derham O'Neill from Clifford Chance and Alastair Dickson of Dickson Minto agree that "the negotiations are the hardest part of the job for the lawyers."

The bargaining can be four cornered, involving the seller, the management team, the equity financiers and senior

debt providers. For the law-yers, "it's like fielding in the slips at a Test Match", says John Kitching of Lovell White Durrant.

In practice, the seller and the financiers will generally find it caster to walk away from the negotiating table than the management team who are more exposed than the rest. After all, if the deal falls through, it is the managers' futures which are at greatest risk. Hence the emotion. ratchet The role of the lawyers is

central. If the solicitors are acting for the management, then, as one practitioner emisined: "You often end up with people who don't use lawyers so it's all new to them." Then, disputes often arise

over the provision of warranties by the seller as to what the company consists of. There may be arguments about whether the seller ought to give the management some

form of financial support or indemnity for the legal and other professional fees incurred in case the deal col-lapses. There will be negotiations about the structure of the

Legal complications many also arise about the articles of association of the Newco (the company formed by the mange-ment to purchase the target firm or subsidiary being put up for sale). There will need to be skilled drafting of the share

rights and the provisions relating to the transfer of the Transnational buy-outs "can impose severe logistical problems and require careful put-

ting together of legal teams Newco. "It'd be very helpful if and close co-ordination of all the legislators simplified the the relevant jurisdictional requirements" says Tony Hum-phrey of Allen & Overy. Articulating a general view, he adds: "Because of the com-

plexities of international deals, proven experience in this area

Another key difficulty for the lawyers lies in the Companies Act 1985, which generally ing financial assistance (including guarantees) for the purpose of financing the acquisition of its own shares.

 This means that the target company cannot give security for any bank ioan to the in.'

Ashurst Morris Crisp see 1985 Act which is currently so badly drafted and difficult to interpret", commented Douglas Colliver of Norton Rose, Nevertheless, both he and Tony

ford Chance forecasts a greater number of LBOs of large listed commanies and some trans-Enropean buy-outs. "There are likely to be more US merzanine players coming on the scene and US players who want to do the very big deals", he adds. Lovell White Durrant's John **Kitching similarly believes** that "the mezzanine debt market is clearly going to open up Other lawyers suspect that

private", MBOs by "people wi are fed up with the City and would rather run a private company". Allen & Overy see a rosy future for transmittonal buy-outs. Both Norton Rose and Lovell White Durrant coutemplate a growth in one stop shopping, at least for small MBOs, with the equity, mezza-nine and debt financing being provided by a single fund. Oth-ers conclude that "You'll see equity and mezzanine as one but I don't think you'll see bank debt tied in as well."

# THE ACCOUNTANTS A strengthened role

THE TROUBLE with advising on management buy-outs is that you get tempted to have a go yourself. Such a fate over-took Mr Adam Mills, head of corporate finance at accountants Spicer & Oppenheim, earlier this year. Mr Mills did not buy out part

of Spicers' business. He has instead become a director of Drawlane, a business built out of four former National Bus companies and a separate, related acquisition – a buy-in,

rather than a bay-out. "The temptation is quite great if you see a good idea," admits Mr Alec D'Janoeff, in charge of Coopers & Lybrand'e MBO team. "You do see the potential to make a huge

amount of money." Despite this, Mr D'Janoeff and his counterparts at other accountancy firms seem more than usually contented with their lot at the moment. Their position in the buy-out market has strengthened as the mar-

ket has grown. Accountancy firms have always drawn the bulk of their buy-out work from the providers of finance. This has centred on what is known as due dili-gence work (reporting on the financial details) and tax plan-

ning. Now they are much more likely to be called in by man-1949 - 11 122 MB 124 nt teams thinking of putting an buy-ont together. According to Mr David Carter 1. 13. 10 at Peat Marwick McLintock.

ably 30 per cent. Part of the reason for this change is the amount of finance chasing the relatively equity stake than they might expect. Mr Ian Krieger, head of Arthur Andersen's MBO team, has just pulled off two deals in which managers retained sub-stantial stakes: Davis Shopüt-ters, an £8m buy-out in which the management team took 89 per cent of the equity, and LHT Anodising Group, a 24m deal in which the managers took all the equity. The availability of a range of finance makes this

type of arrangement possible, says Mr Krieger. The accountants are obviously keen to encourage man-agers to sound them out before approaching financiers. They are all prepared to spend an hour or two looking at an idea, though they tend to be choosy about the projects in which they invest more of their time than this.

"The economics of this business are difficult," says Mr Krieger. "If you take the false starts with the successful ones, it doesn't make a profitable business overall." Future work for the new company, usually including work as auditor, make up for these costs.

While keen to work for man-agement teams, most accoun-tants still prefer to leave it to managers and financiers to agree on terms. "Investors resent having a package pres-ented to them on a plate," says

Mr Carter. "The institutions don't like accounting firms getting in the way. We just light the blue touch paper and retire," says Mr Geoff Westmore, in charge of MBOs at Deloitte Haskins & Sells. This is substantially differ

which has the largest share of the UK huy-out market, work for management now accounts for 40 per cent of his buy-out ss. Last year it was probent from the approach of Mr Westmore's Deloitte colleagues to merger and acquisitions, an area in which they like to negotiate deals. few viable proposals. Some managers can afford to pick Involvement with management teams presents questions of potential conflict of interest and choose, and are using accountants to organise beauty a concern that is becoming depressingly familiar to multiservice accountancy firms. How can they act for both financiers and managers on

side investors," says Mr D'Janoeff.

That often leads to the use of separate advisers. In the 5600m buy-out of Reed's non-publish-ing interests, which has kept Mr D'Janoeff busy for several months, the managers were advised by lawyers Slanghter & May,

A second potential conflict is

agement team, it is wrong for an accountant to handle the dne diligence work for the financier. Such an arrange-ment would lead to the accounwhat you're buying and you can help the management to get a grip on the buy-out them-selves." tant reporting on figures he had been instrumental in presenting.

long run, it is bound to prosper.

come to us for financial backing you must have a good business plan. But important as it is, the business plan is not the crucial factor in our decision. What we are really investing in is you. Your abilities. Your energy. Your determination to succeed. In return, we'll offer you something more powerful than mere money. Moral support. A new management team (whether buying-out. or buying-in) need to know that their backers really do have faith in them. That they're not going to get twitchy every time there's a blip in the profit forecast. After all, dozens of things can happen to jolt the most carefully laid business plans. Who could seriously have planned for the effects of Chemobyl? The Piper Alpha disaster? The night of 15th October 1987? Or the following Monday? These are extreme examples. But when problems strike, in whatever form, the last thing you need is pressure from your financiers. A good management is a good management. It will recover. In the

llial That is why at Electra, we back you, not just your plan. Because not the plan フフ we beliève in you, we will support you to an almost unprecedented extent. But we're not absentee financiers. We are prepared to work very hard to help you meet your objectives and to make money for both of us. We like to be friendly and unstuffy too. Since our business is backing entrepreneurs, it obviously helps that we're not a vast bureaucracy ourselves. We move quickly and you will know us all by our first names. Yet we are well respected in the City and have a wealth of experience in both industry and finance to know exactly what we're doing. Now we'd like to know what you're doing. If you have a good idea, the courage of your convictions, need capital backing and would like the support of people who believe in you, call David Osborne or Hugh Mumford on 01-831 6464.

### **MANAGEMENT BUY-OUTS 10**

FINANCIAL TIMES THURSDAY OCTOBER 13 1988

West Germany has yet to undertake large-scale deals

# **Music of the future**

EVERYONE SAYS it is just around the corner, but few have yet to do many deals. To borrow from the vernacular, large-scale management buyonts in West Germany remain very much Zukunftsmusik music of the future.

Some think they have heard the first bars. A number of management bny-out teams have already been set up in Germany, some of which have already done business.

There have been some 30-50 buy-outs in Germany so far' estimates Mr Christoph Neizert, a specialist at Bankers Trust in Frankfurt. But gaining a precise figure is virtually impossible, as many of the deals are not publicised. Estimates for this year vary between 8-15 transactions.

However, most of the busi-ness remains "klein aber fein" - small but high quality according to the experts, with last year's DM100m buy-out the European machine tool division of Ex-Cell-O of the US still

the biggest transaction so far. But few specialists have any doubts about the potential in Germany. The country has some 20,000 small and medium-sized family companies with sales of over DM5m, all of which are seen as possible buy-out candidates. The products are good, but distribution and sales channels are not always entirely up to scratch, and there is often potential for consolidation.

Persuading good managers to turn into entrepreneurs is not always so easy, however, There are not yet that many risk-orientated, dynamic managers who want to become owners", says Mr Neizert. "The sense of change is certainly there, but things are going very slowly

German buy-out specialists fall into two groups. The majority provide both edvice and equity capital for deals. The biggest of these is J Henry Schroder, the UK mercbant bank, which set up a DM140m Hamburg-based management buy-out fund almost two years ago - the first of its kind in the country.

Its boss, Mr Thomas Matzen, is very confident about the future. The business has "really started to grow", he says, and Schroder has notched up deals worth DM300m so far. Although transactions have generally been small, he

subsequent flotation.

Mnnich.

expects the size to start creepgroups", he says. The aim is to reduce the vulnerability of ing up soon.

Among the ventures he has on hand is to float Ex-Cell-O -whose hny out Schroders' for synergy in areas like distri-bution and purchasing prior to financed - on the stockmar-ket. The likely size of the deal, which may take place in mid-1969, remains unclear. "but it will be more than we paid", he says confidently.

There are also two more amhitious plans in the pipe-line, both involving buying out selected companies in the same industries, which combined and rationalised, would subse-quently be floated.

Thus at the end of last year. Schroders financed the buy-out of Hein Gericke, a retail motorcycle accessories chain. Since then, it has bought the group's main competitor, and hopes to close the buy-out of a third. group in the same field by the and of October. The combined unit, which

Mr Matzen hopes to float in end-1969 or early 1990, would involve a "much larger" sum than the DM100m spent on Ex-Cell-O, he says.

also have embryonic German Schroders is also planning a huy-out operations - though similar path for a group of often as extentions of their companies in the textiles busi-ness. It has helped to buy out growing domestic corporate Brandt, an old-established finance teams, And German banks have also woken up to buy-outs, with Deutsche Beteimens' onterwear and sportswear concern and has recently closed a deal on another textile firm. Although that will not be ligungs, a subsidiary of Deutsche Bank, probably the fureffective until the end of this thest ahead year, Mr Matzen is now on the tions, such as Bankers Trust, look-out for a third company in the same industry. are concentrating on the debt

side of the business rather than getting directly involved in providing equity stakes. Yet despite the widely-re-

ported increase in business -and the exponential rise in the number of glossy magazine articles about it - buy-outs still suffer from a number of constraints in Germany.

The first is attitudes. As with takeover bids, selling companies is still seen as slightly "dublous" by many conservative financiers and businessmen, with the unstated implication that the company concerned may be in trouble - thus warranting the special treatment.

Education and information are also still drawbacks in some areas. "We are still in the Kindergarten phase" compared to experience in the US and UK, says one specialist. The lack of expertise on

buy-outs applies much less to big city bankers than to managers or owners of small compapies or officials in the banks' local branches with which the companies themselves deal. The seminars on buy-outs are always full, but they're always full of bankers from the big

cities", notes one specialist. "People from small companies themselves are seldom there". Lastly, tax considerations have confused the picture somewhat. On the one hand, Germany's major tax reform due for 1990 has indirectly spurred interest recently. The tax reforms mean that private individuals selling their com-panies will no longer be entitled to the 50 per cent tax break on top marginal rates on profits from the sale as at present.

Thus a large number of entrepreneurs - especially those facing succession problems - have become interested in selling out before the tax change bites. Buy-out specialists expect their activity to perk up even further as the 1990 deadline approaches. But "there is nothing in the

1990 tax reform package which will stimulate the buy-out busi ness or make it more interesting" either, according to one specialist. As a result, Germany's slowly, slowly approach to buy-outs looks set continue, even if there is a short spurt in the months ahead.

Haig Simonian

•• • • • • • • • • • •

A fertile environment IN FRANCE they are called

FRANCE

"rachate d'entreprises par les salaries", or just RES for short. During the last four years, management buy-outs and leveraged buy-outs have become increasingly common in France, reflecting the broad economic changes that have taken place in the country as a result of the deregulation and modernisation of the French financial markets and of the economy in general.

The development of the buy-out business is also a reflection of a profound evolution in bit a probability evolution in French business thinking and culture which has occurred during the last few years. By the end of last year, there

had been about 200 separate management huy-out operations in France - more than in any other single country in continental Enrope. "France has traditionally fol-

lowed the trends set in the US and the UK," remarked a French management buy-out specialist. "But we have often followed before the other continental European countries."

The buy-out business has continued to expand this year with a number of large buy-outs including the FF7.1bn buy-out of Darty, the electrical retailing group. This has been by far the biggest leveraged management buy-out to have been engineered in France so far. Even though the Darty operation provoked considerable controversy because of the

opposition of some institutional investors with minority stakes in the company, the deal has clearly helped to establish buy-outs as increas ingly commonplace in France. Other large buy-outs have

been lannched this year includof the Pier Import retailing group. Earlier this year, Mr Jean Mantelet, the founder of Monlinez, the French kitchen eppliance group, also announced plans for an unusual form of delayed man-agement buy-out whereby control of the company would be

acquired by the group's manment and employees after his death. The Moulinex case illus-

why France provides a fertile environment for management buy-outs, French business and industry is increasingly facing management succession probmanagement succession prob peripheral activities and man-lems as their founders or chief agement buy-onts have

emerged as an attractive solu-tion in some of these restruct-

This strong potential market

for management buy-outs has been further stimulated by the

combination of French govern-ment incentives and the

remarkable change that has taken place in recent years in French business attitudes.

"During the last few years, the French have started to dis-

cover the Bourse. This public awareness of the equity market

has been especially boosted by

uring cases.

executives reach retirement age. According to the French national statistics institute, INSEE, there are about 10,000 small and medium-sized companies employing between 50 and 1,000 workers each which will face a succession problem or will have changed ownership between new and 1990. Moreover, the difficulties in finding a successor when a small company chairman dies or decides to retire are estimated to cause about 10 per cent of French bankruptcies.

> France has traditionally followed the trends set in the US and the UK

the previous right-wing gov-For this reason, the French authorities have encouraged the development of buy-outs as ernment's privatisation programme," explained another French buy-out specialist. The a device to provide continuity development of the "second market", the French equiva-lent of the unlisted securities in the management of the country's small and medium-sized business sector and try to reduce the risk of small compamarket, has also boosted ven-"Another important factor is of nies disappearing because the failure to find a relay to its the growing awareness among

This has often entailed spinning off less profitable and

Legislation to encourage managers and employees to

take over their own busin was first introduced by the Socialists in July 1984 as part of the government's efforts to help strengthen the capital here of strengthen the central base of French industry and address the country's particu-larly delicate business succes-sion problem. But the 1964 law, which provided substantial tax concessions for management buy outs, proved disappoint-ing. The heavy bureaucratic constraints of the original law constraints of the original law turned out to be a big obstacle and the subsequent right-wing government of Mr Jacques Chi-rac modified the buy-out legis-lation last year, before it was swept out of power by this year's Socialist election vic-

year's Socialist electron vic-tory. The revised legislation reduced the original level of tax concessions in the 1964 law. But it also cut beck on all the administrative red tape making the system much more attractive. At the same time, the former right-wing govern-ment also changed its corpo-rate tax rules to allow consolidation of group profits and losses. This has had important implications for buy-outs where a new company is cre-ated by the bay-out team to bid for the existing business.

This has been the case of the recent Darty buy-out where Financiere Darty, the buy-out consortium, principally composed of senior managers and the Darty family, have acquired control of more than 95 per cent of the Darty operating company. Under the new consolidation provisions, the group after passing the 95 per cent harrier can now offset the interest payments on the buy-out consortium's debt against the tax payments of the operating company. However, it is under the French regulations committed to this status for five years and may not merge the two halves during this period.

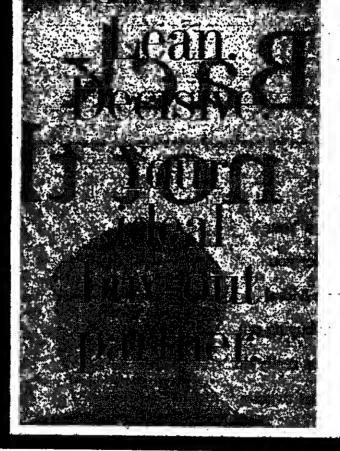

The arrival of the new Socialist government this year is not expected to have any adverse impact on the general buy-out trends in France. Indeed, the new government is committed to the principle and has proposed in its latest budun-sized business sector. More and more young people are attracted to this sector which was certainly not the case in the past," explained Mr Jean-Jacques Caussin, a partner of Cimind Chance in Paris.

Potential Made Possible

XII

"LEVERAGED boy-oots offered by buy-outs. Indeed the (LBOs) are going to rejuvenate Italy's family businesses," pre-

eral manager at Citicory's Mergers and Acquisitions Department in Milan. "Family concerns predomi-nate in Italian industry. So instead of management buy-outs, we will probably be see-ing family buy-outs here."

dicts Mr Dante Razzano, gen-

Mr Razzano points to the scarcity of listed companies as a factor determining the kinds of operations which will be undertaken in Italy. With only 204 names on the Milan stock market at the end of 1987, and many of these large groups or state controlled, buy-outs of qooted companies are not expected to generate much action. Instead the focus is on the medium sized privately-

form Italy's business fabric. Manufacturing industry flourished in the hands of dynamic entrepreneurs, recon-structing the ecooomy and building their own businesses during Italy's post-war eco-nomic miracle. Their family firms are now passing to third and fourth generations. Weak-ening ties or increasing differ-ences between family members are the factors which are opening the way for buy-outs. With the US and Britain

trail-blazing and the lessons of their experiences now being transferred, businessmen in Italy are only now becoming aware of the possibilities three Italian cases which are generally cited concern boy-outs which were successfully

completed this summer. However, the story of buy-outs in Italy started at the beginning of the decade when managers purchased control of Reconta, a major accounting firm. "Mediobanca established Reconta in 1961 and the firm

immediately forged links with Touche Ross. Initially we were mainly engaged on referred work, auditing the Italian sub-sidiaries of TR's British and US clients," recalls Mr Bruno Gimpel, now senior partner of Reconta Touche Ross. Matters changed signifi-

cantly, however, when obliga-tory external sudit was introtory external such was intro-duced for quoted companies and subsidiaries of the state holding corporations at the end of the 1970s. Questions were then raised as to the propriety of a merchant bank, itself owned indirectly by the IRI state holding corporation, coo-

trolling an audit firm. "The crux of the problem was the audit of companies in which Mediobanca had share-holdings," explains Mr Gimpel. Indeed in May 1980, Italy's companies and stock exchange commission Consob ruled thet Reconta should not aodit Mediobanca investments.

A solution was quickly found. The British firm TR acquired Reconta from Mediobanca at the end of May 1980. This was a bridging phase in

the management January 1 1981 Reconta's 13 January 1 1931 Recontra's 13 managers bought 75 per cent of the firm from TR in London. The cash deal cost the Italian partners the same amount as TR had paid Mediobanca. As a Mediobanca subsidiary

Reconta had been a joint stock company with share capital and reserves amounting to L700m. The sum paid by L700m. The sum paid by Recoota'e managers was this net worth figure, plus a consid-eration for goodwill. "Most managers had sufficient sever-ance pay to cover their shares in the buy-out. Those whose resources fall short had no dif-ficulty in obtaining bank loans," Mr Gimpel says. The Recoute TE case was The Reconta TR case was

exceptional, imposed by unusual circumstances. Uotil this year. management buy-outs in Italy remained out of fashion. But widely reported operations involving Petrini, Rimoldi and Fata have revived interest. Citicorp was involved in two of the three cases, which are the first of what Mr Razzano considers wili provide good business for some financial institutions and a healthy

says. "The business was jogging shake-up for industry. Petrini, a Perugia company with \$250m annual sales from

**MANAGEMENT BUY-OUTS 12** 

David Lane looks at Italian business trends

animal feed, stock farms and pasta, was at the fourth gener-ation of family management. "Ownership was shared between five different family groups. But this was made even more complex by the presence of 10 Petrinis in oper-ational positions," Mr Rezzano

along, but really going

too high. A solution which sat-isfied everyone was an LBO offer from Mr Carlo Petrini. Mr Petrini's stake in the family business was 25 per cent. With an offer of about \$60m he took full control. "We completed the operation remarkably quickly. By the beginning of August, only six weeks after taking the LBO decision. Mr Petrini had bought out the other members of his family," Mr Razzano recounts. COLOR DESIDE Citicorp was involved in three ways. First, Mr Bazano's Mergers and Acquisitions Department provided advice and overall management for the operation. Second, with Continental Illinois and San Paolo Finance, the bank's vennowhere and lacking strategy

Citicorp had been involved with Petrini's new pasta fac-tory in Missouri and the parent company in Ealy turned to as earlier this year for ideas," says the bank's executive. The advice was to sell to outsiders or be bought out by insiders. Fundamental aims were to

parts of the bank involved. Mergers and Acquisitions earned fees, calculated as a percentage of the deal. The seven-year loan generates interest income and there was a fee for underwriting the

family groups. Despite stable profits and substantial cash flow, interest from outsiders was low - the price asked was too high. A solution which sating the option to buy, and that the bank then expects to realise a capital gain. Two other LBOs have been concluded in Italy this year. concluded in Italy this year. Citicorp's second operation ranks as a true management buy-out, company managers purchasing Rimoldi, a manu-facturer of industrial sewing machines, from Rockwell, its US parent. The total consider-ation: amounted to 1155 Sup ation amounted to L156.5bn (about \$102m) with the manage-(anon: \$102m) with the manag-ers obtaining 20 per cent of the equity with cash, and being supported by L96bn of senior debt and L35.5bn of subordinate debt.

The Rimoldi operation, which the managers won with a closed bid against at least two other contenders, was completed in June. "Seventeen managers participated in the deal, a number which Italian ture capital group took a 27 per cent stake in Petrini. Third, the leveraged capital group organised senior debt (floating at somewhere between 1.5 and 2 per cent over interbank rate) superstition rates as most insuspicious," says Mr Carlo Brambilla, corporate finance vice president at Citicorp. He considers, however, that Rimoldi, which had been defined as peripheral to Rock-well's core business, ought to

equity," Mr Razzano explains, He adds that Citicorp will eventually dispose of its stake in Petrini, with Mr Petrini hav-

LEO this year involved a mul-tinational. In July, managers at Turin engineering company Fata bought a 28 per cent stake from the British parent FKI Babcock, in an operation worth L130bn. Interim financing was pro-vided by San Paolo Finance

vided by San Paolo Finance and Compagaia Finanziaria Ligure Plemontese which took large temporary stakes. At the end of last month the Finnec-canica engineering group of state holding corporation IRI acquired 28 per cent of the share capital. And the two hanks expect to reduce their holdings still further through seles to other investors.

Like Rimoldi, Italy's third

sales to other investors. "Subsidiaries of multipation-"Substanties of multiplattics" als, perhaps those which are under-performing, will proba-bly provide some buy-out pro-tagonists. But most will be family businesses," says Mr Razzano, He argues that 1927s the market presentes will Razzano, he argues that 1827s single market pressures will cause a search for greater effi-ciency in Italian industry and that family buy-outs will be seen as one way to rationalize. Leveraged buy-outs have aroused controversy during the past year. But Mr Razano describes the attacks on the legality and ethics of LBOs, like those made by Fist lawyer Mr Franzo Grande Stevens, as bizerre. While Italy is still short on experience of LBOs, it is long on possibilities. And Mr Razzano is convinced that these will be exploited in the next few years.

A LOT OF money is currently chasing few deals in the US leveraged buy-out market which makes the LBO game an aggressive and difficult one to lay. But it shows no signs of

۳.

A CALLER CONTROL OF CO

WE ARE

After grinding abruptly to a balt after last year's stock market crash - leading several commentators to ring the death knell of leverage and the iunk bonds that finance it -LBOs have been very much in the news this year and the buy-out market has heated up as the stock market has sunk into its current torpor.

The value of LBO deals mooted this September has already exceeded the LBO volthe and this frenchic pace abows few signs of letting up. If any-thing, the LBO market is set to become even more cui-threat and highly leveraged as debt-hungry investors seek out a declining number of ripe deals. Indeed, Kohlberg, Kravis, Roberts & Co, the doyen of

**Difficult but popular** LBO firms, stands poised to make a hostile bid for Kroger, the giant Cincinnati-based food retailer, after the company has firmly rejected separate bids from KKR and the Haft family. This would be an unprece-dented step for KKR - which bence scep for AAK - within has traditionally acted as a white knight stepping in to help a company's management rescue it from a rather - and would take the LBO game into a whole new sphere.

The metamorphosis of KKR itself is indicative of the LBO scene in general. Founded by three colleagues from Wall Street investment firm, Bear Starns, in 1976, KKR's LBO activity has been such a suc-cess that it now controls a size-able chunk of corporate Amer-

PROFILE: REVCO

Fatal consequences of debt

ica - some 23 companies in all - including such heavy-weights as Beatrice, the diver-sified food group, and the big-gest US glass-packaging maker, Ovens Illinois.

A lot of money is chasing deals in the US

The firm has gone from having to struggle to raise the debt financing it needed to control-ling a war chest of some \$5.6bn for new deals, which, with a leverage factor of 10 to 1, gives KKR funds enough for over \$50hn in new purchases. The LBOs have made the fortunes of the firm's three founders. However, as newcomers have crowded the LBO scene, and deals have become harder to find, KKR has experienced

its internal differences on where to go from here. The huy-out firm has started to

adopt a much more aggressive stance than it previously favoured - leading to the defection of one of its original leaders to found a more tradi-

tional set-up. KKR has started to build up "toeholds" in prospective buyout candidates by acquiring small stock holdings in them. in March, the firm announced it had acquired a 4.9 per cent stake in oil giant, Texaco, which it said if was consider-ing raising to 15 per cent. These toebolds could speed the progress and lower the cost of potential management buyouts, KKR reasons, but it also injects a much greater degree of hostility into the LBO mar-KKR has changed its

approach as it has faced approach as it has lacen intense competition in the LBO market. The growing pool of capital that is swiring round the market is bidding up prices for LBO candidates and inflat-ing the uplue of some commening the value of some companies far beyond their worth. hied far beyond their worth. Wall Street was surprised in May by the high price KKE agreed to pay in the manage-ment buy-out it arranged for Duracell, the battery-maker, from the Kraft food group. The bids for the battery-maker ranged by around \$500m from the bottom with KKE agree. top to bottom with KKR agree-

ing to pay \$1.8bn. The frenetic activity that currently characterises the LBO scene is partly prompted by a last-ditch attempt among investors to buy into LBOs in the remaining months of the Reagan Administration, which has done little to curb the megadeals of the last eight years. A less laissez-faire Administration may not treat the leveraged market so leniently.

Buyers in an LBO typically Buyers in an LEO typically make their money by having access to huge profits made by their debt-ridden target com-pany, paying off debt by strin-gent cost-cutting and the sale of assets. However, this loads companies with huge levels of debt that they may have diffi-culty paying off should eco-nomic conditions change. In July the first LEO follows

In July, the first LBO failure - the \$1.2bn bankruptcy of Revco Drug Stores - did little to dampen the LBO fever. Indeed, there currently seems to be no limit to the amount of leverage some companies are willing to take on. willing to take on. ting more money to management buy-outs than was raised in all of 1985. To be sure Revco suffered from a constellation of unique circumstances, including an overconfidence that may have warned others. But it also showed that errors can have fatal consequences when a company is burdened with the kind of debt needed for a management buy-out. The prospectus Salomon Brothers prepared for the December 1986 Revco deal ALL - MINTERS

assumed a profit increase of 42 per cent in 1988 on increased sales of 13 per cent to cover the \$140m annual interest pay-ments. In the event, sales rose only 7 per cent and the com-pany lost \$59m in its fiscal year ending May 31, 1987 and nearly \$100m in 1988.

WHEN REVCO D.S. declared bankruptcy in July, only 19 months after a \$1.3 bm manage-ment buy-out, the 2,090-store drug retailing chain raised the spectre of collapsing leveraged buy-outs throughout the Amer-ican economy. "Where junk bonds are concerned, there will be many more Revcos", declared Theodore Forstmann of Forstmann Little & Co. an The management buy-our turned out to be more expen-sive than anticipated when a rival hid from Herbert Haft forced the management group to raise its bid from \$36 to \$38.50 a share. Salomon confi-dently predicted that the deal would be financed from selling the non-pharmacy business the non-pharmacy business like Odd Lot, even as the company opened 100 new stores in two years. Faced with greater competi-

tion from other retailers, including supermarkets' which started to carry drugs and vitamins, Revco changed its mix of merchandise. It moved into televisions, VCRs, and self-as-semble furniture. None of the non-drug businesses were sold, and Revco changed its strategy

from "everyday low prices" to weekly specials. Pushed at a board meeting to accelerate the needed asset sale, Mr. Dworkin lost his chief executive post in March, 1987. Mr William Edwards, his replacement, started re-arranging the stores to put the pre-scription dispensing at the back and lure customers through the stores, a major change that demoralized staff, cut customer loyalty and undermined the Christmas sales effort.

As the problems mounted, banks reduced the company's credit line, further stretching When it skipped a \$46m interest payment in April, Mr Boake A Sells, the company the resources needed to stock shelves and pay boudholders. Short-term solutions sacrificed customer service to debt ser-vice. The company reduced its chairman, feared that suppliers would withhold goods for the all-important Christmas season. "If they leave me, I'm drug inventory and eliminated staff training. When it mounted a major advertising Chapter 11", he admitted, referring to bankruptcy proceed-ings. In the event, bondholders pulled the plug on July 28 when they refused to postpone demands for the missed intercampaign to announce new merchandise, it did not have enough inventory to meet cusest payments, as a prelude to a recapitalization being organtomer demand. Another management change in June 1987 brought in Mr Boake Sells, former chair-man of Dayton Hudson Corporation, the book and depart-ment store chain. He admitted, "I didn't understand the cash flow problems of Revco during the recruiting process". In July, Magten Asset Management Corporation, a company that invests in potential turn-arounds like Wickes Cos. and arounds like Wickes Cos. and Penn Central Corp., bought just over 13 per cent of Revco bonds at 50 per cent of their face value. Mr Tally Embry, managing director of Magten, helped push the company into hendemater when he refused neiped push the company into bankruptcy when he refused more time for interest pay-ments, telling management: "If Revoo can't pay the interest on these bonds, I'm coming to take the house: I own the company". The company has improving prospects for emerging from hankruptcy. Mr Sells is going back to the core dispensing business, reducing the number of stores, and offering more fit-ness and health items under Dworkin's son Elliot, a Revco buyer, of overpaying for unneeded merchandise. The young Dworkin and the Odd the slogan, "Look good, feel good". He is improving the inventory control system, while establishing a new \$145m Lot executives all left the company. Revco could not handle the Odd Lot business, finding itself saddled with millions of

ized by Drexel Burnham Lan-bert, which had replaced Salo-mon as the company's bankers. Revco's problems were accelerated but not caused by the management buy-out. While it was known as a high-flying retailer that had enjoyed 20 years of uninterrupted growth, going private was in some ways an effort to fend off difficulties. In 1983, the company's shares plunged on news that its Vitamin E supplements were implicated in the deaths were implicated in the deams of 38 infants. Fearing take-over, Mr Sidney Dworkin, the then chairman, arranged the take-over of Odd Lot Trading, a 70-store chain of highly dis-counted discontinued or overstock merchandise. The \$113m deal soon turned sour when the Odd Lot principals, Mr Ber-nard Mardin and Mr Isaac Perl-mutter, who had been close friends of Dworkin, accused friends of Dworkin, accused

essons of an in-house bid much more difficult. In the

radio communications group. And, more recently, Mr Harry Goodman has taken the holiday gronp, International Leisure private, with a pore cash offer

Perhaps, given the rip-roar-ing hull market, it is not sur-Since then, there has been a management hid for engineer-ing group, Haden, which was already facing an unwelcome prising that so few transac-tions should take place. While shares trade on heady multioffer from conglomerate, ples, the value to a company of Trafalgar House. In 1986, the management of USM-traded quoted paper - for transac-tions, cash-raising and so on -Air Call, made a successful is quite obvious and funding for a management bid that

wake of the October crash, the appeal of a quote is somewhat less evident, and certain draw-hacks - the need to meet external shareholders' expectations with steadily rising income and earnings, for example - spring to the fore. In many ways, then, the Glass bid could be viewed as the start of

to end-September 1987. The figures were anything

the new trend. Here, though, there were complicating factors. True, the shares suffered fairly badly in the crash, falling from a high

14.58p. That said, dividends rose modestly and although the first six months of 1987/8 were described as poor, Glass held out the prospect of a more satisfactory second half. It had behind it about a decade of steady, if undramatic profit

Despite the failing share price, the company maintains that thoughts of a management hid did not surface until it received a tentative approach from another company. The company's finance director, Mr John Bingham, was a natural party to those discussions and, in the light of board's willing-ness to at least listen, asked for permission to look at the possi-bility of a management bid. The other prospective hidder eventually backed off, but by then the management team had formed its own proposals. The Dryvale offer was 240p a share in cash, and 117.5p per

preference share. Together, they valued the total share capital at £47.2m. Funding for the offer - arranged with the help of Schroder Ventures adopted a typical management buy-out structure: £1.4m of ordinary equity, £14.8m of pref-erence shares, £9m of mezzanine loan stock and a Standard Chartered bank loan facility of

willing to offer merzanine-type funding because the new requirements simply force them to get their returns up,"

FINANCIAL TIMES THURSDAY OCTOBER 13 1988

the says. "Mezzanine funding gener-ally offers a premium of about 4 per cent over the bank bill rate, compared with lending to major corporates which might yield one or two per cent over the bill rate. I've had talks with several banks who, now that they are not funding so many listed entrepreneurs, are prepared to put up increasing amounts of merizanine funding. especially as this usually also entitles them to some equity."

The Fakrum 11 fund tends to prove this point as it incor-porates a linked but separate mezzanine fund led by an offshoot of the Bank of New Zealand. Mr Wilson says perhaps the most important change of all is that Australians are only just starting to believe that successful MBOs are possible. It is a chicken and egg situa-

tion where advisers can point to only a handfol of small deals which have seen investors have exit at high profits. Until some bigger, more conspicuous deals are consummated, many investors may remain uncon-vinced about the technique. So a large part of the MBO practitioners' job is still to educate

whether the bld premium.

Also, there is question of why the same management

strapped with a fair amount of additional debt will be able to

Australian business about the logic of buy-out techniques.

Often the biggest problem Often the biggest problem for owners and managers is psychological. A prime exam-ple is last year's ASL/Im take over of ACI International by BTR-Nylex. In essence, the highly-leveraged deal used to buy the company was initially put to Mr David Brydon, the former ACI managing director. former ACI managing director, as a management buy-out, but was rejected. Mr Brydon then saw almost the same deal used by an outsider to put him out of a job.

In a much smaller recent transaction, the A\$5m pur-chase of a small part of Alcon of Australia's business by Unalex Pty., the buyers weri to great lengths to hide their identity from the vendors for fear they wouldn't deal if they knew the sale was to manage ment

Mr Wilson sums up why this must change in simple, if cyni-cal terms. "Essentially, we're catering to the greed factor," he says. "This year DBSM real-ised its investment in its first MBO, Austoft Industries, for almost 20 times its initial out-lay after only 18 months."

Bruce Jacques

did not think that the price offered by Dryvale sufficiently reflected the company's prospects. Meetings and discus-sions ensued, but eventually Dryvale set a final closing date - beyond which Scottish Amicable could only hang on as a minority shareholder.

When it finally conceded just ahead of the closing date - that its own clients would not be best served by further resistance, Scottish Amicable said that it hoped its stand would serve as a warning that it would not be a "pushover" in such cases.

cially after Glass emphasised that the trading picture - far from improving - was actu-ally worsening. "In recent Nevertheless, institutional weeks, important developattitudes and the precise pric-ing must now be factors upperments on which our expectation of recovery depended, have been further delayed and most in the minds of other cents considering simuncertainties regarding our ilar hid moves. Enthusiasm on future....are proving to be an the management side does not seem to be lacking: since Glass Glover, there have been a numimpediment to our strempts to secure new business," argued the chairman, Mr Alick Glass. For all and the

1 2 ÷

Bruce 1

team was short of some key players and its members did not between have a full enough range of managerial skills. When people with exactly the right credentials turned up looking for a business to buy into, the team became worth hacking. The story is instructive on

several points about management buy outs in the North of England. There have been plenty, possibly hundreds, in the last few years but whether they can take place at all has much to do with where in the North they are. For the North is not a homo-

geneous cluster of communities somewhere above Stokeon-Trent. It is three economic regions - the North-West, Yorkshire and Humberside, and the North-East and Cum-briz. Not only is each different from the others, but there are considerable variations within each one, between sometimes

powerful sub-regions. The key to what might be called the buy-out potential of each sub-region is economic structure. The central areas of the North are based on the

MANAGEMENT buy outs may be the financial technique of the 1980s but Maccess, the automotive parts distributor, is perhaps the ultimate MBO enthusiast. Its management has arranged a buy-out not once, but twice. The dual MBO raises inter-

esting theoretical questions. If the idea behind an MBO is to give the managers freedom from central control and greater incentive to perform, how much more freedom or incentive does the second MBO give the management than the first?

And is there as much poten-tial for profit for those institu-tions who back the second MBO as for those who backed the original deal? A second leveraged buyout at Playter, the US lingerie group, has prompted speculation that managers will continue gearing up with debt every few years until the whole structure collapses under the burden of interest payments.

Not everyone would agree there is more risk in a second MBO. Mr John Foster, a man-MBO. Mr John Foster, a man-ager at the Leeds office of team had around 20 per cent of

roughly along the MS2 from its junction with the MS in the

west to the Al in the east. This is where the economic basa is broadest, apread between many industries and balanced mixture of different-sized companies. There is a

preponderance of mediumsized to small businesses, many family-owned, where managements possess all the skills needed to run an enterprise, The outer areas of the North

- and particularly Merseyside and the North-East - have narrower bases. Large indus-tries were once predominant, and there wers too few of them. A preponderance of big employers encouraged dependence among the general workforce, not entrepreneurship. Regional aid policies of the past compounded this by encouraging branch factories. Mr Chadburn says that most

branch factories are not good candidates for buy-outs. They will usually be strong on pro-duction management and cost accountancy, but weak on sales, marketing and strategic

anced team, and these are more likely to be found along the central section of the M62 corridor, where there are hundreds of businesses turning over about £5m a year and making about £750,000 a year in pre-tax profits.

County Nat West Ventures, which put together Maccess's second buy-out said: "Wa analysed the deal from first princi-ples. The company was significantly stronger than it was at the time of the first deal; it has performed very well and is very profitable." Maccess' first buy-out occurred in August 1986 when

Activity in the North is increasing again

**MANAGEMENT BUY-OUTS 15** 

# When equities are flat

There are exceptions to the rule but the position is under-lined by Mr John Wall of Price Waterhouse's Newcastle office. The stable or emergent medium-sized business in the North-East has a turnover between £3m and £5m and makes between £800,000 and £500,000 pre-tax.

He recently analysed corporate transactions - sales or acquisitions - which had been reported by the region's news-papers during the last few years. There were 174, but only eight were management buy-outs. Some had gone unre-ported but checks with Northern Investors, the regional venture capital fund, and 31 revealed only 10 more. This contrasts with the experience of Rickitt Mitchell and Partners, the Manchester finance house which can claim with some justification to have invented the corporate finance

boatique now being copied in the City. Rickitt Mitchell's most conspicuous attempted deal did hot come off - it advised the management of Land Rover on its attempt to buy out the busi-ness - but it already had a wealth of experience behind it. It has acted in 15 successful

atios were running at 18. A nore realistic pricing level now obtains. "Rule of thumb is that private companies sell at five or six times pre-tax profits, giving a P/E of 7.7 to 9," Mr

Rickitt says. If the price is right and the management team has a full complement of skills, "there is no trouble in raising money for MBOs," he says. About 40 per cent of deals have been based ouclearing bank finance in the form of loan capital. Mr Rickitt has also evolved

an interesting modus operand for buy-outs. He says: "We think there are rules and peo-ple get it wrong. Managers are encouraged to put too much of their own money in. This is ccezy. We want their minds on their businesses, not paralysed by worry about losing their area. houses.

"The secret of getting the buy-out team working well and succeeding is not to have too much from the managers. Our experience has been that you can stand a much larger degree of leverage - borrowing -than people think.

"From our own point of view market moves. It starts with we have also felt it right to make no charge for failure. edium-sized companies rais-Land Rover cost us £22,000, for example. Some people do charge managers who fail to buy out and many managers never think of abopping around for money and negotiating. It is sensible they get independent advice."

Good advice will always include a rigorous assessment of the management's teams strengths and weaknesses. In some parts of the North that may lead to a buy-in or some element of it to ensure that the strongest team wins.

There is likely to be increasingly more of this. Si has witnessed 70 management buy-ins in the North in the last three years and provided 27 per cent of the finance.

Mr Wall says that Price Waterhouse's experience is of an increasing trend to buy in. He says: "I am seeing more and more evidence of entrepre-

practices, and has agreed its second two-year pay deal. Management is managing neurial management coming back to the North-East. The and Mr Alex Marsh, the chief executive, saya that its finan-cial backers, led by Globe deal flow is increasing all the time. This is very important because it is bringing good management back into the Investment Trust, are plea with progress.

# of a management buy-out, come to a bank that

really speaks your language.

For too long now, overseas banks have been seen to be the experts in providing debt finance for management buy-outs. Not any more.

One lock at NatWest's performance over the last two years will tell you that we have the experience, resources and expertise to help the deal go through.

- Lead management of the £70m senior debt package for the £160m buy-out of the Compass Group from Grand Metropolitan.

 One of the seven underwriting banks involved in the £485m senior debt package for the MFI/Hygena buy-out.

- Lead Management of the £35m senior debt package for Moore Group Limited from family shareholders.

- One of the three underwriting banks in the £595m senior debt package of Reedpack Limited.

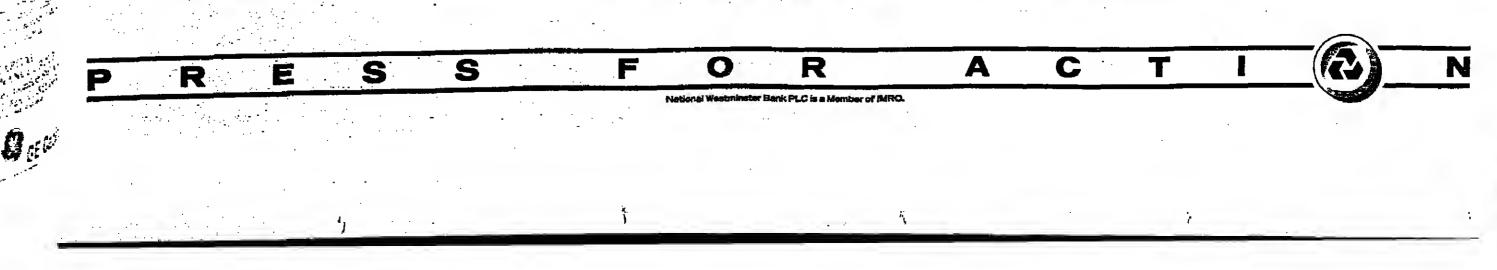

- Financed many of the buy-outs arising from the privatisation of the National Bus Company.

We'll be happy to discuss debt financing through the National Westminster Bank Group, no matter what sum of money is involved.

So, why cross the water when the answer lies closer to home?

For more information, ring Paul Treacy or Lawrence Vosper on 01-920 5555 extension 6584 or 6585.

# **MANAGEMENT BUY-OUTS 16**

PROFILE: GEMINI GROUP

A buy-in of quality

debt from the NatWest.

THE MANAGEMENT team of Clive Greaves, Richard Comp-ton and Ray Wearn had all worked together for a number of years, at first at the Econo-mist and later at Marshall Cavendish. Mr Greaves himself had spent 7 years in the US as President of the Economist, during which time the mega-zine's circulation increased

In December last year, there came a time when Mr Greaves determined to branch out on his own. His objective was to generate long-term capital gain through an investment in the areas of publishing and direct marketing that he knew well. He approached County Nat-West Ventures with the sug-gestion that they should back him in a management buy-in. They agreed to do, on the con-dition that he assemble a management team.

Having done so, Mr Greaves scurried about looking for an appropriate vehicle for his ambitions. After two false starts, the break came at a lanch at Henry Ansbacher, the merchant bank.

merchant hank. Mr Greaves arrived with a shopping list of desirable com-panies, and left with an infro-duction to the management of Quadrant, a company which embraces publishing and mar-beting environ

keting services. Thus the management buy-in was born. The previous owners were committed to

the company's two publishing and marbogether and it was with their endorsement that Mesure Careaves, Compton and Wearn came aboard in September this year

The fam deal was led by County NatWest Venimes, and backed by a mimber of other

Quadrant - the name of which has now been changed to the Gemini Group - con-sisted of two separate compa-nies, Joint Marketing and Publishing Services and Print, Promotions and Publicity. There were no trading links between the two companies, although they shared premises and accounting overheads. The companies were owned 65 per cent by Philip Burley and 35 per cent by Tony Tanner.

The company made profits pre-tax and directors' expenses of £231,009 on turnover of £1.6m in 1987.

The former owners wished to safeguard employment, and so wanted to identify a buyer who would not hive off one or other of the company's halves. Rob-£750,000 worth of institutional

receemable preference shares together with institutional ert Maxwell expressed his interest, but was deemed an unsuitable buyer. Another crucial factor was merzanine of 12m

Looking back on the experi-ence of organising the deal, Greaves points to the necessity of having human skills as well as the financial skills needed to structure the transaction. Mr Borley's relationship with Mr Boney's relationship with Mr Greaves. Mr Burley had intended to go to Spain and had arranged to hive off Mar-bella Life, one of the compa-ny's magazine's, to keep him occupied in his semi-retire-ment As it is , he is staying on at PPP as manacing director Although Mr Greaves ruled out buying a ropy company -albeit replete with turnaround potential - the main difficulty at PPP as managing director for another six months. even with a company with a good track record was the pan-city of information about the potential acquisition.

Prior to finalising the pur-chase price, CNWV obtained "in principle" commitments from four other institutions; Lloyds Development Capital, Grosvenor Ventures and 3L The National Westminster Bank was also informally com-In these circumstances, it was important to strike up a good relationship with the vendors, in order to ease the low of information despite the com-petitive situation.

mitted to providing the term As Robert Ashmead of loon requirements for the deal. County has observed: "It was vitally important for us to sell The 5 institutions provided visity important for us to sen ourselves to the vendors as suitable persons to take responsibility for their "baby." That they succeeded in doing this is obvious from the fact that Mr Burley put off going to \$3.5m in a combination of equity and mezzanine finance, with a further £500,000 of term

sisted up to a year or so ago as to whether Scottish business-men were taking all the oppor-tunities available to them. "Quality managers here are as outward looking as anyone," he says. 3i participates in the largest number of MBOs in

largest number of MBOs in Scotland. He adds: "There's been no quantum leap in MBOs in Scot-land over the past three years but rather a steady growth. You have to remember that there are a finite number of situations where MBOs are possible." He points to the branch offshoots of major com-panies which the parent may prefer to close or transfer else-where rather than sell to their management and see them compete with the parent. compete with the parent.

In early 1967, 3i earmarked \$50m for MBOs in Scotland but has actually invested abont £20m over the past three years. Mr Pacitii points ont that whereas the size of MBOs in the south of England is scaring to astronomic levels, the record for the biggest MBO north of the border is still £10m - the size of the deal in early 1966 whereby the man-agement of Exacta Circuits bought their Selkirk-based printed circuit board business from STC. Most Scottiah MBOs are worth less than £3m. Mr Pacitii acknowledges that a number of rising Scottish companies may have become shy about the eventual possihas actually invested abont

companies may have become shy about the eventual possi-bility of seeking etock exchange quotations following the saga of Babygro, but despite the importance to MBOs of an "exit" he does not think this is putting them off how onts

buy-outs. Babygro was the subject of a buy-out - financed by 3i, Brit-ish Linen Bank's Melville Street Investments and the Scottish Development Agency – from its US parents in 1983. Upheld as an example of the opneid as an example of the resurgence of the Scottish entrepreneur, it was floated on the stock exchange in 1987 cap-italised at flom. But this year it hit serious difficulties and was sold to a Cheshire sports-wear maker, Robert H. Lowe,

for only \$4.4m. At Bank of Scotland Mr Gavin Masterton, general man-ager for the East of Scotland, notes that deals have become more complex for the lender, since lending is now more likely to be based on cash flow of the business rather than its net asset value.

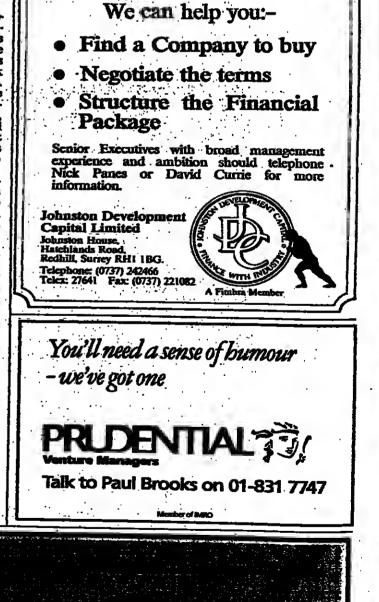

There have been some significant MBO deals in Scotland in recent months. At the beginning of this year 31 and the Scottish Development Agency - which is also a significant

Ayrshire to form Cavendish Coal, which will concentrate on the domestic coal market. Mr Norman Murray, a direc-tor of Charterhouse Development Capital, says that MBOs are "a healthy sign for the Scottish economy. It keeps businesses local or brings back control from outside Scotland. That means that they provide business for local service companies, such as advertising, public relations, banking and legal services." He notes that Burn Stewart transferred its head office from London to Glasgow following the MBO. Mr Robert Smith, Charter-

house Development Capital's managing director, says: "The MBO market suddenly picked up dramatically in March this year after the shock of the October 1987 crash and has been extremely busy ever

since He believes that the effect of higher interest rates and the slack stock market may enable

slack stock market may enable managements to buy-out their companies at a lower price than was possible before, with less competition from corpo-rate predators offering paper. "The MBO wins by paying cash," he says. Mr Peters at Murray John-stone does not differentiate between deals involving Scot-tish companies and those in other parts of Britain. Murray Johnstone can marshall resources totalling 200m from Murray Ventures (which has invested in 40 MBOs since it was founded in 1984 and made a 40 per cent annual return on a 40 per cent annual return on capital),

# **MANAGEMENT BUY-OUTS 17**

# THE MIDLANDS

# Taking a long-term view

THE EARLIEST buy-out that there is less hasale over stocks and debtors. Buy-Out Research in Notting-ham has been able to trace occurred in Belfast in 1884. But, according to Mr Peter Wil-hiams of Investors in Industry (3i), the buy-out as we now know it was invented in 3i's Birmingham office 10 years ago. The problem to be overcome then was a Companies Act provision, since repealed which prevented people borrowing on the security of the

company they were buying. Mr Terry Gateley of Peat Marwick McLintock believes that the character of Midlands buy-outs has changed since those days. In the recession, managers were buying alling businesses at a discount as an alternative to closure. Now they may have to pay a premium over their company'e value, and raise some mezzanine finance at higher interest rates to cover it. The managers of Rover'e

computing arm, 1stel, won after two rounds of bidding. (They also brought in 900 employees as shareholders.) Mr Gateley says there is a confident air in the West Mid-

connecting are in the problems were shaken out in the last reces-sion, and there are an enor-mous number of skilled people

in the companies. "Four years ago, we always had to get trains to London. Now people are coming to us. They are looking for good cash-generating businesses. that they are not going to get any shocks from."

Only one in 11 bought-out companies has been unsuccess-ful, compared with one in four start-ups. Mr Gateley says that up to

£25m to support a buy-out can be raised in Birmingham. Apart from national capital providers like 31 (whose Bir-mingham office has just helped finance its 100th buy-out) there are local ones such as Sumit, associated with Albert Sharp, the stockbrokers, and the coun-cil-owned West Midlands Enterprise Board. Parent companies are now

apt to produce sale memo-randa, inviting bids for subsidiaries not part of their corebusiness. Mr. Gateley's advice to managers eager to buy is to produce their business plans swiftly and line up their financial backers, so they can offer a quick deal. One advantage of selling to managers is that . together to make sure they did to have a hit of good fortune as

three to five years.

leagues should put in. Failure

must hurt but not be disas-

trons. "I don't think there is

any joy in management not sleeping at nights." Once good managers are identified, it is in the interests

of the buy-out industry to get.

BALANCE EQUITY AND DEBT

However, one would be buyout team was beaten by a flom higher bid from another company. A competing buyer may be able to offer his own paper. under film, perhaps a small He may also see the purchase business whose owner is seeking to retire. Small firms take longer to as more valuable because he can transfer business to his existing factory. Mr Keith Hirst, of Metsec

reach a marketable size, and so are less popular with capital which was saved by a buy-out providers. The West Midlands from TI seven years ago, believes there has been a Enterprise Board is prepared to wait seven to 10 years to get its money back. Mr Williams says that 3i also takes a long-term change in the motives of managers who buy their compa-nies. Like the venture capital firms which back them, those view, "but we are not going to invest equity to see a business stand still." now buying may be looking for a chance to sell their stake for a large sum when they float the company on the market in He believes the buy-out

well. We decided we were pre-Buy-outs have been com-moner in the West than the East Midlands, particularly this year. One Midlands buy-out in three is of a firm worth make the business more successful.\*

The buy-out has given new confidence to the 220 workpeople, because the key decisions are now being made on the premises.

Metsec at Oldbury began 58 years ago with a new method for rolling bicycle rims. By 1990 it belonged to TI, was involved in the alling motor industry and was losing money. Management buy-outs were then few and far between, says Mr Keith Hirst.

With four colleagues, he decided to make a hid for the structural steel part of the business. "We went off to see David Haggett of Evershed and Tomkingon the solicitors and Tomkinson, the solicitors, and he took us to 3i. Eventually it meant us putting our houses up as security." Before selling, TI cut the

workforce from 750 to 160. It is now up again to 200, plus inverse up again to 200, prus employees of new subsidiaries. Metsec helped to build the Nis-san car factory. It uses fibre-op-tic cables to link the drawing office to machines. It lost TT's services but

escaped from its bureaucratic structure. Flotation in 1965 to raise money to buy the build-ings gave Metsec a value of £12m. Turnover which was £5m in 1981 will be £50m this yes

Mr Cliff Hopkin, his son and a colleague offered a Swedish owner £50,000 for Venetian Blind Manufacturing, a Bir-mingham maker of blinds, canopies and awnings. "We were not making any money," says Mr Hopkin.

After 15 months, their offer was accepted. To Mr Hopkin's disgust, they were unable to persuade their bank to continue the overdraft without personal guarantees, and so they obtained £100,000 from the West Midlands Enterprise Board. Meanwhile, a man from another venture capital firm treated us like small children."

What they had spotted was a growing demand for wooden blinds and pinoleums (woven wood from Paris). This accounts for a quarter of their thrnover which is up 40 per cent this year.

on with it," says Mr Small.

IT WAS a single buy-out at a single price, and yet four com-panies - in four countries were created. Before it was concluded, an eight-way con-ference call, involving participants in the same four countries, went on for 7½ unbroken hours - without settling the question at hand.

Little wonder that the heads of Mr Brian Small, managing director, and his colleagues at ingersoll Engineers, manage-ment consultants to manufacturing industry, have only just stopped spinning.

The simultaneous and separate buy-outs of the Ingersoll consulting operations in the US, West Germany, Britzin and France earlier this year broke new ground because of the complicated multi-national nature of the transaction.

The deal also highlighted the special complexities involved in mounting a buy-out for a service company of which the main assets are the potential buyers themselves.

No less noteworthy is the role played by Berliner Han-dels-und Frankfurter Bank, the West German bank which provided virtually all the loan finance for the buy-out and holds a 25 per cent equity stake in each company.

Ingersoll Engineers was founded in the early 1960s as a sales promotion subsidiary of Ingersoll International, a privately-owned US company which also owns ingersoli Milling Machine, a pioneer in anto-mated transfer lines which traced its history to 1890. Inger-soll supplied the assembly line, for example, for Henry Ford's first manufacturing plant.

By the middle of this decade, however, it had become clear, Mr Small says, that "you don't sell products through a masquerade of an industrial consultancy. As we became more like management consultants, it became less logical to be a subsidiary of Ingersoll."

In 1984, a study group was created with top-level representatives from each office to improve international liaison and - somewhat less officially - to explore options for change. Taking its name from Talloires, a village near the French branch at Annecy, the forum decided by 1986 that a buy-out was the best solution. Although the US parent was open to the idea, it put inger-

Brian Smith, managing director, ingersoil Engineering scertain the market price.

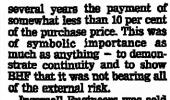

weeks, CGS pulled out. Although the precise buy-out price was not disclosed, the \$10m-plus deal was worth not Among those expressing an interest were several Big Eight accountants, as well as man-CGS had agreed to pay. CGS had got its head start because the buy-out team had agement consultants and one or two "corporate strategy"

firms. But the winner, for a few weeks in the summer of 1987, was none of these but the acquisitive French software company Cap Gemini Sogeti. Without warning, for CGS had never contacted them, Mr Small and his colleagues discovered that they had been

covered that they had been conditionally sold. "No management consulting firm would even have consid-ered it without talking to us," Mr Small said. "So we quietly and systematically made it known to both sides that you can't sell reluciant neorabe." can't sell reluctant people." "Each person in the Talloires

forum made it clear to the buyer and the seller that there was another option," he said. The UK office made an offer to buy itself from CGS. Others were more direct. As bluntly as contracts allowed, they let it be known that CGS could not netessarily count on their continued service if the deal went through.

"You can't sell a service company without the agree-ment of the people concerned - that's a fundamental rule," soll Engineers on the block to notes Mr Small. After six

XVII

Ingersoil Engineers was sold as a block and then divided up among the buyers into separate geographical companies. The investing participants all wanted their rewards to be linked to what they controlled or influenced," says Mr Small.

Having agreed the total price, the buyers had to allocate it among themselves. BHF was the arbiter for this tortu-ous exercise, which had to assess such factors as the greater growth potential in the huge US market and the fact that the UK company was the only one to own a freehold property - Bourton Hall, a restored Regency manor house in 16 acres on the outskirts of Rugby.

Although each company is independent, they cooperate through the Ingersoll Engi-neers Group, which they own rather than vice versa, making financial contributions to its support in proportion to their turnover.

The four companies also went their own ways in terms of breadth of ownership participation. The French company, smallest of the four, was company-wide from the start, while in the US and West Germany, it is limited to the top levels.

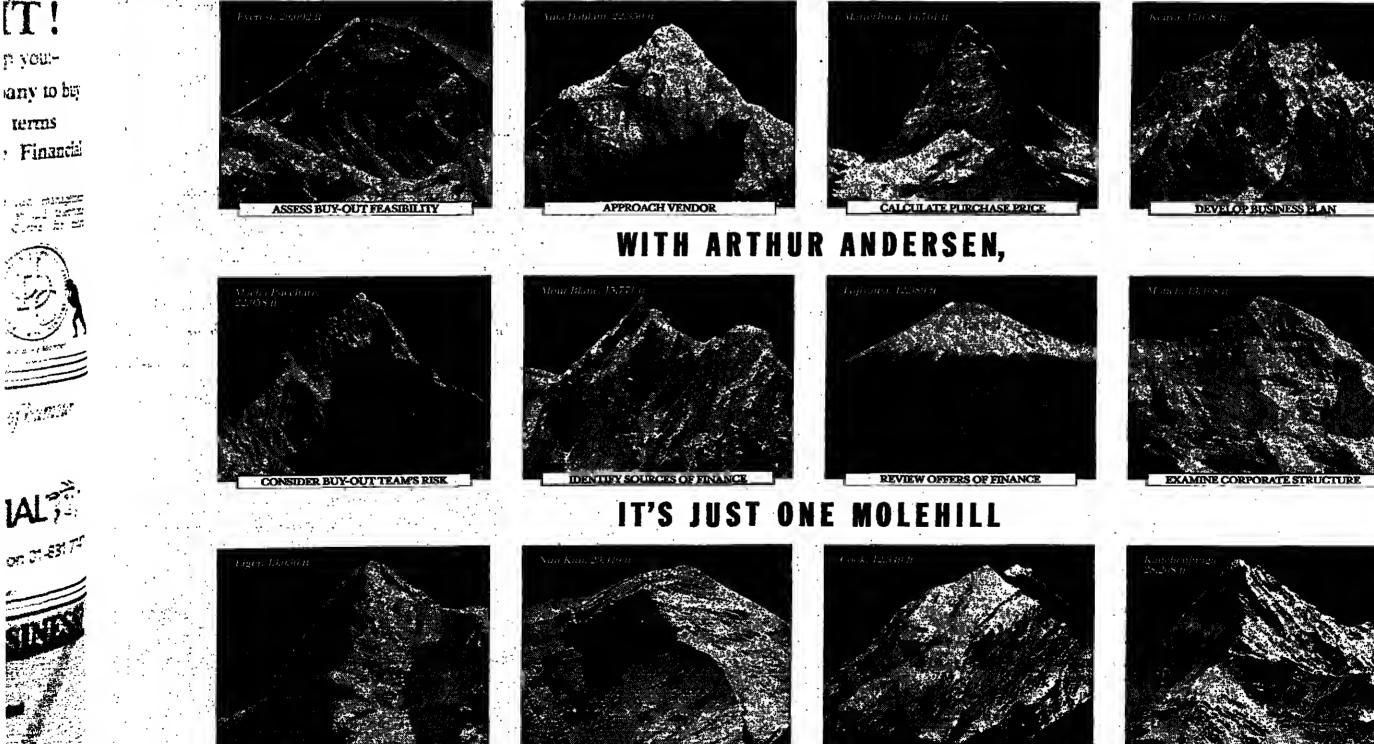

In the UK, there were only 10 In each country, the consul-tants sounded out potential backers and, somewhat against investors at the time of the buy-out, but shareholding has been opened to all employees. the reputation of the US and UK as venture capital pioneers, the winner was BHF. As a Ger-man bank, it was comfortable with taking a continuing equity stake in the businesses. "Our chiecting was not to As consultants, the new owners of ingersoll Engineers learned more than they expec-ted from their own buy-out. During the protracted process – not helped by having to deal with lawyers in four countries – Mr Small says one point was "Our objective was not to buy the company and make a bundle reselling it," Mr Small says. "The British and Ameribrought into sharp focus: "Each individual has his own cans all seemed to be more interested in when they could personal aspirations in terms

of the future." Group consensus may be sufficient for incremental change, but each the desires of each individual - especially in middle management - must be

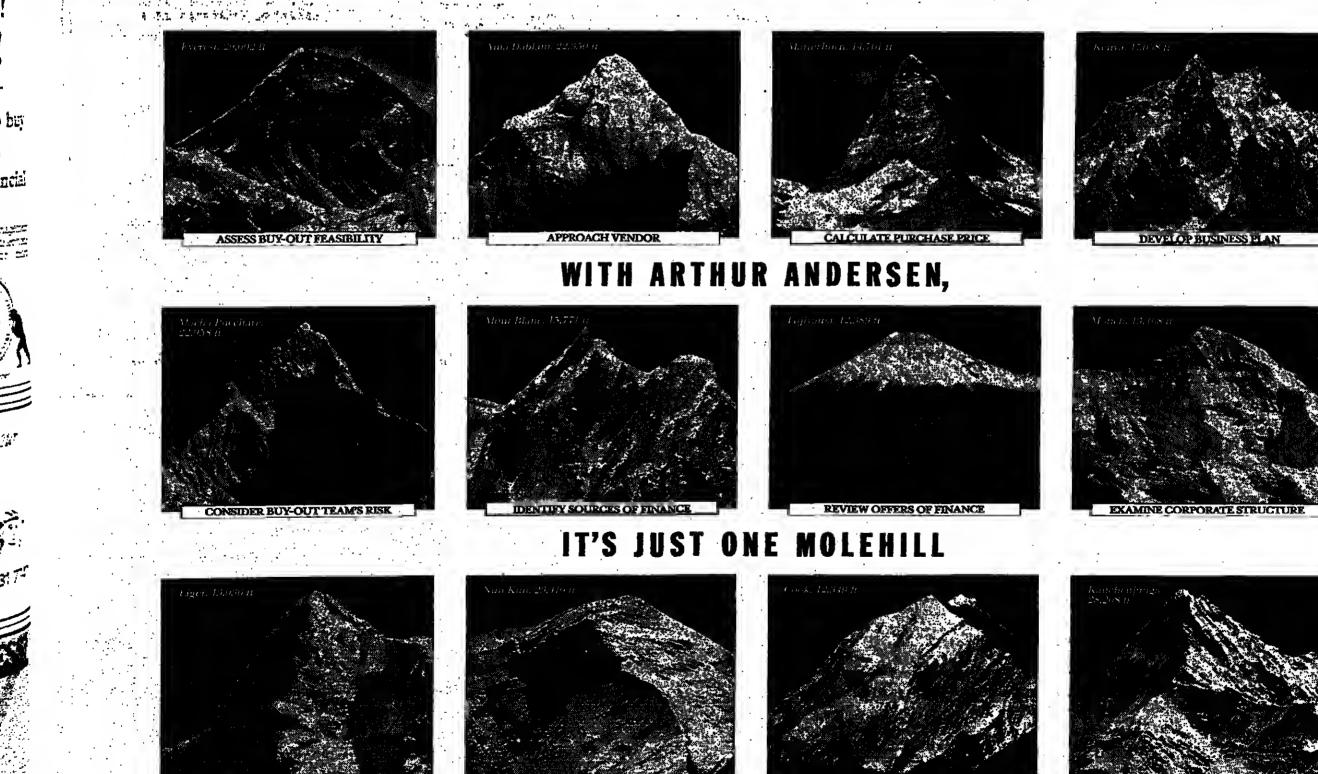

Mr Chris Burnham, director, concurs: "I think they were confused about an outfit that wanted to buy itself with a long-term objective rather than a get-rich-quick mentality." The only other outside finan-cial help came from the former US marget which allowed considered in more dramatic changes such as buy-outs. It is a lesson which they are already passing on to their cli-ents in industry.

# **MANAGEMENT BUY-OUTS 18**

# **PROFILE: REEDPACK**

# determination to invest

He was determined that the company, Reedpack gronp would not savage its capital investment plans or sell off any of its activities in order to pay off the high level of debt which would inevitably be needed for the bny-out. That meant the backers not only time

had to put up the money in the first place, but that they would have to be content to see the company remain highly geared, despite strong cashflow, until it returned to the stock market in three or four year's time.

THERE WAS one thing Mr

Peter Williams, head of Reed Manufacturing Gronp, would

not compromise on when he and his colleagues decided to attempt a buy-ont of the paper and packaging group from its parent Reed International

"The business plans prepared for RMG when we were part of Reed International were created to give us a sound and reliable future. They were valid then and they are still valid now. Toere's absolutely no reason why we should change them," Mr Williams told his employees when the deal was completed.

This made the huy-out an unusual one to sell to banks and investors. Normally backers expect to see a rapid repay-ment of debt. But RMG which has since renamed the

**MANAGEMENT** buy-outs have been gathering pace in Wales over the past three years but the jewel in the Welsh crown is undoubtedly ASW, subject of a £181m bny-ont by managers, financial institutions and British Steel from its GKN/British Steel parentage last year.

Floated on the stock market in June the company last month reported an increase in profits at the half-way stage up from £10.2m to £13.2m on sales up from £172.3m to £195.7m.

Learning from the Japanese - 400 out of ASW's 3,100 staff have been to Japan to study how steel plants operate there and exporting half its output to the rest of Europe, the company has been held up by Mr Peter Walker, the Secretary of State for Wales, Peter Walker, as an exemplar of management skills and dedication.

The fact that the management behind the buy-out has firm Welsb- based roots has spin-offs in other directions. In August, Mr Alan Cox, ASW's chief executive stepped in with a cash injection to resolve an acrimonious dispute which was threatening Welsh National Opera's world tour production of Falstaff. ASW has also become prominent in other areas of Welsh life through its generous sponsorship of local plans to spend over £300m in the next five years. "It is the first time institutions are investing in a business with heavy capital expenditure projects," Mr Williams said at the

The price paid to Reed Inter-national was £508.6m and there was a further £22m needed to cover expenses. A total of 2210m of equity was raised. Reed International put in £60m for preference shares which will be repaid when the busi-ness is floated or sold, and has the right to take 10 per cent of Reedpack's equity. Top management put in £2m and will be entitled to 10 per cent of the equity, rising to 20 per cent if performance targets are met. Institutions put up £148m, of which £3.5m is reserved to be

sold to employees. That left a need for roughly £420m in acquisition debt, plus a facility to borrow another £175m to cover capital expenditure and working capital requirements. Both were led by Chemical Bank. Thus the total

amount of finance fixed at the time of the buy-out was over £800m. Even so institutions were eager to snap up the equity available - so much so, according to Mr Robin Hall of CIN Venture Managers, that buyers had to be scaled down.

The deal looked attractive to equity investors who will get a return of 35 per cent a year if Reedpack meets its targets and the shares are floated in four years time. The return will be higher if the float comes ear-

WALES

ASW shows the way

will be made for the benefit of

the community as a whole." The scope for management buy-outs in Wales was high-

lighted in a 1970s a Welsh Office-sponsored study which found that of Welsh firms

employing between 500 and 1,000 people, 78 were controlled from outside and only 16 from

inside Wales. Of those employ-ing more than 1,000 people, 42

and only seven from inside.

were controlled from outside

The position has changed lit-

tle since, but now management buy-outs are being seen, espe-cially by Peter Walker, as a

means of adjusting the bal-

ance. Wales was slower to

jump aboard the buy-out band-wagon in the 1980s than

England, but is now more than

that Wales has a greater con-centration of branch factories.

These, by their very nature are

more likely to be divested by a

One reason is the very fact

catching up.

lier. The risk was that the high level of debt would becom much of a burden if the business's fast rate of profit growth slackened. RMG's profits before tax had risen from £15.9m in 1983-84 to £56.2m in 1987-88.

After the buy-out was com pleted on July 28, Reedpack quickly swapped its variable rate debt for fixed rate in advance of the rises in interest rates seen in the late summer and early autumn.

Just as important as the cap ital expenditure programme was Reedpack's spread of businesses. The group has nine major areas of activity, hased in the UK and the Netherlands. It would have been simple to sell of some businesses, espe-cially since many have leading positions in their markets. But Mr Williams believes

that the spread of businesses gives Reedpack the balance it While some areas are highly

capital intensive - such as the paper making side - others

The restructuring of industry worldwide means it is now essential to keep a close eye on the fast-moving global M & A market. Can you afford to miss out on the acquisitions your competitors are making?

FT MERGERS AND ACQUISITIONS - the monthly Financial Times Business Information magazine - ensures that you are kept informed, by providing comprehensive and authoritative coverage of bid activity worldwide.

Every month, FT MERGERS AND ACQUISITIONS provides: Comprehensive and easy-to-read statistics on over 600 bids in the UK. Continental Europe, the US and the rest of the world.

**Objective and critical articles** on M & A developments throughout the world. Expertise is drawn from the Financial Times' international network of correspondents and from working professionals in the field.

Subjects covered include: Trends and general bid activity during the month = Financing techniques = Merger regulations and accounting conventions = League tables of financial advisors = Profiles of individual financial advisors and houses in the news = Trends in bids = Industry assessments.

FT MERGERS AND ACQUISITIONS is unrivalled for its depth and geographical reach and is an essential working tool for all those involved in M & A activity.

I am inviting you to join our ever-increasing circle of subscribers. You will receive not only the monthly issues of FT MERGERS AND ACQUISITIONS, but also the MERGERS AND ACQUISITIONS ANNUAL, providing a cumulative record of all the year's bid activity.

We will also give you free THE PD2000 POCKET COMPUTER: the world's smallest computer - only 2mm thick and the size of a credit card, and you will be entitled to a 10% DISCOUNT if you send payment with order.

A drop of Teacher's at the Rising Sun

Tony Jackson and Christopher Parkes look at yesterday's alliance between Allied-Lyons and Suntory

M R KEIZO SAJI, chair-man of Suntory, may have overstated it yes-terday, when he coyly claimed that his surrender of a 1 per cent stake in Japan's largest drinks company to Britain's Allied-Lyons felt "a little like los-ing my virginity."

Allied-Lyons felt "a little like los-ing my virginity." He may be forgiven. It was, after all, the first encroachment by an outsider, Japanese or for-eign, into the private family firm's equity. The event may not have lived up to the expectations of drinks industry watchers, nur-tured on a strong diet of global-scale takeovers in recent years, but, in terms of the xenophobic Japanese market, it is momen-tous and promises to be reward-ing for both partners.

tous and promises to be reward-ing for both partners. First fruits of the union are already apparent. For Allied, the deal provides the strongest ally possible in one of the world's largest and most promising drinks markets. It may also serve further to signal to shareholders its determination and ability to develop its global influence at a time when Bond Corporation of Australia has built an 11 per cent stake and hid rumours are rife. By tying in Allied's full brand By tying in Allied's full brand portfolio with its own powerful domestic range and existing

brewing deals with Budweiser and Carisberg, Suntory can only strengthen its grip on the hard-pressed Japanese drinks market. Despite its domination in Japan, where it claims a 60 per cent share, it has next to no sales outside its home base. The link with Alliad could onen doors with Allied could open doors abroad through the British group's international network as well as improve Suntory'a standing at home.

In the late 1970s, Suntory Old was the biggest selling whisky in the world. But volume sales have the world. But volume sales have halved from their peak in 1981 and fell by 10 per cent last year-alone, largely as a result of changing drinking habits in Japan. Japanese whiskles have been hard hit by the rising popu-larity of cheaper grain and potato based schochu tipples. The com-pany has already warned that operating profits will fall by 26 per cent to Y19bn (\$145m) this year.

Despite diversification into soft-drinks, food and an international chain of vasily expensive restaurants, more than 90 per cant of the company's sales still come from alcoholic drinks.

Suntory executives said yester-day that group sales of imported products run at Y30bn a year and

five within five years. Hence the importance of pre-mium foreign brands from the Allied fold. These could help it at least to maintain its market share, especially since imports stand to benefit greatly from excise duty adjustments prom-ised for next April. Then, according to Mr Jim Fer-

guson, corporate development director of Hiram Walker-Allied Vintners, the tax on imported scotch is due to fall from about Y2,000 a litre to Y1,100, almost matching the rate for quality Jap-anese whisky. At the same time duty on cheaper Japanese prod-ucts will rise from Y300 to about 7900

According to Ms Michelle Proud, analyst at County Nat-West Wood Mackenzie, this raises every possibility of a full-scale revival of the market for scotch in Japan, with Allied's Ballan-tine's and Teacher's brands rid-ing the tide with Suntory's domestic leaders.

Of course, Allied-Lyons is already active in Japan. Ballantipe's Finest, for example, held fifth place in scotch sales last year, but the group's representa-tion was scattered and marketing effort diffused among 20 different distributors. Now its spirits and fortified wines will be handled by just one. Before yesterday's announcement Suntory dealt only in Allied's Canadian Chb whisky and Kahlua liqueur.

There are awkward patches to There are awkward patches to be smoothed out. Suntory is the Japanese distributor for Martell cognac, taken over by Seagram in a hotly contested fight with Grand Metropolitan recently, and it is not yet clear what the Cana-dian company will make of its premier name effectively being sold through the same hands as Allied's Courvoisier.

And although it is understood that table wines are not included in yesterday's deal, Allied's joint venture with Whitbread in Euro-pean Cellars could also benefit. Allied's Courvoisier. As well as giving Allied an escape from the torthous distribution maze accepted by many European Cellars' Calvé wine interlopers as part of the price of doing business in Japan, the deal illustrates yet again the internabrand is market leader in Japan. "Allied-Lyons believes its strength in wine products is

tional drinks industry's determi-nation to control the destiny of its brands all the way through the distribution chain. IDV, the Grand Metropolitan

spirits division, set up a wholly-owned marketing company in Japan last April to control distri-bution of its brands. In a similar move in July Guinness took an 80 per cent stake in its Italian dis-

# **BGas and Shell in Tenneco deals**

### By Sleven Butler in London

BRITISH GAS and Royal Duich/ Shell emerged yesterday as pur-chasers of some \$700m of the oil and gas assets which have been sold off by Tenneco, the US

group. British Gas took another step in its programme of international diversification, with the purchase

of a wide spread of oil and gas properties for \$194.5m in cash. British Gas came out as the highest bidder for the assets, which comprise Tenneco'e operations outside North America, excluding those in Norway

with the company's ability to make a large purchase, it will for ) the first time give the giant gas utility, which was privatised at the end of 1987, a truly interna-tional spread of interests. Before privatisation, British Gas was barred from international operations. British Gas said it would use the acquisition as a base on which to expand further in the countries concerned Most of British Gas's explora-

The acquisition includes assets The acquisition inclinings assets in Ecuador, Egypt, Gabon, Maia-lysia, Nigerla, The Bahamas, Trinidad, Tunisia, and the UK, The largest element in the pack-age is in Gabon, where British Gas will become operator of four small producing offshore oil iore oilley Industries, the Cana fields, in which it will have a 50 per cent interest, and five other energy group, for £350m. Last month British Gas made exploration licence areas covering 14,000 sq km. The package includes a large proportion of exploration acreage in which British Gas would be operator. These factors were seen as a key attraction of the deal.

These securities having being sold, this announcement appears as a matter of record only.

tion and production assets were stripped out of the company prior to privatisation, although the company retained an exploration staff. In June, British Gas paid £370m for Acre Oil, whose assets were concentrated in the North Sea. Its other big expansion since privatisation was the purchase of a 51 per cent interest in Bow Val-

### shuttle operation to Mr Donald Trump, the New York property tycoon, for \$365m.

The operation will be renamed the Trump Shuttle, its aircraft will be refurbished and pessen-ger facilities upgraded. But in other respects there will be no changes to the hourly, no-reser-vations air service linking New

York, Washington and Boston, which in 27 years has become an institution for businessmen and politicians.

politicians. At a news conference at Mr Trump's recently acquired Plaza Hotel in Manhattan, Mr Lorenzo also confirmed that he had been approached by Mr Carl Icahn, the taksover specialist and cor-porate raider who controls Trans World Airlines, about buying the remainder of Esstern Airlines worm Airlines, about buying the remainder of Eastern Airlines. Mr Lorenzo said it was not his "preferred course" to sell East-ern and that a deal with Mr Icabn was "very unlikely" to be struck.

struck. Mr Lorenzo, who had consid-ered selling the shuttle for almost a year to strengthen his negotiating position in a protracted struggle over labour concessions with 'Eastern's unions, expressed some regret over the disposal. The shuttle service had long been the most profitable part of the airline's operations, although it accounted for only 4 per cent of its total passenger miles. Because of its profitabil-ity, however, the shuttle gave unions an important bargaining

unions an important bergaining

chip. The shuitle deal, described by analysts as a very full price, greatly strengthens Eastern's ability to withstand a strike. The promability would be harmed by new companies entering the cel-hular market. In all, 200m shares in Bacal Telecom, about 20 per cent of its equity, are being sold, with Bacal Electronics retaining 80 per cent. The vast bulk - 150m shares -are heing offered in existing airline has about \$300m of cash in a carefully husbanded war thest. After completion of the shuttle sale, which has been set for December 15, cash reserves will more than double. Mr Lorenzo's previous attempt to sell the shuttle, to a subsidare being offered to existing shareholders on the basis of one Bacal Telecom share for every iary of Texas Air which would

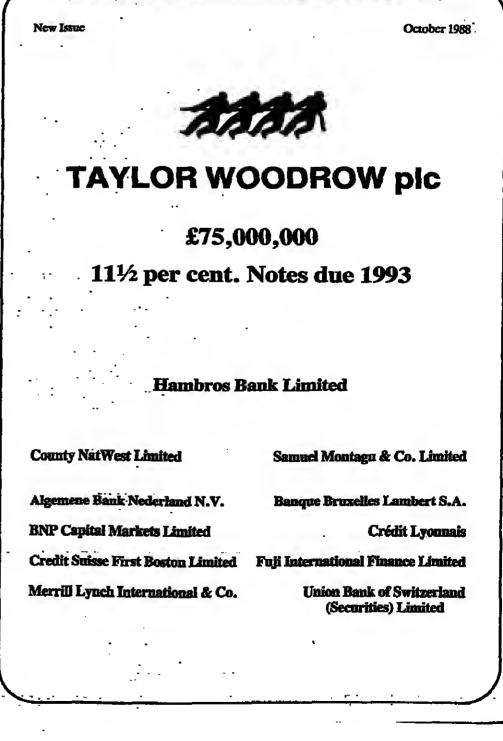

4.425 in Racal Electronics. There are offerings to institu-tions of a further 35m shares in have been insulated from East-ern's labour difficulties, was blocked by a court injunction. However, this was overturned on appeal, leaving the unions with the US and 15m in Europe . A general UK public offering of 14m shares is being made, which will be satisfied with shares not taken virtually no hope of stopping a sale

up by qualifying Racal holders. N.M. Rothschild and Goldman Mr Trump"said he would observe all present labour con-tracts, noting that the shuttle Sachs are underwriting the UK issue, for a fee of 2 per cent, which includes sub-underwriting unlike the rest of Eastern's unlike the rest of Eastern's operations was highly profitable with its present cost structure. His emphasis would be on adding quality and luxury. Mr. Trump, who loves to pro-mote himself as a garish symbol of the joy and power of money in the 1980s, said he had bought the shuttle "because it was unique; it was a diamond." fees of 1.25 per cent. The US and Ruropean offers are being under-written for fees of 5.25 per cent

The deadline for applications is Friday, October 21 and dealings will start on Wednesday, October Shell Petroleum, part of the Royal Dutch/Shell group, bought for \$500m Tenneco's interests in

Colombia, where it is already active in oil and gas exploration and production. Norway's Conoco has bought the interests there. Although the British Gas acquisition is small compared

# Fiat in talks with Japanese car maker

Earnings per share in the

third quarter fell to 45 cents, against 63 cents last time, and

### By Kevin Done, Motor Industry Correspondent

FIAT, the Italian automotive concern, is negotiating the purchase of automatic transmissions for compact cars from Fuji Heavy Industries of Japan, the maker of Subaru cars.

Fuji said it expected to supply several thousand ECVT (electro-continuously variable transmissions) units a year starting early in 1980.

Fiat has been testing sam-ples of the ECVT transmissions since late 1986.

The company said yesterday that negotiations had not yet been completed, but it confirmed that it was planning to increase the range of automatic transmissions offered in its small and medium cars, although it refused to specify which model would use the Fuil ECVT.

Fiat currently offers a hydraulic continuously vari-able transmission on its Uno small car, which was devel-

oped jointly with Ford and Van Doorne of Holland. Ford introduced this trans-

mission on its Fiesta small car in May 1987. The system was supplied initially in low volumes by Van Doorne to both Ford and Fiat, but Ford has invested 280m in its own trans-mission plant in Bordeaux, France, to produce the transmission in sufficient volumes to supply its own assembly plants in Europe as well as Flat and other vehicle makers.

# Earnings stagnant at **First Boston**

By James Buchan in New York

> FIRST BOSTON, the Wall Street securities firm which is

Street securities firm which is going private in a merger with its European affiliate, Credit Suisse First Boston, reported stagmant earnings in the Sep-tember quarter because of a decline in revenues from its investment banking business. First Boston, which last week announced a \$1.1bn deal to buy out its public share-holders by the end of the year, said earnings in the third quarter ware \$41.7m or \$1.12 a share failly diluted against \$40.5m or \$1.15 in the 1987 third quarter. Esvenues were third quarter. Exvenies were also little changed at \$374.9m as against \$360.6m.

Revenues from investment banking tambled from \$240.9m to \$175.1m. The mergers department was plunged into turmoil in February when its two star bankers, Mr Bruce Wasserstein and Mr Joseph Perella, quit with several

Although the department has since been successful in pulling in new business, the comparisons with the best days of the Wassenstein-Per-

days of the Wasserstein-Per-ella era are unflattering. First Boston's valedictory results as a public company were rescued by a recovery in trading profits. Last year, big losses on trading securities for the firm's own account forced First Boston to reorganise its trading department. In the quarter just ended, revenues from "principal transactions" recovered from \$65.1m in the 1967 third quarter to \$142.8m. First Boston's share in carn-ings from Credit Suisse First Boston, which has faced sticky conditions in international

securities markets this year, fell to \$3.9m from \$14.4m. For the first mine months of the year, First Boston was ahead at \$127.8m or \$3.42 a share against \$103.8m or \$2.95. Mr Peter Buchanan, chief executive, said: "Led by the government securities and high yield departments, our fixed income group performed

Separately, Standard & Foor's, the US rating agency, said it downgraded First Boston's subordinated debt rating to A-minus from A, because of the CFSB deal.

year, while sales advanced by only 5 per cent to \$340.7m.

# **Your partner** for reliable data protection

Today, electronic data processing and communications applications play an ever increasing role in our businesses and industries. Accurate data is the pre-clous resource that enables competitive marketing, strategic planning, and better decision making. The secure transmission of data, images and documents, however, is not always as reliable as it may appear: cases of unauthorized access involving the copying or manipulation of data are by no means rare. This is all the more startling considering the number of communication systems which still remain open and unpro-tected. For more than 40 years, GRETAG has developed and manufactured sophisticated Swiss ciphering systems for impeccably reliable communications transmissions. An international sales network, personalized consulting and major reference installations at financial Institutions, in industry and commerce are major factors to guarantee user oriented systems solutions. This is precisely why more and more companies place their trust in GRETAG.

### And you?

Simply contact GRETAG's Marketing Data Systems for an appointment. We can then familiarize you with our program of ciphering systems - in a highly confidential manner - and show you all the advantages of our GRETACODER 518.

# Bergen Asko DM870m rights to finance further expansion

### By Haig Simonian in Frankfurt

ASKO, the fast-growing West German discount stores group, is launching a DMS70m (M470m) rights issue to finance further expansion, its third call on therefore a set to jump to about DMISbn, against DMISbn last expansion, its third call on shareholders in as many years. The issue, due early next month, is being made on the basis of one new share for every two already held, and will be priced at DM780 a share against a closing price of DML010 for Asko ordinary shares in Frankfurt yesterday. At a press conference yester-day, Mr Helmut Wagner, Asko's chief executive, announced this year's dividend on ordinary shares will be increased to DM15 for each ordinary share, from DMD0 a share last year. Moreover, the new shares will be entitled to the full 1988 dividend.

The proceeds from the rights issue will be used to replace bank financing in Asko's con-tinuing expansion drive, he

In particular, the company has now beoght full control of Schaper, a stores group in which it has been been build-ing up a majority stake since 1996

According to the new arrangement, Schaper's previ-ons owners, the Leibrand famons owners, the Letorand sam-ily, who still hold a 20 per cent stake in the company, have agreed to let Asko enercine its option to buy out their minor-ity interest immediately, rather than by 1990 as origi-

nally set out. That transaction, which was carried out at the beginning of this month, probably cost in, the region of DM200m. Moreover, Asko raised its

BERGEN BANK, one of Norwsy's top three banks, announced yesterday that its current estimate for identified losses on loans and guarantees stake in Massa earlier this for 1988 would reach NKri ibu year, another discount stores group in which it now holds a 50 per cent stake minus one share. In July, it took up its full entitlement in Massa's

(\$161m). For the first eight months, group losses on losns and guar-antees more than doubled to This entitlement in massa's DM206m rights issue. These transactions have been financed by raising Asko's benk borrowing, which now shands at about DM128m. NKr733m, compared with NKr343m in the same period last year, in spite of a 15 per cent improvement in pre-tax Profits. now scands at accent Delland. However, once the proceeds of its rights issue have been received and further cash flow included. Asko expects its bank credits to fall to about DM450m by the end of the year. This compares with more than DM700m at the same time lest war.

Pre-tax profits for the group in the first eight months reached NKrSSOM, compared with NKrSOSM, while at the net

# **Esselte names chief executive**

### By Sara Webb in Stockholm

MR HANS LARSSON, the 45-year-old chief executive offi-cer of Swedish Match, has been appointed managing director and chief executive of Esseite, the Swedish office automation and sapplies group. He will take over when Mr Sven Wall-gren, the present incombent, retires next May.

As chief executive officer at Swedish Match since 1985, Mr Larsson has been credited with helping to restructure its problem areas - particularly its consumer products division and to build up the congiomerte's international operations.

This was achieved through the acquisition of Pegulan, the West German flooring company, and Wilkinson Sword, the UK-based maker of matches and shaving products. However, no source had the benefits of these measures begun to emerge in Swedish Match's profits than the group - which has interests in floor-ing, kitchens, packaging, and unip chemicals as well as being

Mr Larsson will remain as chief executive at Swedish chief executive at Swedish Match until next May, when Mr Waligren stands down at Esseite. The office supplies group had sales of SKri228m and profits after net interest expense of SKr834m list year. Under Mr Waligren's leader-ship, Esseite has shifted from its heavy dependency on the printing and graphics business into such areas as personal computers, videos, pay TV, and office equipment, although it has sometimes been criticised for not being aggressive

# COMPANY NOTICES

PERSONAL

IN THE OFFICE The PPC has a built-in serial interface that facilitates simple data transfer to other PCs in your office. And you can even pluginto standard PC monitors around the office if you want to enhance your graphic display.

ON THE MOVE: You can use an Amstrad PPC literally anywhere. Battery power will let you run through your business strategies as you travel by train to an important meeting. Or you can plug into your car battery via the cigar lighter socket.

### TELEPHONE MODEM: By using the special

modem you can plug the PPC 640 into a standard telephone socket and establish instant two-way communication with other computers and data . bases. The modem is standard on PPC 640s.

loday's PC user is very often on the move. Which is why there is a real demand for a PC that is truly portable.

The trouble is that some of the portables you can get are not always true PCs.

This is a problem our designers quickly identified. And soon solved.

The Amstrad PPC will give you more of what you expect from your office PC in a compact and highly transportable format.

You only need to check the maj listed above to see what a sop machine it is.

There is in fact a range of Amstra at unbeatably competitive prices. And all come with PPC Organizer software.

(Those at the top of the range with the built in telephone modern come with a free

You can pick up any of the new PPC range at your Amstrad stockists

registration offer to Telecom Gold.)

Please send me furthe	r information on the Amstrad PPC.

Organizer software which not only provides Wordprocessing, Card Index and Calculator programs. but also a diary and address and telephone directory. An essential tool for the executive on the move.

### 4 POWER SOURCES:

To ensure maximum flexibility we've provided no fewer than four power sources: standard batteries, the cigar lighter socket in your car; the mains socket. Or you can run it from your Amstrad PC 1640.

## FULL PC KEYBOARD:

With the Amstrad PPC you get a 101 key, full spaced keyboard with all the special function keys you'd expect to find on a full sized PC. So, unlike other 'portables' with their greatly reduced keyboards, the PPC allows you to make full use of all the better known software.

# Dealers succumb to nerves Australian bank bond ahead of US trade report issue sets

### By Dominique Jackson

THE FALL of the US dollar on the foreign exchanges and growing nerves about today's US trade report for August comhined to subdue Eurobond market business yesterday. Only a couple of new deals in the non-dollar sectors emerged Eurodollar bonks saw

some buying interest early in the day but finished with small net losses, marked lower in line with falls on the US Treasury market. There was little genuine selling pressure seen.

The Suropean Investment Bank tapped the Kon sector with a Ecu200m seven-year issue at 7% per cent and 101% via Swiss Bank Corporation Investment banking. The deal saw good and particularly breadly-based demand and the crossly-cased demain and the lead manager said placement was virtually complete by the end of the day, when it was quoted hid at a discount within

The top quality of the boxrower was one factor propelling the deal but it was proba-

invour of the Ecu	itself, with
European-based	Japanese
accounts reportedly	r eager buy-

The success earlier this week of the Ecuioan four-year issue for Export Development Corpofor Expert Development Corpo-tation of Canada via Banque Paribus Capital Markets would also seems to bear this out.

### INTERNATIONAL BONDS

Brisk demand for the EIB desi

underpictorm the remainder of the Euromarket in the recent rally and yields are conse-quently looking fairly attrac-tive. There are also signs that the big institutions which have fought shy of the Ecu are now

precedents are considering the Ecu in a new light as a valid alternative By Chris Sherwell in Sydney to the dollar. Banque Paribas Capital Mar-kets was the lead manager on a THE National Australia Bank THE National Australia Bank, one of the country's Big Four-trading hanks, yesterday set two notable precidents when it raised ASSOUR (\$543.3m) through the issue of M-year subordinated bends on the domestic market.

It was the country's first ame of 19-year stock - the lian market - by a not eramont institution. H -a. It was also the first issue of term sub-ordinated debt to qualify under the Reserve Bank's capi-tal adequacy guidelines

released in August. Yesterday's announcement followed NAB's separate USERSON insue of 10-year Yan-kee bonds on the US market 12 days ago. It also came in the wake of last month's take of all its remaining loans to dobt re-

The issue was priced at 13.25 per cent, 35 hasis points over New South Wales Trus-sury Corporation benchmark stock. As a result of investor Interest, it was increased to A\$300m from the originally intended A\$150m.

Mr John Astbury, NAB's general manager global tre-sury, described the offer as a benchmark for fature issues, and said there was invest demand for prime quality, long-term corporate debt.

Anstralia has seen strong growth in its domestic carpo-Into bond market over recent months, and especially ever the past few weeks. The past reason is the foderal govern-ment's announcement in its August budget of a fiscal surplus and a zero public sector horrowing requirement in the current financial year. The Reserve Bank's new

capital adequacy rules, which give limited recognition to tarm suburdinated debt, are mother nesson. In NAB's case, the bank's total capital resources now exceed the 8 per cent of risk-weighted assets regulted by the Reserve Bank. Last month, ANZ Bank, another of the Big Four, announced a A\$500m issue of five-year transferable certificates of deposit. This was too short-dated to qualify mader the Reserve Bank's rules, but was another boost for the fielding domestic bond mar-

### Sec. 19 18 1 100 1 10 1 **Philadelphia** fixes

date for longer trade

By Our Euromarkets Staff

THE Philadelphia Stock 0.247404744848548075884444444

THE Philadelphia Stock Exchange has announced it is to begin its extended morning trading session on January 20 next year. Under the new extended hours, first announced last July, the exchange's currency options murkets will open at 4.30am local time. Trading will last a total of 14 hours -in a day spanning 18<sup>1</sup>/<sub>2</sub> hours - in an attempt to cater to investors throughout the Euro-pean thme zones.

French to securitise

banking credits

Daliking credits FRENCH BANK credit securitisation is likely to start early next year, Franch gov-crament officials said yester-day, Renier reports. At a news briefing, they said the project, which envisages changing the law applying to mutual funds, would shortly be brought before parliament for debate.

The project was yesterday approved in principle by the French cabinet.

# Setback for dollar puts **Paris SE** US bond prices in a spin

By Janet Bush in New York and Stephen Fidler in London

US TREASURY bonds fell sharply yesterday in response to a plunge in the dollar, par-ticularly against the yen, and the August trade figures are ticularly against the yen, and The August trade figures are nerves about today's release of due at 1.30pm London time US trade figures for August.

ist's

Market sentiment was also hit by doubts about the impact of next mouth's quarterly refunding auction. Tha chances for the sale of a long bond at the auction have improved recently.

At the New York midsession, long dates maturities were quoted as much as % point lower. The yield on the Trea-sury's benchmark long bond

rose to 8.92 per cent. The main factor depressing bonds was a fall in the dollar bonds was a fall in the dollar to below Y130 on apparent ner-vousness about whether the US remains committed to sup-porting the US currency at around current levels. At New York's midsession, the dollar was quoted at its session lows of Y128.85. In Takyn, currency deslars

In Tokyo, currency dealers speculated that the US may allow the dollar to slide again after its rally this year because of concern about the singgish-ness of progress in cutting the trade deficit. Rumours surfaced that the August shortfall due today could be as much as \$12bn, compared with \$9.5bn in July.

Another negative influence was news that the Senate had Another negative influence was news that the Senate had passed a major tax corrections bill late on Tuesday night which would give the Treasury unlimited authority to issue long bonds. The bill still has to go to a conference between the slippage was encouraged by Senate and the House but the remarks from Mr Satoshi Sam-

considers charge for listings its, the governor of the Japa-

### By George Graham in Paris

IN AN attempt to reorganise its operating budget, France's Stock Exchange is considering the introduction of charges for companies wishing to list their shares on the market. Mr Gerard de la Martinière, who took over as chief execu-tive of the Paris bourse in

June in the wake of heavy trading losses on the exchange's own reserve funds, said the market had to reconsider how it would cover its operating costs. These are currently met entirely by a levy on broking firms, linked to tumover.

He said the exchange would

have to revise downwards its operating budget. It must also start to market its financial information. "We do not sell enough, and we do not sell it dearly enough," he cold said

But Mr de la Martinière stressed the exchange had to reconsider the fact that compa-

reconsider the fact that compa-nies issuing securities paid nothing towards the costs of the Paris exchange. The exchange has no listing charges, although companies must pay to have their share price quoted in French daily newsmars - and many comnewspapers - and many com-paules complain of a "racket" over financial advertising Even brokers sponsoring the

introduction of a company have only recently begun to charge directly for the service, receiving instead commission on the shares introduced.

One senior Paris broker said: "The French love getting their services free." On the London Stock

On the London Stock Exchange, in contrast, a com-pany with a market capitalisa-tion of say £2on (\$3.4on) on its introduction would have to pay an initial fee to the exchange of £71,420, with an annual charge for its listing of £18,640 thereafter. The fees are halved for foreign compa-

# Issue tests for Canadian bonds

Ted Jackson reports on Ottawa's switch to the auction system

o auction or not to auction? The question has been under assessment by those responsible for the Canadian Government's bond distribution system for the past five years.

Since auctioning a two-year bond in September 1983, the Department of Finance has gradually increased to about 50 per cent the proportion of gov-ernment debt which is distributed by the method. The innovation has been so successful that observers have begun to wonder why Ottawa doesn't auction all its bonds.

The alternative is the traditional allotment approach, whereby a proportion of the issue is allotted to each of more than 50 primary distributors.

The Government pays dis-tributors a commission rang-ing from C\$2 to C\$5 per C\$1,000 face value for selling their bonds, with the largest investment dealers being allotted about 12 per cent of a typical

Before 1988, all Canadian government bonds were dis-tributed by this method, with the exception of an abortive experiment with two auctions more than 25 years ago. Critics of the status quo -

doing just this. Certainly, the allotment sys-tem constitutes an invaluable cash generator for primary disoften characterised as a typical Canadian compromise - want to see still greater use of auctions as a fairer and more costtributors at a time when stock efficient marketing method. There is no reason for Ottawa market margins generally are under pressure. # Leasing side boosts Avis Europe

### By Andrew Hill

24

THE EXPANSION of its leasing activities in the second half of 1987 belped boost profits at Avis Europe, car leasing and rental group, from a restated £29.5m to £35m before tax in the half-year to August 31.

Leasing profits rose 40 per cent from £5.25m to £7.34m. Revenue more than trebled to £70.4m (£23.1m), with the lower margins attributed to continuing integration of new acquisi-

Since February, Avis's owned and managed fieet of vehicles has risen from 79.000 to 87,000, of which 50,000 are in the UK. The company's long-term plan is for leasing and rental business to generate an equal proportion of group

profits. Mr Alun Cathcart, chairman, said yesterday: "Our mission now is to dominate the full service leasing market in Europe, achieving the same position we have in car rental. I think we can continue to grow our leas-

activities in West Germany, which Mr Cathcart described as "one of the greatest areas for improvement and development".

£90.6m (£78.8m).

ing business very dramatically over the next five years." The group is particularly interested in expanding its

# Weak mortgage market hits Abbey Life

### By Nick Bunker

ABBEY LIFE, the UK's second largest unit-linked life insurer, has seen sales growth slacken since the summer, because the slow-down in the housing mar-ket has held back mortgage-related new life business. In addition unit trust sales have

remained very low. However Mr Michael Hepher, chairman, said yesterday that the group was still confident about its prospects and was raising its interim dividend 20 per cent to 3.6p.

ground of investor anxiety about the impact on the whole sector of weak mortgage-re-lated sales and Inland Revenue plans to raise its tax take from the industry.

Single premium new busi-

Abbey's new annual pre-mium business grew 34 per cent to £57.2m in the six months to June 30, driven by strong sales of pensions, Mort-gage Master life policies and Living Assurance.

### **COMMENT**

Speculative hysteria, inspired

Aitken sells unit trust side

### By Andrew Hill

AFTKEN HUME, the financial services group currently undergoing painful restructuring, has sold its unit trust operations to Aberdeen Trust Holdings, a private fund management company, for 15m in

Aitken wants to concentrate on the development of its banking and portfolio management activities. The unit trust side, Sentinel Investment Managers and Sentinel Funds Mannel Life and are managed ment, had been up for sale under a 12-month contract. Buyers of the life company since March. would have to give a further

six months notice if they wished to recover the management of these assets from Aberdeen Trust. The unit trust companies

manage about £145m of assets, 165m of which belong to Senti-£155rd to \$300ml and the inexorable spread of its valuable brand-name cannot be denied. The group opened 66 new outlets during the period,

and the promised expansion of and the leasing business will pro-vide increased stability through longer term corporate contracts. There are also plans for further extension of Cellrent, the cellular telephone rental arm, which would add value to core rental and leasing operations as well as gener ating business in its own right.

Despite these positive signs, Avis Europe's shares look expensive. Yesterday they fell 8p to 339p, but forecast profits of 268m before tax in the full closing date it had received total acceptances of 48.2 per cent, and valid acceptances of 47.6 per cent, of the Travis year still put them on a prospective multiple approaching 13, a premium to agencies (the

However, Meyer Interna-tional sold that it had acquired afarther 5.7 per cent of Travis increasing its stake to 85.5 per sector where the group is listad), motor groups, compet-tors like T Cowie, and -stretching a point - British Airways, which also relies on recurring commercial custom. cent. Meyer has made a 600p per share cash offer, with a

urance taxation is so arcane

that the stock market can hardly reach an informed view

by itself about the potential impact of the invenue's pro-posals. And, as yet, it is unclear whether the industry's

AVIS AVIS AVIS

The twin announcements coincided with a sharp fall in Travis's share price to 495p,

down 65p. Sandell's shares rose 4p to 265p, valuing its eight for five offer at 441p, including a spe-chal divident of 16p. Mayer's shares fell 4p to 885p. Reyer's offer hits its first

convertible preference share

closing date on Shiurday and it issued a statement yesterday urging those who accepted the Sandell other to withdraw their

Sintell date to withiraw date acceptances. It received approval for its offer at a special extraordi-may general meeting yester-day and Mr Oscar de Ville, chairmant, seld that the group weald continue to bay Travis

shares. shares. Mr Tim Perkins, Sandell Perkins chairman, sold that "to have gained acceptances in ercess of 45 per cost by the first closing date is an achieve-ment which clearly vindicates the board of Travis & Arnold." Reporter, Report induced out

However, Meyer pointed out that directors, families and associates constituted 28.3 per cent of the Sandell accep-Analysis said that the olds still favoured a Sandell vio-

# Approach to troubled Vivat lifts share price

# By Alice Rawsthorn

VIVAT HOLDINGS, the troubled leisurewear group which is best known for Lee Cooper jeans, announced yes-terday that it has received an approach which may lead to a takeover bid.

The company has been shrouded by bid speculation since August when two direc-tors - Lord Marsh, the former chairman of British Rail who had become Vivat's non-executive chairman, and Mr Max de Boysson, the representative of the interests of Compagnie de Navigation Mixte, which holds 25 per cent of Vivat's equity -resigned after a boardroom

TOW. Mr de Boysson's departure raised a questionmark over Vivat's relationship with Com-

pagnie de Navigation Mixte. Pepe, one of the most success-France, West Germany and the ful of the emerging UK leisu-rewear companies, has been mooted as a possible predator UK. The closure of its remain-ing plant in France will be completed early next year. Vivat made an extraordinary for Vivat, as have a number of

provision of £5.3m to cover the French textile groups. cost of the closures in its 1987 financial results. The company Vivat's shares rose by 23p to 105p yesterday on bid specula-tion. The company, which owns the Jean Jeans chain of has diversified in recent years to reduce its reliance on jeans. But its problems with Jeans Jeanie contributed to a fall in operating profits from £3.7m to £5.5m last year. After the £5.8m provision, it incurred a pre-tax leisurewear shops in the UK as well as Lee Cooper jeans, is now valued at £43m.

Vivat has been in difficulty for several years because of the increasingly competitive state loss of £3.2m on sales of £146m. of the European jeans market. Three years ago it decided to Vivat said yesterday that negotiations are at a "very pre-liminary" stage and that an withdraw from manufacturing in Europe in order to cut costs

A proposed final dividand of 1.35p makes 2.25p company, announced pre-tax profits 85 per cent higher at £10.04m in the year to end-(1.8p) for the year.

### June. Earnings per share moved abead by just 5 per cent · CONMENT

To the outsider, it may seem difficult to go far wrong in the business of storing documents. But Britannia has proved it can be done; an unfortunate development considering the aim of getting into data storage was to create a solid, cash-gen-erative leg to the business. On the other hand, the episode may have proved salutary for the company, whose concern for management controls may well have been eclipsed by its bectle acquisition programme over the last few years. There is at least plenty of scope for recovery this year, and ana-lysts expect at least £1.5m in profits from UK descrete the profits from UK document storage; with £2m coming through from the transformed Actron, pre-tax profits of £13.5m, and perhaps earnings of 18p, are in sight. The prospective p/e of around 10 is not demanding – especially as, with further rationalisation in the security industry expected, a bid is entirely possible.

British Shoe makes £58m

INTEREST BECEIVED of S12.4m, as against \$2.7m paid last time, enabled British Shoe Corporation Holdings, wholly-owned footwear and departof £900,000 from Lewis's depart-ment store, since sold on Feb-roary 1 1988.

Other income and excepment store subsidiary of Sears, to report a £2.3m rise in pre-tax profits to £57.8m in the six months to July 31. tional items slipped to £4m (27.4m) and tax rose to film (£16.5m). The disposal in July of the shoe manufacturing and While trading profits were up at £51.4m (£49.8m), turnover fell to £464.6m (£511.6m). The figures for 1987 include turn-over of £57m and a trading loss repair businesses created a net loss of £5.6m. It is intended that this will be treated as an extraordinary item in the full year's resulta

Racal Telecom rating banks on robust growth Philip Coggan and Hugo Dixon on the £1.7bn sale HE FLOTATION of Racal Telecom, the mobile communications ble if any of three things hap

subsidiary of Racal Electronics, is not only the largest new issue since last October's Crash, it is also one of the most remarkable offers-for-sale in many years.

Rarely can a flotation have been preceded by so much pub-licity and debate. And rarely can a new issue have been offered on a prospective p/e as high as 30.5 - about three

Even last year, with the bull market at its peak, stocks like Sock Shop and Tie Rack were only offered on prospective p/e ratios in the twenties.

With the market still in what many regard as a bear phase – the FT-SE 100 Index fell 24 points yesterday – the Racal Telecom pricing of 170p per share, and a £1.7bn total valuashare, and a £1.70n total valua-tion, would seem a bold move. But Racal says that such a high rating is justified because of the "outstanding growth potential" of Racal Telecom, which consists largely of the Vodafone cellular telephone network. Citicorn Scrimgson network. Citicorp Scringeour Vickers has produced forecasts showing operating profits leap-ing from £80m in the current growth. year to £139m next year and £202m the year after.

 Secondly, that Vodafone can maintain its share of just over half the cellular market. That might be threatened if a new competitor were allowed. These forecasts, and the company's own confidence in its future profitability, are based on three main assump-Although Mercury Communitions

That the number of carphone or cellular subscribers in the UK grows at about 250.000 a year - the rate it has been growing on an annualised basis for the past few months. Racal dismisses suggestions that the market could soon pened; new subscribers spent less than existing ones; Voda-fone was forced to cut its prices in the face of competi-tion; or Oftel told the company to cut its prices because it was making excessive profits. Investors have certainly had plenty of opportunity to debate

Vodafone's prospects. Racal first announced its intention to float off the business in April in what was then seen as a move designed to head off a bid from Cable & Wireless, the telecommunications group. The flotation plans caused

some misgivings amongst institutional investors, who were worried about the potential dilution of their holdings if the offer was skewed too heavily towards overseas investors. Eventually, the structure of

the issue was devised to meet most of the UK institutional objections. Only a quarter of the offer is being sold overseas, with existing Racal sharehold-ers having first claim on the rest. That may, in itself, boost the prospects of the issue's suc-CER

Demand from US investors will probably be more than enough to cope with the lim-ited size of the offering. And it will look extremely odd if the

# **UK COMPANY NEWS**

# Twists in the tale of Carless' bid for Ryan

Nikki Tait on the scepticism over the plans for 'a unique British energy company'

curious business, was the view of one large institutional investor, when considering the proposed merger between oil independent Carless and coal group Ryan International some

As the Friday egm approaches, at which Carless shareholders must decide whether to back the proposed £100m acquisition of Ryan, the situation appears to twist and twist again - in general, to Carless' discomfort. The basic issue is simple

enough.

Carless argues that the deal with Ryan, where operations range from opencast mining to coal recovery, would create "a unique British energy company"

Both companies maintain that when the electricity indus-try is privatised and the coal sector is liberalised, there will be substantial opportunities for private coal operators. Moreover, while Ryan currently has gearing of some 100 per cent, Carless' financial strength would allow the merged group

to seize these openings. The proposed marger is the latest in a number of moves made by Mr Ian Clubb since he became chief executive of Carless. Others recently have concentrated on modest expansion of the downstream activities into speciality chemicals, lubricants and the like.

Nevertheless, a few eye-brows were raised in the City. For a start, Ryan is not the best-followed company. It was

originally a small Welsh coal recovery gronp, which went into serious losses in the early 1980s before being saved from receivership by a group of investors led by Mr Crispian Hotson. Mr Hotson, a South African who had previously been running a small Kentucky coal company, became managing director and a £4.76m refinancing package

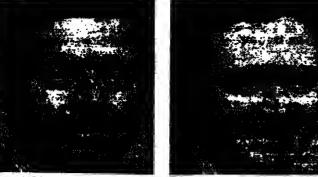

took place. Since then, there has been considerable reorganisation -acquisitions and disposals, including the \$27m purchase of Derek Crouch's opencast coalmining and housebuilding operations. Profits, after a reduction in the depreciation charge to £5.3m, reached £10m last year against £8.84m in 1986 Turnover was £96.3m. In the first half of 1988, Ryan's

pre-tax figure slipped from £4.1m to £3.2m. While no-one is critical of Ryan directly, there is a dis-tinct perception that prospects for private coal operators are

difficult to assess and, if they are so bright, there may be heavyweights like Taylor Woodrow, keen to cash in. Moreover, Ryan is seen as Mr Hotson's creature. "It's not that Ryan's a bad business,"

says one analyst, "but it's a personal business. Either you back him or you don't." The second note of dissent hinges on Carless itself, where

its declared policy of spanning hoth downstream and upstream activities has not made life easy for analysts of late. On the one hand, some

Ian Clubb (left), chief executive of Carless, and Crispian Hotson. managing director of Ryan

demied by the oil company. Nonetheless, it has certainly been viewed as a factor in the

rather curious behaviour of

London Merchant Securities,

announcement remains some-thing of a mystery. It does,

after all, have two board seats

at Carless, and Mr Robert Spier, LMS finance director,

was at the meeting which approved the deal. The

rumoured story is that it was

company-watchers are not entirely unsympathetic to Mr Clubb e arguments.

However, there is a strong belief that a successful deal would push the way in which Carless shares are rated much further away from that of an exploration company - where assets are the key factor - and put them instead on an earnings basis. Moreovar, the earnings

enhancement which Ryan would undoubtedly provide one analyst suggests earnings in 1988/89 could rise from just to over 3p a share without Ryan to over 5p a share without Ryan unlikely to compensate for this change of basis. That, in turn, could hring significant share

what gives the situation its added twist is the implication that the Ryan deal reflects on Carless' own potential as a bid target. This, of course, is hotly

Lord Rayne himself, chairman of LMS, who eventually over-ruled the initial decision, which was taken without full consideration of the implications for the Carless share

price. The bahaviour of Kelt Energy, a smaller oll independent controlled by French businessman Mr Hubert Perrodo and with a market capitalisa-tion of £100m, is so far even less clear. Its announcement on Monday that it was consid-ering a full bid attracted growing scepticism as the week wore on Analysis remain dubious about how a leveraged bid, which Kelt has said it would be, would work. Any subsequent break-up would face the problem that the downstream activities are fairly diverse, with the upstream ones (which Keit presumably would wish to

the investment company which holds 27.2 per cent of Carless and is its largest shareholder. LMS had built its stake over the years by selling Carless, in succession, its US oil and gas keep) carrying the biggest pre-That said, Kelt has at least kept the pot boiling with yes-terday's purchase of 53m shares from institutional holder TR Industrial & Genassets and its holdings in Win-terbottom Energy Trust and Century Power & Light. How-ever, it is also no secret that eral. The LMS camp appears to be adding Kelt's new stake into its estimated tally which, assuming that Rawda invest-ments stays firm and including subject to the right price. Quite why LMS gave its backing in the initial merger

a couple of unnamed institutions, it reckons now tops 40 per cent Who knows, there may be more surprises yet. But if Fri-

day's meeting proceeds as planned, Carless' description of a "photo-finish" looks all too true. And "what happens next?" will be a good question.

# Homes lift boosts Tay profits 70% to over £5m

A HISE in the number of homes sold, from 541 to 710, resulted in pro-tax profils up 70 per cent to 25.15m at Tay Homes, Leeds-based house-builder, in the year to June 30. Turnover rose by 59 per cent from 522.25m to 525.45m with most of the sales volume con-ing from the group's core regions of Yorkshire and Scot-land, mainly in the second land, mainly in the second half. Those areas continued to thrive, Wir Trever Spencer,

chairman, reported. The company is dealt on the USM, but plans were in hand for a full listing.

for a full listing. Earnings per share improved to 47.2p (34.5p) and a final dividend of 5.95p (4.43p) is recommended for an 8p (6.2p) total. The directors are proposing a two-for-one scrip issue and to raise the authorised capital from f2.35m to f7.65m. Looking ahead, Mr Spencer said finat since the year and Yorkshire in particular had shown a significant uplift in selling prices. The thubing of the rights issue in June 1987 had left the group ideally

the rights issue in June 1987 had left the group ideally placed to use the funds to invest both in Yorkshire and other areas for future growth. The land bank had been increased to over 2,500 mills. In the current year, with the sion of enlarging geographical coverage for long-term regional growth, a new office to cover the Midlands and northern Home Counties had been established in Leighboth Burnard. The new Flynosith Buzzard. The new Plymouth office for the south west was now well established and had made its first nominal contribetton to profits.

# All-round organic growth boosts UEI to £14m in first half

### By Clare Pearson

UEI, high technology electronics and engineering group, yesterday announced pre-bax profits up 26 per cent at the haff year to July 31. Mr Peter Michael, chairman, said the advance was achieved thrometh organic growth stdiarg which makes racing

group, yesterday announced metax profits up 26 per cent at £14m, and earnings per share 22 per cent higher at 12.8p, in the haif year to July 31. Mr Peter Michael, chairman, said the advance was achieved through organic growth, spread fairly evenly ecross the four divisions of UEL sound and events text and gravities

four divisions of USE sound and vision; text and graphics; advanced engineering, and sci-entific and medical. Within this last division, he expected significant research and marketing benefits to fol-low from the \$20m acquisition in August of The Nucleus, a US

nuclear detection equipment company. There were no acquisitions during the first half.

Spending of research and development during the period remained substantial; at film it

remained substantial at Loss 1 was up 14 per cent on the com-parable period last year. The company continued to generate cash strongly and borrowings full from 26.5m at

borrowings led men 25.50 at the last year and to fin. Within the sound and vision division, initial teaction to new sound-editing products of the SSL substallary had been highly favourable, and volume deliveries were expected to commence next year.

This division had also recently benefited from a film two-year order from the indonesian state broadcasting com-pany for the design and instalistion of a comprehensive regional facility. The text and graphics divi-

sidiary which makes racing and high performance car engines. Turnover rose from £70.67m

to £77.45m, but was 17 per cent up taking into account a dis-posal. An interim dividend of 2.9p (2.3p) is declared.

## · COMMENT

Comments These results showed UEI keeping up the good work of mixing the various technologi-cal skills within the overall group to produce new preducts that push back the frontiers in ity glaunorous markets: broad-casting, publishing, and high-performance car engines. With the accuration of the IIS head the acquisition of the US-be The Nucleus, which fits needs with its similar European sub-sidiary Link Analysis, similar synergistic opportunities should be seized in its scantific instruments division. Elsewhere, next year should see a strong performance from SSL - the only subsidiary not fining on all cylinders during this period because of development costs of its new products. With ne reason to expect a faltering in its five-year-old 20 per centplus growth rate, a passinian p e ratio ef over 14, assuming pre-tax profits of about 532m this year, is onlively justified.

(£93.72m). Mr Brian Pritchard, First-half pre-tax profits at Brooks Service Group, hirer and manufacturer of linen and chairman, said the group had drawn particular benefit from the wide geographic spread of its housing interests, and tar-gets should be achieved despite workwear, rose 34 per cent, from £452,000 to £605,000. Turn-over in the 26 weeks to June 25 moved ahead 11 per cent to

17.81m. Earnings rose to 3.7p (3p) and the interim dividend is stepped up to 1.6p (1.4p).

Cluff completes transformation By Kenneth Gooding, Mining Correspondent

CLUFF RESOURCES, quoted on the USM, will next year complete its transformation from a lossmaking, minor oil company to a profitable, medi-um-sized gold mining group with an output of about 100,000

while an output of about 10,000 troy ounces a year, said Mr J G "Algy" Cluff, the chairman, yesterday. The company would be in a position to pay a dividend next year hut would consult its advicent and mader showhold its advisers and major sharehold-ers for their opinion about whether ona should be declared.

"My preference would be to pay a dividend. It has been a long haul for the shareholders and they should be rewarded with some income," said Mr Chiff, who personally owns 6.7 per cent of the company.

per cant of the company. He was speaking after Cliff announced a pre-tax profit of 284,000 for the half-year to June 30, compared with a loss of £625,000 for the same period in 1987. Turnover increased by 68 per cent to £1.88m, from £1.12m. Earnings per share were 0.13p (1.15p loss). Gold production from the

5

Cluff mines in Zimbab the half-year totalled ounces and was expected in excess of 30,000 ounc 1988 as a whole.

Cluff said its Royal Family, Freda and Rebecca mines in Zimbabwe were set to produce at an annual rate of 80,000 ounces and two more projects were likely to be brought into production next year to take canacity to 100.000 ounces.

The average cash cost of gold production in Zimbabwe was expected to be about \$225 an ounce Mr Cluff pointed out that the

Zimbabwe government had set (about US\$370) floor price for gold mined in the country. Production from the Trasac-

cion mine in Almeria, Sp ain. 50 per cent owned in a joint venture with Angtelagasta, was expected to begin within three months and will add another 5,000 ounces to the company's annual gold output.

Cluff had strengthened its links with Autofagasta and

· COMMENT

The response to an FT article\* describing how Schroders set about sift-ing the good propositions from the bad has given Smitham and his team pause for thought. Several entrepreneurs tele-phoned to say that their impression of venture capitalists as distant and unhelpful had changed. "They said how pleased they were to see we were human after all," he says. These comments considered Smithem

These comments convinced Smitham and his fellow executives that an improvement in Schroders' marketing effort was needed if venture capitalists were not to be bracketed with bankers as remote and unfriendly. "We realised our approach was

impersonal; that people wanted to know how deals were done; that we needed to humanise the case histories of deals we had done that we published in our bro-

chures," he says." The dilemma facing Schroders is par-alieled at many of the 120 or so venture. capital companies which have been set up over the past decade. The venture capital industry has grown at rapidly as

capital industry has grown at rapidly as entrepreneurs and, more recently, com-pany executives intent on staging man-agement buy-outs, have made grateful use of a new source of funds. The difficulty for the venture capital-ist has been not in finding customers but in fending off the deinge of enquiries. Venture capital groups typi-cally turn down 49 out of every 50 enquiries they receive. "The problem with advertising is you get inundated with a lot of not-very-good proposals." says John Nash, managing director of says John Nash, managing director of Advent and current chairman of the British Venture Capital Association

The past year so has seen the begin-nings of a change. The large amounts of money available for investment, partic-ularly in the popular buy-out field, have forced the venture capital industry to rethink its approach to marketing. Venture capitalisis now realise they must sell themselves to get the really good deals.

"Until recently marketing effort and marketing budgets were low," says David Hutchings, marketing director at Midland Montagu Ventures. "Resources were allocated on an ad hoc basis rather than as part of a strategy. But times have changed."

Ironically, for an industry which sup-posedly takes a long-term view of its investments, typically from three to seven years, venture capital has taken a short-term view of marketing. "It is a very hard decision to allocate specific resources to an area such as marketing, which is unlikely to produce immediate. results," notes Hutchings. Midland Montagu decided a more

determined campaign was needed to increase its visibility and to differenti-ate it from its competitors. Money was

# more human face

Charles Batchelor explains why venture capitalists are polishing up on their marketing

available aplenty for the attractive deal so the venture capitalist had to sell his nanagement expertise either in helping young and struggling companies or in putting together complex financing. Midland Montagu spent two years hunting for a brand name and came up

hunting for a brand name and came up with The Venture Catalysts, a title Hutchings feels reflects his fellow exec-utives' industrial experience and their catalytic role in bringing together man-agements, companies and funds. This has led to a significant improvement in Midland Montagu's market position, he claims claims

A high-profile advertising promotion campaign is also the route that has been taken by 3i, the largest provider of venture and development capital in the UK. From the adoption of the new title and "eye" motif in 1983, 3i (formerly known as investors in industry) has adopted an innovative approach to the generally dull world of financial ser-

vices advertising. 3i currently spends £2m a year on a combination of TV and newspaper advertising and travelling "roadshows." This campaign is carefully planned to achieve maximum impact, explains Chris Woodward, marketing director.

The TV ads explain who we are; the full page ads in national newspapers say in general terms what we do; while coupons and promotional inserts in newspapers and magazines and the roadshows aim to explain what 3i can do for the individual businessman."

The roadshows typically attract 800 entrepreneurs over the three days for entrepreneurs over the three days for cial consultants, its six strong venture to set yourself team set about cultivating accountants, that." cial towns, 3i sent out 10,000 informa-tion packs to local businesspeople in provincial cities such as Glasgow, Man-August 16, p.10.

Birmingham before holding a roadshow there. It targeted directors in companies listed on commercial databases as having turnover of around fim and mem-bers of business graduate and other professional associations.

As the largest UK venture capital organisation, 31 of necessity has to gen-erate large volumes of business. Unlike the smaller venture capital organisa-tions which carefully select their investments and closely monitor them for a quick return 3i takes a "hands-off" approach to its investments and is prepared to give them time to mature. To reach the 1,000 projects it needs to back each year it has to spread its net wide

and use advertising, says Woodward. This technique has been successful because 50 per cent of those polled in awareness tests knew of 31 compared with just 8 per cent two years ago, he says. But the mass approach would not be suitable for the smaller more speci-alised venture capital organisations,

Woodward acknowledges. Rothschild Ventures, part of the N.M. Rothschild banking group, is typical of the smaller organisations which are now taking a more structured approach to marketing. When the number of proposals coming to Rothschild from out-side the south-east of England started to drop off last year it took a hard look at how it sold its services, says Jeremy

Dawson, managing director. Like many other venture groups Rothschild got most of its deal propos-als from accountants and other financhester, Leeds and Birmingham. They now make regular visits, call in for a chat if they are in the area and declare their willingness to give a preliminary reaction to a proposal over the tele-

**MANAGEMENT:** Marketing and Advertising

abone. Rothschild Ventures is also culling its own database of companies with which it has had dealings to pick out those with sales of f3m to f10m. It then approaches those which seem most likely to need additional venture capital funding. "It's an informal approach. There is no hard sell," says Dawson. "You have to be able to offer more than money. We may offer to find takeover candidates for fast-growing companies or suggest a company goes to market or sells some shares."

Tony Lorenz, managing director of ECI, another of the smaller venture funds, says marketing plays a more important role in his company's latest five-year plan, drawn up in early 1988, than in its predecessor. "Five years ago the industry was growing quickly and deal flow was ballooning," he recalls. Individual members of the ECI team now have a personal contact list of now have a personal contact list of accountants, lawyers, head bunters and directors of companies which have already been helped, whom they con-tact and lunch on a regular basis. "Con-trol is quite formal because we don't want to tread on each other's toes," says Lorenz. "It's uncanny how the meetings lead to deals." Lorenz and his team also regularly write articles for the specialist financial

write articles for the specialist financial press and make presentations at conferences and seminars to keep their organisation's name in the eye of inter-mediaries who provide the flow of

deals. ECI is currently promoting the idea of "venture buy-outs" - buy-outs of small companies with a chequered trad-ing history. Such deals, typically worth less than £10m, require special skills because they are as difficult to do as start-ups and are far removed from very large buy-outs. Lorenz argues.

Attaching brand names like this to "products" is as important in the venture capital industry as it is in the consumer field. Midland Montagu Ven-tures has heavily promoted the concept of the management buy-in ~ where outside managers come in to run a com-pany - as something new and exciting. It successfully used a combination of seminars, magazine articles written by its staff and advertising to establish the buy-in, though the practice of outside managers coming in to rescue ailing companies had been around for years. The buy in team nevertheless took over from the "company doctor" as a fash-ionable means of revitalising poorly-performing businesses.

Whatever method individual venture capital organisations choose to market themselves the common factor is a need for greater professionalism. "In the past the strategy was opportunism," says Woodward. "But now the policy of 'see a deal, do a deal' is inadequate. You must still be opportunistic but you need to set yourself objectives on top of that."

# Focus on differences. .

Philip Rawstorne on contrasting studies of European consumers

s Europe moves towards a single mass towards a single mass market, many compa-nies in the US are moving towards more regional or local marketing. Procers & Gamble, Colgate-Palmolive, Pepsi-Cola, Campbell Sonp and Apple Computer are among the companies that have reorganised either, or both, their sales and marketing organisations to focus more closely on ever-

smaller geographic targets. Why? "Because they realise that there are important differ-ences in consumers from one part of the country to another and the differences were not being properly addressed under the old national market-ing or sales organisations," says Clay Timon, director of worldwide advertising for Col-gate-Palmolive. Enropean businesses must

not lose this consumer focus, Timon warned at the pan-Euro-pean advertising and market-ing conference convened in London last week by the Inter-national Advertising Association and International Busi-ness Communications.

"Just because January I 1993 rolls around the Italian house-wife will not suddenly become a homogenised European con-

already co-operating in a major study of the pan-European market designed to identify

shared values and attitudes

among consumer groups of dif-ferent nationalities.

Market research on a Euro-pean scale faces difficulties

but it also carries with it strong beauty enhancement or cosmetic characteristics," Timon said. Again, the different perceptions were reflected in the advertising. Some products had to be reformulated to meet different consumer needs, Timon

sumer'. Her needs, her desires and her consumption habits are not going to change appre-ciably." Colgate's products had been sold in Europe since the late 1800s. Today, with operations in every Western European country, Colgate Europe's annual sales of \$1.5bn repre-sented a third of the company's worldwide turnover. But there were important

used in northern Europe pri-marily straight from the bottle to clean small areas. Ease of But there were important differences in how the comapplication and a shiny result pany marketed its products in various European countries, Timon said. Toothpasta was were what consumers wanted, and the advertising focused on regarded in Greece and Spain as being more of a cosmetic for the individual, while in the Netherlands and the UK it was seen more as a family health product. "These very different needs, while being met with

the same product, result in equally effective, but very dif-ferent advertising." Spain and the UK had the highest per capita consumption of bar scap. "But when you talk to consumers in the two countries you find that they see bar soap in very different terms. For the UK, bar soap is an all family item, almost a commodity, and something one uses to get clean. In Spain, soap is a cosmetic. It cleans,

ers diluted Ajax and used it to clean much broader surfaces, more often made of tiles or wood than plastic. Under such conditions, Ajax left a cloudy film which had to be removed by rinsing. Colgate, therefore, reformulated the product so

those qualities,

reported. Ajax cleaner was

In southern Europe, consum-

that rinsing was no longer nec-essary – and its advertising emphasised the labour-saving. Business would reap the main benefits of the single market from cost sevings. Those benefits would have to be shared with consumers in the form of price reductions or product improvements if the single market were to work, Timon suggested.

# A SECOND SUCCESS FOR THE -MATRA COMMUNICATION PARTNERSHIP

The pan-European digital cellular service, due to begin in 1991 will be a powerful technological symbol of the single European market.

To meet the agreed timescale, 15 European operators have issued requests for tenders to supply pan-European digital cellular infrastructure and equipment.

These operators must now choose their suppliers. The first commitment has already been made in the UK by Racal Vodafone, who have most difficult cities in Europe for spectral and radio chosen the Orbitel Matra partnership for the supply of a major part of their network requirement in London and the South East.

France Telecom has now given formal notice of its selection of Orbitel, Matra Communication and its partners for the Paris network.

France Telecom's order is twofold; firstly an experimental pilot system is to be set up to validate the European specifications; secondly a fully operational system is to be installed with equipment jointly developed by Orbitel and by Matra Communication and its partners.

London and Paris are considered to be the frequency management. Orbitel and Matra Communication have demonstrated their ability to meet this challenge and are well placed to capture a major share of this equipment market worth up to £1 billion a year.

Orbitel Mobile Communications Limited Head Office: Keytech Centre, Ashwood Way, Basingstoke RG23 8BC, England. Tel: 0256 843468. Fax: 0256 843207. MAIRA COMMUNICATION

### MANAGER ADMINISTRATION & ACCOUNTING - £20,000

Qualified or part qualified professional to be responsible for all administrative, accounting, settlement and reporting functions of an expanding portfolio management company engaged in global asset management.

Good working knowledge of computerised systems required. The ideal candidate will play a key role within a small team. Salary and benefits of up to £20,000 depending on experience. London Mayfair location. Please reply enclosing curriculum vitae.

- The GD player is made in Japan, the Scotch in ... Scotland (bear with us, this conundrum gets harder as you go).
- They are both in demand in New York.
- They've both been imported by a member of the group of companies responsible for their manufacture. The UK and Japan have different taxation rates, and tax rates in the
- United States are different too. In New York, import tariffs on the two products also vary.
- So, how much should the importing company pay its sister companies for the goods in order to madmiss profits for the group as a whole?
- Not surprisingly, this question has baffled more than a few international business people. And as trans-piobal trade continues to increase, more and more of them are turning to experts.

### Experts like Price Waterhouse.

We have already established ourselves as leaders in the highly complex and demanding field of Transfer Pricing, with a specialist London unit which acts as a centre for our workdwide transfer pricing operations.

The global approach we take is almed at producing maximum after tax profit for our clients, guiding them through a potential minefield of differing international rules. It's a fast-growing and dynamic market area. And it represents a uniquely rewarding range of longterm career opportunities within the firm.

The London unit is seeking to recruit a number of senior consultants. who will liaise at the very highest levels with clients all over the world. Strategic analysis skills are of paramount importance. An aptitude for and positive anjoyment of problem solving, combined with the ability

to work as part of a highly professional and specialist team, are equally essential. You should have some familiarity with the concepts of international taxation (though in-depth experience and detailed knowledge of taxation rules is helpful rather than essential) and have gained some experience in an accountancy-type environment. Most of all, you will have the communication skills, intellect and personality to take charge of international projects and see then through to completion - however complex the problems.

The potential for progression for successful candidates is immense either within the Transfer Pricing group or elsewhere within Price Waterhouse, Salaries and benefits will be competitive,

If you relish the challenge of applying your mind to the international growth of Transfer Pricing, we would enjoy meeting you. For more information, please contact:

Bonne Paton Price Waterhouse Southwark Towers 32 London Bridge Street London SEI 9SY Tel. 01-407 8989

Excellent career progression

Stimulating environment **Business Development** 

Consultancy - London

We are a well established and expanding consulting group offering a range of specialist services in the more efficient use of working capital to major multinational companies.

To enhance a continuing expansion programme, we now seek a financially orientated executive, who is capable of communicating the nature of our work to the highest levels within The Times 1000 companies.

Whilst an initial period of induction will be essential, this will be followed by focussed activity meeting targets within a particular product sector. During this period you will be simultaneously developing your career for future promotion within this stimulating environment.

Interested candidates must be able to demonstrate high levels of commercial awareness, initiative, drive and interpersonal skills and will have a track record of on-going communication with Chief Executives and Chief Financial Officers. Aged 30-35 you will probably have a recognised accountancy qualification and a degree/MBA would be a major advantage.

As well as a very attractive salary package plus fully expensed car, you will be provided with a pension scheme, life assurance and private health insurance. Interested candidates should write in confidence to Michael Bird, Director,

enclosing a full CM and stating how each of the above objectives are met.

### **GUIDE TO UNIT TRUST PRICING**

the Anthonised section of the FT Unit Trast information pages is over the service to readers and to conform with new imitation

rative and other costs which have to be paid by new

CONCELLATION PHILTS CONCELLATION PHILTS The maximum spread between the offer and bid prices is determined by a formula laid down by the government. In practice, mit trus, managers quote a much marrower gread. As a result, the bid price is often set well above the minimum permissible price which is called the cancellation price in the lable. However the bid price night be moved to the cancellation price in circumstances in which there is a large excess of selfers of units over bayers. Time: The time shown alongside the fund manager's name is the time at which the onth trusts' daily dealing prices are normally set unless another time is indicated by the symbol alongside the individual unit trust name. The symbols are as follows:  $\Psi = 0001$  to 1100 homes:  $\frac{1}{2} - 1101$  to 1400 home;  $\frac{1}{2} - 1401$  to 1700 homes;  $\Phi = 1701$  to midnight. HISTORUE PRICING The letter H denotes that prices are set on a historic bais. This means that, unless there has been an intervening portfolio revaluation, investors can normally bay and sell units today at the price appearing to the manager which have been set of the basis of yesterday's asset water.

FORWARD PROCENCE FORWARD PROCENCE The letter 5 denotes that prices are set on a forward basis so that investors can be given on definite price in advance of the purchase or sale being carried out. The prices appearing in the newspaper show the prices at which deals were carried out yesterday. Other explanatory notes are contained to the last colours of the FT Unit Trust information

**MONEY MARKETS** 

# **UK rates firmer**

INTEREST BATES were slightly firmer on the London money market yesterday, in spite of the continued strength of the pound.

Intervention by the Bank of England to sell starting, tended to confirm the view that UK interest rates will not be cut to prevent the pound rising. Base

# UK clearing bank base leisting rate 12 per cent inten August 25 & 28

rates are expected to remain at 12 p.c. in the foreseeable, unless economic news forces vet another rise.

Three-month sterling inter-bank rose to 114-114 p.c. from 11%-114 p.c., and 12-month increased to 11%-11% p.c. from increased to 11%-11% p.c. from 11%-11% p.c. The Bank of England ini-

tally forecast a money market shortage of around 2100m, but revised this to a flat credit position in the afternoon. The authorities did not operate in

the market during the day. Bills maturing in official hands, repayment of late assistance, and a take-up of Trea-sury bills drained £305m, with a rise in the note circulation absorbing 2110m. These factors were offset by Exchequer transactions adding £290m to liquidity, and bank balances above target of £15m.

The market in ECU Treasury bills began trading on a quiet note, with prices on all maturi-

ties virtually unchanged. Three-month bills were quoted at 7.20-7.15 p.c., compared with an average yield of 7.18 p.c. at Tuesday's tender.

In New York the Federal Reserve added \$1.5bn of tempo-rary reserves to the banking system, via a round of customer repurchase agreements, when Federal funds were trading at 8% p.c.

In Frankfurt call money was unchanged at 4.75 p.c. after the West German Bundesbank drained a net DM2.3bn from the banking system at this week's securities repurchase ent tender.

The Bundesbank accepted bids of DMI6bn for a 28-day pact at a fixed 4.25 p.c., but DMI8.3bn left the market as an

earlier agreement expired. Banks face a drain of liquidity from tax payments and there was some disappointment that the central bank did not fully replace the expiring pact, but the market remains liquid, and there is little fear of

firmer interest rates. Reserve holdings of the com-mercial banks rose to DM57.6bn on Monday, after climbing last week, and reaching DM56.2bn on Friday. Average reserves for the first 10 days of October were DM55.1bn, against an esti-

mated requirement for the whole month of DM54.5bn.

neasures.

As if to compensate for its long reluctance, the Court adopted a language more radi-cal than was ever heard from a US court. The judgment goes much further than the German anti-trusters who apply the effects doctrine, embodied in their legislation, only with the greatest common as far long reluctance, the Court greatest circumspection; as far as I know, they have never used it against a foreign export cartel as the European Court has in the present case. The UK, in general, sup-

ported the Commission's case against the alleged cartel of US, Canadian, and Finnish suppliers of wood pulp but argued that only those of its members can be prosecuted who operated within the Com-mon Market through subsid-iaries, branch offices, agents or business representatives. The UK holds that the effects doctrine is contrary to interna-tional law and is unwilling to support prosecution of foreign firms who merely supply goods to the Community without con-

dncting any business operations on its territory. The Court rejected UK's sub-mission and held that supply of goods from abroad is, in itself, an act establishing the jurisdiction over anti-competi-tive belowieur of the arguniter tive behaviour of the supplier. The judgment must be seen as a political act, the Commission's and the Court's answer to the adoption by the US, in August 1988, of the Trade and Competitiveness Act. This Act. directs the Executive to detect, and to retaliate against, "for-eign unfair trading practices." It is viewed in Europe and in

the Far East with apprehen-sion, as providing a platform for further US protectionist

One can be hardly surprised

. . . 1 in this case Community law, outside of territorial jurisdic-tion contains the seeds of a potential international conflict and of retaliation. It is not a matter for law which, by its very nature, must treat all suspects equally. A political approach is unavoidable as domestic competition rules cannot be applied exterritori-ally to trading partners who are stronger and prepared to resist or retained.

resist or retaliate. The Community's attitude to infringements of competition is therefore necessarily political and selective. Internationally, the Community challenges cer-tain raw material suppliers while leaving in peace and even participating in other international raw material agreements, including the ill-famed International Tin Agreement. It proceeds rigourously against wood pulp suppliers whose price fixing would dam-age the newspaper and card-board industry of the Commu-nity. But did not have the courses to move against Opec at the time when it liked the price of oil up to \$30 per barrel, causing havoc in the entire

European economy. The Commission can, now with the Court's blessing, attack foreign export cartels of firms operating in market economies. No such steps can be taken against the monopoly exporters of state trading countries, whose prices, quotes and terms of trade are determined by governments.

The extraterritorial enforcement of national competition rules is clearly a matter of trade policy and, so far, outside the rule of law. Consequently, such matters ought to be left to the member governments to

place in the US domestic marplace in the US outlestic mar-ket. No such restriction seems to be contained in the Euro-pean Court's judgment which authorises prosecution of any cartelised foreign exporter sup-nations the Courties in Nether

plying the Common Market. The Court's insistence on such extreme concept of the effects doctrine, untempered by the requirement of some by the requirement of some business presence within the territory, is underlined by its bandling of the appeal of the Pulp, Paper and Paperboard Association of the US ("KEA"). Association of the US ("KEA"). While the UK proposed that KEA could not be prosecuted because it did not operate within the BC territory, the Court allowed its appeal on dif-ferent grounds. It said that the alleged infringements of KEC rules were committed by groups of members of KEA operating within its frame-work, but for which KEA could not be held responsible. This excussion into marits, the deci-sion on which the Court referred to its Fifth. Chamber, shows how anxious the Court shows how anxious the Court was to allow the appeal with-out weakening its extreme for-mulation of the effects doc-trine, and its rejection of the requirement of presence within the territory.

Community cartels abroad.

Both the UK and Germany

exempt export cartels from the

sound analysis and elegant presentation can be warmly recommended, but their con-clusions have no bite. As I argued earlier in greater detail\*\* there is a need to match the internationalisation of business by a corresponding internationalisation of the law. Common rules spreed, in the first instance, between the major trading nations could then be interpreted by an inter-national tribunal, perhaps a specialised chamber of the International Court of Justice in the Hague. The US now say that this venerable and grossly underomployed institution ought to be revived. The Wood Pulp judgment may convince them that extraterritorial juris-diction is no longer a monopthe territory. The Court also rejected the American exporters defence that their cartel was approved in the US under the Webb In the US under the web -Pomerene Act. The Commis-sion pointed out that the US authorities were informed but did not object. The Court con-cluded that the Webb-Pomerdiction is no longer a monop-oly of US courts. This may open the door to an interna-tional solution \* A.D. Neale and M.L. Step ene Act merely allowed export cartels but did not require hens, International Business and National Jurisdiction, their formation. This reasoning is not devoid of logic but will make it impossible to defend

ME nominees box

MB Group, formerly Metal Box, was one of few leading stocks to resist the market's malaise. Indications that the recent large buyer was chasing the charm bridge touched off the share price touched off renewed speculation, sending the shares 6% higher to 279%p after volume of 11m. After the market closed it

was revealed that Elders Investments, an offshoot of Elders IXL, had assembled a 5.1 per cent stake in MB, including shares held through nominees.

Recent speculation over stake-building had earlier been justified when MB announced the discovery of three nominee names, holding between them 11.6m shares, or 8.47 per cent of the equity. It said that it was seeking legal advice on the possibility of disentranchising the shares.

MB is an old bid chestnut; 1 2- st 22 with BTR, Jefferson Smurfit and Williams Holdings all mentioned as potential predators recently. However, attention-had focussed on the likelihood of a European or US competi-tor taking a stake in MB. Carnaud, the French canner, may 1125 · 2.3 be contemplating expansion via fund-raising for a bid. 1-12-

## \$ 1-7.2 m RTG set fair

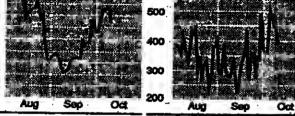

Racal shares came under pressure and slipped 6 to 311%p on turniover of 35m as. the market registered minor disappointment with the details of its forthcoming flotation of a 20 per cent stake in Racal Telecommunications Group (RTG) later this month. Dealings in RTG are expected

to commence on October 26. The RTG stock will be offered at 170p à share to raise some £340m for Racal, valuing the whole of RTG at \$1.7bn. The market had been expecting a price of 1750 a share, com-

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

# **COMMODITIES AND AGRICULTURE**

# Zinc climbs to record on **London Metal Exchange**

By Kenneth Gooding, Mining Correspondent

price of zinc for delivery in three months reached a record \$1,395 yesterday to coincide with publication of two important studies which predict a bnoyant fnture for

-38

base metals. "The pendulum is now swinging away from precious metals back to base metals. For many mining companies the margins that can be obtained from their base metal activities could exceed that now being obtained from mining gold," says Mr David Williamson, director of metals and mining research at Shearson Lehman Huttoo, in his

company's review. Meanwhile Rudolph Wolff, the metal trading group, suggests that the current squeeze on interest rates will have a marked effect on consumer spending with obvi-ous implications for commod-

ity prices. "However, there are mitigating circumstances that may help to cushion the expected fall in metal prices. Firstly, primary inventories are low. Secondly, the cyclical lag of six to nine months

THE LONDON Metal Exchange between economic activity and metals consumption should help to soften the base metals industry from a fall in demand. "Thus, one would expect to see base metals prices continue to weaken, although a return to the former depressed levels is extremely unlikely," says

Wolff. in its study, produced, like Shearson's review, to coincide with London's "metals week" which attracts producers, consumers and traders from all over the world, Wolff suggests that the current euphoria in the base metals market is being driven mainly by copper.

However, so far this week zinc has stolen the limelight. Traders said falling LME stocks and the possibility of an indefinite strike by Peruvian miners from October 17 helped boost the price again yesterday.

After touching \$1,395 a tonne at one point, the three-month price eased a little to close at \$1,389, up \$15 on the day.

Wolff suggests that the tight

supply situation will continue throughout 1989 and the zinc

price will average \$1,280 next year.

Sewie - European Charl

1988

The Shearson analysis indicates that the zinc price, adjusted for inflation, has remained relatively stable since 1978 and, in the first half of 1988, was, if anything, "A little on the low side" in this

comparison. Mr Williamson says demand for all base metals will continue at either record or near-record levels hut increases in supply will overtake demand and lead to a modest rise in stocks.

The effect will be to cool down the recent base metal bull market and lead to a general easing of prices. Nevertheless, we do not believe that prices will fall, in either nominal or real terms, to the levels seen between 1982-86. Rather we believe that, because of good demand, prices will maintain levels which will ensure good returns for the

mining industry." In its forecasts, Wolff predicts that the LME threemonth aluminium price will average 90 cents a lb in 1989, compared with 105 cents this year, while copper will average 88 cents a Ib next year, against 100 cents in 1988.

# **Rubber fall surprises traders**

By Wong Sulong in Kuala Lumpur RUBBER PRICES are now back to where they were at the start of the year, after falling sharply in response to a lack of buying interest in major markets in recent weeks.

Just as the sharp price increases in April and May confounded the market, the sudden slide in prices during the past week has canght traders by surprise. On the Kuala Lumpur Rnb-

ber Market, RSS No 1, the hedging grade, which soared to an eight-year high of 400 Malaysian cents a kilogram in May, closed yesterday at 279 cents, down 21 cents in the past week alone.

The fall would have been even greater hut for the weakness of the Malaysian dollar. On the London physical market the spot price for RSS No 1, which peaked at 88p a kilogram four months ago, is down to 56.25p, about 6p below the level at the start of the vear.

tonnes from his 370,000 tonne The International Natural stockpile since September last year, and traders attribute the Rubber Organisation's five day moving average, widely regarded as the world's current market weakness to his heavy sales during May average rubber price, has and June.

interest from western consum-ers after the summer holidays did not materialise, probably dne to the fact they are still London spot price (pence per kilo) digesting the huffer stock deliveries," said a Malaysian Rubber Exchange official

Eastern bloc countries are reported to have exhausted their budgets for rnhher purchases because of high prices earlier in the year, and

are staying away Also, the heavy rains in Malaysia and South Thailand during August did not appear to have affected production as severely as expected. "The signals we are getting

are quite confusing. Demand remains fundamentally strong; tyre sales in Europe and the United States are buoyant. But rubber supply from producing countries could also have gone up significantly because of higher prices," said the MRE official Malaysian traders say the

current market tone is weak and unless fresh buying interest emerges, prices are expected to weaken forther. The only rubber grade that

is holding steady is later

# Increase in coffee pact quota predicted

# By David Blackwell

AN ADDITIONAL 2m bags of coffee is likely to be added to the International Coffee Organisation's 56m-bag total world export quota in the next sir weeks, according to E.D. & F. Man, the London trading house.

The first increase of 1m bags would be triggered on October 25 if the ICO 15-day average of the composite daily price for coffee remained above 114.40 cents a lb. Another 1m bags would be added if the price was still above that level 15 work-ing days later.

We feel it is probable the 15-day average will be at or above 114.40 cents on October 25 and most likely for a second increase 15 market days after." Man says in its latest report on the coffee market.

It is the first to speculate publicly on the likely development of the export quota since the ICO talks ended with a complex deal in the early hours of Sunday October 2

Yesterday coffee fell sharply on the London Futures and Options Exchange (Fox), with the three-month robusta price closing £34 .down at £1,130 a tonne

Dealers said that the market was finely balanced and trading in a narrow range because people were still uncertain about how things were likely to develop under the organisation's new quota rules.

The latest ICO average indicator price available, for October 11, was 115.25 cents a lb, although the daily price was below the trigger level at 114.07 cents a lb.

the total export quota if the two increases are made - "is more coffee than the consumer market will need in the light of stocks which may be above the BOTIN."

Nevertheless it suggests that prices are likely to rise until the end of the year, "not because of the inadequacy of quota hut because this is likely to he concentrated in the hands of the arabica producers, many of which will not have the coffee available to exercise

The two prospective quota increases will be allotted to avablea coffees, which are in greater demand than robustas, if the ICO 15-day average prices for arabicas is more

# Klöckner caught out by oil fall

# Steven Butler on the West German group's heavy trading losses not have been trading entirely of the risks involved, book

oli market. Klockner says it has accumulated DM600m to

DM700m of paper losses, although this could be mitigated depending on how the market moves. The company had little to say yesterday about precisely bow the losses were made, although traders who deal with

the group were able to provide some details. Klockner has been active in

oil trading for many years, and is thought to have taken losses in 1986, when the plunge in oil prices led to defaults among traders on the Brent forward market.

Traders say the company booked and maintained a big long position, buying oil in the forward Brent market, over the

past year. Prices were sliding for most of that time, however, and rather than take the losses as contracts came due Klöckner

### WORLD COMMODITIES PRICES

### LONDON MARKETS

GOLD prices rose in the afternoon on ehortcovering. Dealers said the weakness of the dollar against the yen prompted some buying from Japanese operators. The strength of silver was also a supportive influence. Buillon closed at \$409.50 an ounce, a rise of \$3.25, after meeting resistance as it ached \$410. Bul dealers said the market appeared to be on an upward trend, with some operators setting an upside objective of around \$416. Cocoa prices recovered on good manufacturer buying in the afternoon to close mixed. The market was earlier depressed by talk of an ivory Coast crop forecast of around 750,000 tonnes for the coming year. Rumours also persist of an ivory Coast block deal of old and new crop cocoa with a French operator. Biffex freight futures rallied

after the Baltic Freight Index rose by 11 points to 1,305. SPOT HARKETS
